Offering the most realistic NBDHE review and practice available, Mosby's Review Questions for the National Board Dental Hygiene Examination includes both a print book and companion website to prepare you for exam success. In the book, you'll review with more than 1,250 Component A practice questions – with each answer including a rationale for both correct and incorrect answer options. Online, you can review the same questions plus an additional 420 case-based items related to Component B in 1) practice mode or 2) timed, exam-simulation mode with randomized tests that match the number and distribution of questions on the NBDHE. From a team of dental hygiene experts including lead editor Barbara Bennett, this Q&A resource is an excellent supplement to any NBDHE content review book! More than 1,680 multiple-choice questions provide comprehensive practice spanning the

entire NBDHE, with 1,250+ items relating to Component A – more than six times the number of questions on the actual exam! – and 420 case-based questions related to Component B. Rationales accompany each question, fully explaining why each answer choice is either correct or incorrect and thus serving as secondary content review. Distribution of questions matches each category on the NBDHE test specifications, ensuring that you have adequate practice for each content area. An Evolve companion website includes all 1,250+ questions from the book plus additional case studies with color images and accompanying questions, available either in practice mode with instant feedback or in exam-simulation format with results and feedback provided at the end of the exam. A test creator and timer on Evolve generates NBDHE-style tests that mimic the number and distribution of questions on the NBDHE and also provides realistic practice with time management during the exam. 16 detailed case studies on Evolve, each of which includes a

patient medical/dental history, completed periodontal chart, oral radiographs, clinical photographs, and 20-35 multiple-choice questions for patients in the five main categories covered on the NBDHE (adult periodontitis, pediatric, geriatric, special needs, and medically compromised). Hyde 2013-11-11
The material in this text was

compiled to serve as a study guide for a review of microbiology and immunology suitable for preparing for Part I of the National Board of Medical Examiners (NBME) exam. I have assumed that you, the reader, have had a comprehensive course covering this discipline. In-depth presentation of material will not be found in this review: You are urged to consult other study aids (lecture notes, textbooks, etc.) for detailed explanations of material that you find troublesome. In general, the text of the book is on the left side of each page; questions, illustrations, summary sentences or phrases, and other study aids are on the right. This format has the intent of getting you involved in the review process. Use a highlighter, put boxes around key statements, answer the questions, and fill in the blanks as you work through the book. Your reward will be proportional to your effort (i.e., no pain, no gain). There are five proficiency examinations in this book, one for each major area of coverage. In addition, a comprehensive examination will be found at the end of the book. Performance data for each is given to help you evaluate your own preparedness. Some questions may cover material not detailed in the book: Be sure that you know the answer to these questions as well, since this is just another form of review.
