Political Agendas for Education - Joel Spring 2017-07-14

Following the epic, contentious 2016 presidential election, Joel Spring's ongoing documentation and analysis of political agendas for education reflect the major political issues since 2012. Here he examines the 2016 education planks of the Republican, Democratic, Libertarian, and Green Parties, using their official platforms and other statements, speeches given by each candidate, and media reports and publications. Each party's position is linked to previous political movements in education. Spring offers an alternative agenda for American schools, including a proposed education amendment to the U.S. Constitution and replacing human capital agendas with goals emphasizing education for a long life and happiness. Taking a fresh look at the social and political forces, educational research, and ideologies shaping their educational agendas and a comparative approach, the book stimulates reflection and discussion. Updates and changes in the Sixth Edition: Betsy DeVos's education agenda supporting vouchers, free market competition and for-profit schools and its relationship to the education section of the 2016 Republican platform The important role religion and culture played in the evolution of Republican education policies after the school prayer and Bible decisions of the 1960s The influence of human capital economics on Democratic education proposals How No Child Left Behind and Democratic President Barack Obama opened doors to the growth of the for-profit education industry and investment bankers The 2016 Democratic positions on the cost of higher education and student loan debts The Democratic left as represented by the 2016 campaign of Democrat Bernie Sanders and his influence on the presidential candidate Hillary Clinton and the Democratic Party platform The education proposals of the Green and Libertarian parties

Exhibiting the Past - Frederik Herman 2022-12-19

With respect to public issues, history matters. With the worldwide interest for historical issues related with gender, religion, race, nation, and identity, public history is becoming the strongest branch of academic history. This volume brings together the contributions from historians of education about their engagement with public history, ranging from musealisation and alternative ways of exhibiting to new ways of storytelling.

Red Pedagogy - Sandy Grande 2015-09-28

This ground-breaking text explores the intersection between dominant modes of critical educational theory and the socio-political landscape of American Indian education. Grande asserts that, with few exceptions, the matters of Indigenous people and Indian education have been either largely ignored or indiscriminately absorbed within critical theories of education. Furthermore, American Indian scholars and educators have largely resisted engagement with critical educational theory, tending to concentrate instead on the production of historical monographs, ethnographic studies, tribally-centered curricula, and site-based research. Such a focus stems from the fact that most American Indian scholars feel compelled to address the socio-economic urgencies of their own communities, against which engagement in abstract theory appears to be a luxury of the academic elite. While the author acknowledges the dire need for practical-community based research, she maintains that the global encroachment on Indigenous lands, resources, cultures and communities points to the equally urgent need to develop transcendent theories of decolonization and to build broad-based coalitions.

Deculturalization and the Struggle for Equality - Joel Spring 2016-02-26

Joel Spring's history of school policies imposed on dominated groups in the United States examines the concept of deculturalization—the use of schools to strip away family languages and cultures and replace them with those of the dominant group. The focus is on the education of dominated groups forced to become citizens in territories conquered by the U.S., including Native Americans, Enslaved Africans, Chinese, Mexicans, Puerto Ricans, and Hawaiians. In 7 concise, thought-provoking chapters, this analysis and documentation of how education is used to change or eliminate linguistic and cultural traditions in the U.S. looks at the educational, legal, and social construction of race and racism in the United States, emphasizing the various meanings of "equality" that have existed from colonial America to the present. Providing a broader perspective for understanding the denial of cultural and linguistic rights in the United States, issues of language, culture, and deculturalization are placed in a global context. The major change in the 8th Edition is a new chapter, "Global Corporate Culture and Separate But Equal," describing how current efforts at deculturalization involve replacing family and personal cultures with a corporate culture to increase worker efficiency. Substantive updates and revisions are made throughout all other chapters

The Politics of American Education - Joel Spring 2011-01-12

Turning his distinctive analytical lens to the politics of American education, Joel Spring looks at contemporary educational policy issues from theoretical, practical, and historical perspectives. This comprehensive overview documents and explains who influences educational policy and how, bringing to life the realities of schooling in the 21st century and revealing the ongoing ideological struggles at play. Coverage includes the influence of global organizations on American school policies and the impact of emerging open source and other forms of electronic textbooks. Thought-provoking, lucid, original in its conceptual framework and rich with engaging examples from the real world, this text is timely and useful for understanding the big picture and the micro-level intricacies of the multiple forces at work in controlling U.S. public schools. It is the text of choice for any course that covers or addresses the politics of American education. Companion Website: The interactive Companion Website accompanying this text includes relevant data, public domain documents, YouTube links, and links to websites representing political organizations and interest groups involved in education.

Teaching to Change the World - Jeannie Oakes 2015-11-17

This is an up-to-the-moment, engaging, multicultural introduction to education and teaching and the challenges and opportunities they present. Together, the four authors bring a rich blend of theory and practical application to this groundbreaking text. Jeannie Oakes is a leading education researcher and former director of the UCLA teacher education program. Martin Lipton is an education writer and consultant and has taught in public schools for 31 years. Lauren Anderson and Jamy Stillman are former public school teachers, now working as teacher educators. This unique, comprehensive foundational text considers the values and politics that pervade the U.S. education system, explains the roots of conventional thinking about schooling and teaching, asks critical questions about how issues of power and privilege have shaped and continue to shape educational opportunity, and presents powerful examples of real teachers working for equity and justice. Taking the position that a hopeful, democratic future depends on ensuring that all students learn, the text pays particular attention to inequalities associated with race, social class, language, gender, and other social categories and explores teachers' role in addressing them. The text provides a research-based and practical treatment of essential topics, and it situates those topics in relation to democratic values; issues of diversity; and cognitive, sociocultural, and constructivist perspectives on learning. The text shows how knowledge of education foundations and history can help teachers understand the organization of today's schools, the content of contemporary curriculum, and the methods of modern teaching. It likewise shows how teachers can use such knowledge when thinking about and responding to headline issues like charter schools, vouchers, standards, testing, and bilingual education, to name just a few. Central to this text is a belief that schools can and must be places of extraordinary educational quality and institutions in the service of social justice. Thus, the authors address head-on tensions between principles of democratic schooling and competition for always-scarce high-quality opportunities. Woven through the text are the voices of a diverse group of teachers, who share their analyses and personal anecdotes concerning what teaching to change the world means and involves. Click Here for Book Website Pedagogical Features: Digging Deeper sections referenced at the end of each chapter and featured online include supplementary readings and resources from scholars and practitioners who are addressing issues raised in the text. Instructor's Manual offers insights about how to teach course content in ways that are consistent with cognitive and sociocultural learning theories, culturally diverse pedagogy, and authentic assessment. Wheels in the Head - Joel H. Spring 2006

In this popular text, Joel Spring provocatively analyzes the ideas of traditional and non-traditional philosophers, from Plato to Paulo Freire, regarding the contribution of education to the creation of a democratic society. Each section focuses on an important theme: "Autocratic and Democratic Forms of Education;" "Dissenting Traditions in Education;" "The Politics of Culture;" "The Politics of Gender;" and "Education and Human Rights." This edition features a special emphasis on human rights education. Spring advocates a legally binding right to an education that includes an education in human rights. His argument is that until schools are required to fulfill a duty to protect human rights and teach others to protect human rights, government-operated schools will remain authoritarian rather than democratic institutions. *Wheels in the Head: Educational Philosophies of Authority, Freedom, and Culture From Socrates to Human Rights, Second Edition*, a critically original work, is widely used as a text for courses across the fields of philosophical, social, political, and historical foundations of education, and critical issues in education. Reflecting its global relevance, a Chinese translation was published by the University of Peking Press in 2005.

Economization of Education - Joel Spring 2015-03-27

In this timely, cogent analysis of trends and powerful forces shaping

global educational policy today, Joel Spring focuses on how economization is making economic growth and increased productivity the main goals of schools, and the ways these goals are achieved—including measuring educational policies by their costs and economic benefits, shaping family life to ensure productive workers and high-achieving students, introducing entrepreneurship education into curricula from preschool through higher education, and increasing the involvement of economists in educational policy analysis. Close attention is given to the Organization for Economic Cooperation and Development (OECD), the World Bank, the World Economic Forum, and multinational corporations, which, as advocates of economization, want schools to focus on teaching hard and soft skills needed by the global labor market. Economization raises questions about the effects of economically driven agendas for schools: Will education policies advocated by global organizations and multinational businesses corporatize and standardize human personalities and families? What type of global worker is being sought by global organizations and multinational corporations? What education programs are supported to educate the ideal global worker? What is the ideal family life for economic growth and development? Detailing and analyzing the politics and motivations driving economization, the book concludes with an assessment of the impacts of the confluence of business interests, economic theories, governments, and educators.

The Death of Expertise - Tom Nichols 2017-02-01

Technology and increasing levels of education have exposed people to more information than ever before. These societal gains, however, have also helped fuel a surge in narcissistic and misguided intellectual egalitarianism that has crippled informed debates on any number of issues. Today, everyone knows everything: with only a quick trip through WebMD or Wikipedia, average citizens believe themselves to be on an equal intellectual footing with doctors and diplomats. All voices, even the most ridiculous, demand to be taken with equal seriousness, and any claim to the contrary is dismissed as undemocratic elitism. Tom Nichols' *The Death of Expertise* shows how this rejection of experts has occurred: the openness of the internet, the emergence of a customer satisfaction model in higher education, and the transformation of the news industry into a 24-hour entertainment machine, among other reasons.

Paradoxically, the increasingly democratic dissemination of information, rather than producing an educated public, has instead created an army of ill-informed and angry citizens who denounce intellectual achievement. When ordinary citizens believe that no one knows more than anyone else, democratic institutions themselves are in danger of falling either to populism or to technocracy or, in the worst case, a combination of both. An update to the 2017 breakout hit, the paperback edition of *The Death of Expertise* provides a new foreword to cover the alarming exacerbation of these trends in the aftermath of Donald Trump's election. Judging from events on the ground since it first published, *The Death of Expertise* issues a warning about the stability and survival of modern democracy in the Information Age that is even more important today.

Excellence Gaps in Education - Jonathan A. Plucker 2020-01-15

In *Excellence Gaps in Education*, Jonathan A. Plucker and Scott J. Peters shine a spotlight on "excellence gaps"—the achievement gaps among subgroups of students performing at the highest levels of achievement. Much of the focus of recent education reform has been on closing gaps in achievement between students from different racial, ethnic, or socioeconomic backgrounds by bringing all students up to minimum levels of proficiency. Yet issues related to excellence gaps have been largely absent from discussions about how to improve our schools and communities. Plucker and Peters argue that these significant gaps reflect the existence of a persistent talent underclass in the United States among African American, Hispanic, Native American, and poor students, resulting in an incalculable loss of potential among our fastest growing populations. Drawing on the latest research and a wide range of national and international data, the authors outline the scope of the problem and make the case that excellence gaps should be targeted for elimination. They identify promising interventions for talent development already underway in schools and provide a detailed review of potential strategies, including universal screening, flexible grouping, targeted programs, and psychosocial interventions. *Excellence Gaps in Education* has the potential for changing our national conversation about equity and excellence and bringing fresh attention to the needs of high-potential students from underrepresented backgrounds.

The American School - Joel Spring 2018-02-15

This current, comprehensive history of American education is designed to stimulate critical analysis and critical thinking by offering alternative interpretations of each historical period. In his signature straight-forward, concise style, Joel Spring provides a variety of interpretations of American schooling, from conservative to leftist, in order to spark the reader's own critical thinking about history and schools. This tenth edition follows the history of American education from the seventeenth century to the integration into global capitalism of the twenty-first century to the tumultuous current political landscape. In particular, the updates focus on tracing the direct religious links between the colonial Puritans and the current-day Trump administration. Chapters 1 and 2 have been rewritten to take a closer look at religious traditions in American schools, leading up to the educational ideas of the current U.S. Secretary of Education Betsy DeVos. An updated Chapter 15 further links traditional religious fundamentalist ideas and the twentieth century free market arguments of the Chicago school of economists to President Trump's administration and the influence of the Alt-Right.

Defending Public Education from Corporate Takeover - Todd Alan Price 2012-12-19

At this moment, schools are doing everything they can to win the Race to the Top. They are allocating their funding to test preparation, riffing beloved teachers, and transferring students who "drag down" their grade average on the state report card. This book describes the current state of the education system in the United States. Readers will be on the front lines of the protests in Madison, in the inner city public-turned-charter schools, and in the shoes of the teachers dealing with educational politics every day. By the end of this text, you may beg the question: who's winning in the Race to the Top?

Globalization of Education - Joel Spring 2008-11-19

Continuing Joel Spring's reportage and analysis of the intersection of global forces and education, this text offers a comprehensive overview and synthesis of current research, theories, and models related to the topic. Spring introduces readers to the processes, institutions, and forces by which schooling has been globalized and examines the impact of these forces on schooling in local contexts. Designed for courses on globalization and education, international and comparative education, educational foundations, multicultural education, and educational policy, the text is written in a clear narrative style to engage readers in thoughtful consideration of topics discussed. Each chapter includes "Key Points" that summarize the content and suggest issues and questions for critical analysis, discussion, and debate.

African Childhoods - M. Ensor 2012-09-07

With 70 per cent of its people under the age of 30, Africa is the world's youngest continent. African youngsters have been largely characterized as either vulnerable victims of the frequent humanitarian crises that plague their homelands, or as violent militarized youth and 'troubled' gang members. Young people's contributions to processes of educational provision, peace building and participatory human development in Africa are often ignored. While acknowledging the profound challenges associated with growing up in an environment of uncertainty and deprivation, *African Childhoods* sheds light on African children's often constructive engagement with a variety of societal conditions, adverse or otherwise, and their ability to positively influence their own lives and those of others.

In Defense of a Liberal Education - Fareed Zakaria 2015-03-30

CNN host and best-selling author Fareed Zakaria argues for a renewed commitment to the world's most valuable educational tradition. The liberal arts are under attack. The governors of Florida, Texas, and North Carolina have all pledged that they will not spend taxpayer money subsidizing the liberal arts, and they seem to have an unlikely ally in President Obama. While at a General Electric plant in early 2014, Obama remarked, "I promise you, folks can make a lot more, potentially, with skilled manufacturing or the trades than they might with an art history degree." These messages are hitting home: majors like English and history, once very popular and highly respected, are in steep decline. "I get it," writes Fareed Zakaria, recalling the atmosphere in India where he grew up, which was even more obsessed with getting a skills-based education. However, the CNN host and best-selling author explains why this widely held view is mistaken and shortsighted. Zakaria eloquently expounds on the virtues of a liberal arts education—how to write clearly, how to express yourself convincingly, and how to think analytically. He turns our leaders' vocational argument on its head. American routine manufacturing jobs continue to get automated or outsourced, and specific vocational knowledge is often outdated within a few years. Engineering is a great profession, but key value-added skills you will also need are creativity, lateral thinking, design, communication, storytelling, and, more than anything, the ability to continually learn and enjoy learning—precisely the gifts of a liberal education. Zakaria argues that technology is transforming education, opening up access to the best courses and classes in a vast variety of subjects for millions around the world. We are at the dawn of the greatest expansion of the idea of a liberal education in human history.

Today's Guide to Educational Policy - Joel Spring 2021-04-12

In his latest book, Joel Spring covers major political, economic and social issues affecting US and global education policy today. Crafted to evoke classroom discussion, this book explores contemporary issues such as the pandemic, institutional racism, religious controversies, nationalism and immigration, increased reliance on online instruction, climate change, economics of education and the deep state in education. Giving students the opportunity to engage in critical thinking and explore the growing sense that US and global education is in distress and in need of fundamental transformation, this book forces readers to examine their own values and how they might apply this thinking to their own education policy and practice.

How Educational Ideologies Are Shaping Global Society - Joel Spring 2014-04-08

In this book Joel Spring explores three major international educational ideologies that are shaping global society: neo-liberal educational ideology, human rights education, and environmentalism. Neo-liberal ideology reflects a rethinking of nationalist forms of education as the nation-state slowly erodes under the power of a growing global civil society. Traditional nationalist education attempts to mold loyal and patriotic citizens who are emotionally attached to symbols of the state, whereas the goal of neo-liberal educational ideology is to change nationalist education to serve the needs of the global economy. These changes are fueling a clash between the ideas of free-market and consumer-based neo-liberals and those of human rights and environmental educators. Human rights education is concerned with creating activist global citizens. It is rooted in the idea that inherent in human rights doctrines is a collective responsibility to ensure the rights of all people. Environmentalism is the most radical of the ideologies because it rejects the industrial and consumerist paradigm that has dominated most economic thought, including capitalism and communism. Spring synthesizes and analyzes the effect of these educational ideologies on shaping the future of the global society. In the concluding section, he compares the effect of these ideologies on global society with the possibility of a world divided between conflicting civilizations. *How Educational Ideologies Are Shaping Global Society: Intergovernmental Organizations, NGOs, and the Decline of the Nation-State* features: *a critical exploration of the transition of schooling from a function of the nation-state to a globalized economic and political system; *a discussion of the major organizations and trading blocs shaping the future globalization of educational policies; *an analysis of the major competing global ideologies of education--including national and corporate models that emphasize training workers for a competitive global free market; the worldwide network of human rights and peace educators who are teaching a global set of ethics; and the environmental movement's efforts to create a common set of educational standards for sustainable development and sustainable consumption; and *an exploration of the possible future of global educational policy and school organizations. By integrating a wide range of previously scattered information within a bold new framework for understanding educational ideologies and their impact on the global society, Spring raises important questions for researchers, professionals, and students in history and philosophy of education, educational policy, educational studies, comparative education, multicultural education, curriculum studies, critical media studies, global studies, human rights education, and related areas.

Black Males and Racism - Terence D. Fitzgerald 2015-10-23

Behind the twenty-first-century curtain of "colorblind" public sentiment lies an often-ignored reality shared by many African American males—racism continues to thrive and often drastically affects their lives. Fitzgerald draws on his extensive interviews of black males to reveal the experiences of racism that continue in public schools and in American higher education. Using empirical data and the methods of sociological research, Fitzgerald analyzes how the persistent effects of white supremacy in education have threatened the psychological and economic welfare of black males. The effects often last well into adulthood. Unraveling the subtle and overt mechanisms of institutional social control leads Fitzgerald to proposals to reduce structural racism and improve the lives of African American youth.

Education and Social Change - John L. Rury 2015-07-24

This brief, interpretive history of American schooling focuses on the evolving relationship between education and social change. Like its predecessors, this new edition adopts a thematic approach, investigating the impact of social forces such as industrialization, urbanization, immigration, globalization, and cultural conflict on the development of schools and other educational institutions. It also examines the various ways that schools have contributed to social change, particularly in enhancing the status and accomplishments of certain social groups and not others. Detailed accounts of the experiences of women and minority groups in American history consider how their lives have been affected by

education, while "Focal Point" sections within each chapter allow the reader to hone in on key moments in history and their relevance within the broader scope of American schooling from the colonial era to the present. This new edition has been comprehensively updated and edited for greater readability and clarity. It offers a revised final chapter, updated to include recent change in education politics and policy, in particular the decline of No Child Left Behind and the impact of the Common Core and movements against it. Further additions include enhanced coverage of colonial and early post-colonial American schooling, added materials on persistent issues such as race in education, an updated discussion of the GED program, and a closer look at the role of technology in schools. With its nuanced treatment of both historical and contemporary factors influencing the modern school system, this book remains an excellent resource for investigating and critiquing the social, economic, and cultural development of American education.

Many world-class thinkers and creators have been concerned about the state of education in the United States. Discover their thoughts on how children really learn and what teachers must do to optimally tap children's latent abilities. Reveals what world-class thinkers and creators have said about how children really learn and what teachers must do to optimally tap their latent abilities Explains the twelve capacities emphasized by these thinkers and creators, including love of learning, creativity, curiosity, playfulness, imagination, wonder, tolerance, reverence for life, appreciation of beauty, honoring diversity, celebrating individuality, and developing compassion, and how these capabilities must serve as the foundation for any future educational reform efforts Provides examples of teachers and classrooms where the educational ideas of these thinkers and creators are currently being practiced, demonstrating that their prescriptions are not merely fanciful "pie in the sky" dreams Includes resources including organizations, books, magazines, websites, and videos that enable readers to take action

Wheels in the Head - Joel Spring 2012-08-21

In this popular text Joel Spring provocatively analyzes the ideas of traditional and non-traditional philosophies from Confucianism to human rights regarding the contribution of education to the creation of a democratic society. The goal is to explore how governments use education to control and manage their populations, and to examine forms of education that claim to free people from authoritarian control. *Wheels in the Head*, a critically original work now in its third edition, is widely used as a text for courses on philosophical, social, political, and historical foundations of education, and critical issues in education. Reflecting its global relevance, a Chinese translation of the second edition was published in 2005. NEW TO THIS EDITION: Expanded analysis of the use of education by authoritarian states Revisions to more clearly relate educational ideas to the theme of "wheels in the head" - a phrase coined by philosopher Max Stirner to describe the use of schools by modern governments to control their citizens. New sections on liberation education and on human rights education

Urban Preparation - Chezare A. Warren 2021-02-23

2018 Critics' Choice Book Award, American Educational Studies Association (AESA) 2018 Outstanding Book Award, Society of Professors of Education Chezare A. Warren chronicles the transition of a cohort of young Black males from Urban Prep Charter Academy for Young Men to their early experiences in higher education. A rich and closely observed account of a mission-driven school and its students, *Urban Preparation*

makes a significant contribution to our understanding of how young males of color can best be served in schools throughout the United States today. A founding teacher at Urban Prep, Warren offers a detailed exploration of what this single-sex public high school on the South Side of Chicago has managed to accomplish amid profoundly challenging circumstances. He provides a comprehensive portrait of the school—its leaders, teachers, and professional staff; its students; and the community that the school aims to serve—and highlights how preparation for higher education is central to its mission. Warren focuses on three main goals: to describe Urban Prep's plans and efforts to prepare young Black males for college; to understand how race, community, poverty, and the school contributed, in complex and interrelated ways, to the academic goals of these students; and to offer a wide-ranging set of conclusions about the school environments and conditions that might help young Black males throughout the country succeed in high school and college.

Systemic Racism - Ruth Thompson-Miller 2017-10-17

This volume identifies some of the remaining gaps in extant theories of systemic racism, and in doing so, illuminates paths forward. The contributors explore topics such as the enduring hyper-criminalization of blackness, the application of the white racial frame, and important counter-frames developed by people of color. They also assess how African Americans and other Americans of color understand the challenges they face in white-dominated environments. Additionally, the book includes analyses of digitally constructed blackness on social media as well as case studies of systemic racism within and beyond U.S. borders. This research is presented in honor of Kimberley Ducey's and Ruth Thompson-Miller's teacher, mentor, and friend: Joe R. Feagin.

White Prescriptions? - Terence D. Fitzgerald 2015-11-17

For all the debates about black males and their role in American society, there has been little attention to a dangerous and growing trend: the overprescription of Ritalin and other behavioral drugs. This book reveals

how and why black males are disproportionately targeted and controlled by American schools in ways that hamper and endanger their educational success. Fitzgerald shows how the government, medical practitioners, and the pharmaceuticals industry have facilitated this oppressive trend, setting it against a larger historical backdrop of racism in American education.

American Education - Wayne J. Urban 2013-08-15

American Education: A History, 5e is a comprehensive, highly-regarded history of American education from pre-colonial times to the present. Chronologically organized, it provides an objective overview of each major period in the development of American education, setting the discussion against the broader backdrop of national and world events. The first text to explore Native American traditions (including education) prior to colonization, it also offers strong, ongoing coverage of minorities and women. New to this much-anticipated fifth edition is substantial expanded attention to the discussions of Native American education to reflect recent scholarship, the discussion of teachers and teacher leaders, and the educational developments and controversies of the 21st century.

On a Scale - Norbert Elliot 2005

Fear and Trembling? Shock and Awe? Which set of statements best describes the emotions surrounding the assessment of writing ability in educational settings? This book - the first historical study of its kind - begins with Harvard University's 1874 requirement that first-year student applicants submit a short composition as part of the admissions process; the book concludes with the College Board's 2005 requirement for an essay to be submitted as part of the new SAT(R) Reasoning Test. Intended for teachers who must prepare students to submit their writing for formal assessment, administrators who must make critical decisions based on test scores, and policy makers who must allocate resources based on evaluation systems, On a Scale provides a much-needed historical and conceptual background to questions arising from national attention to student writing ability.
