An Introduction to Indian Philosophy - Satischandra Chatterjee 2016-01-01

The object of this book is to provide a simple introduction to

the Indian systems of philosophy. Each one of these systems has had a vast and varied development. An attempt has been made to introduce the reader to the spirit and outlook of Indian philosophy and help him to grasp thoroughly the central ideas rather than acquaint him with minute details. Modern students of philosophy feel many difficulties in understanding the Indian problems and theories. Their long experience with university students has helped the authors to realise these, and they have tried to remove them as far as possible. This accounts for most of the critical discussions which could otherwise have been dispensed with. The book has been primarily written for beginners. The first chapter which contains the general principles and basic features of Indian philosophy, as well as a brief sketch of each system, gives the student a bird's-eye view of the entire field and prepares him for a more intensive study of the systems which are contained in

What We Lose - Zinzi Clemmons 2018-06-05

Club, The Root, Harper's Bazaar, Paste, Bustle, Kirkus Reviews, Electric Literature, LitHub, New York Post, Los Angeles Review of Books, and Bust "The debut novel of the year." —Vogue "Like so many stories of the black diaspora, *What We Lose* is an examination of haunting." —Doreen St. Félix, *The New Yorker* "Raw and ravishing, this novel pulses with vulnerability and shimmering anger." —Nicole Dennis-Benn, *O, the Oprah Magazine* "Stunning. . . . Powerfully moving and beautifully wrought, *What We Lose* reflects on family, love, loss, race, womanhood, and the

places we feel home." —Buzzfeed "Remember this name: Zinzi Clemmons. Long may she thrill us with exquisite works like *What We Lose*. . . . The book is a remarkable journey." —Essence From an author of rare, haunting power, a stunning novel about a young African-American woman coming of age—a deeply felt meditation on race, sex, family, and country Raised in Pennsylvania, Thandi views the world of her mother's childhood in Johannesburg as both impossibly distant and ever present. She is an outsider wherever she goes, caught between being black and white, American and not. She tries to connect these dislocated pieces of her life, and as her mother succumbs to cancer, Thandi searches for an anchor—someone, or something, to love. In arresting and unsettling prose, we watch Thandi's life unfold, from losing her mother and learning to live without the person who has most profoundly shaped her existence, to her own encounters with romance and

unexpected motherhood. Through exquisite and emotional vignettes, Clemmons creates a stunning portrayal of what it means to choose to live, after loss. An elegiac distillation, at once intellectual and visceral, of a young woman's understanding of absence and identity that spans continents and decades, *What We Lose* heralds the arrival of a virtuosic new voice in fiction.

The Book of Nothing - John D. Barrow 2009-05-20

What conceptual blind spot kept the ancient Greeks (unlike the Indians and Maya) from developing a concept of zero? Why did St. Augustine equate nothingness with the Devil? What tortuous means did 17th-century scientists employ in their attempts to create a vacuum? And why do contemporary quantum physicists believe that the void is actually seething with subatomic activity? You'll find the answers in this dizzyingly erudite and elegantly explained book by the English cosmologist John D. Barrow. Ranging through mathematics, theology,

philosophy, literature, particle physics, and cosmology, *The Book of Nothing* explores the enduring hold that vacuity has exercised on the human imagination. Combining high-wire speculation with a wealth of reference that takes in Freddy Mercury and Shakespeare alongside Isaac Newton, Albert Einstein, and Stephen Hawking, the result is a fascinating excursion to the vanishing point of our knowledge.
