The Semantic Web - ISWC 2005 -
Yolanda Gil 2005-11-04
This book constitutes the refereed

proceedings of the 4th International Semantic Web Conference, ISWC 2005, held in Galway, Ireland, in November 2005. The 54 revised full academic papers and 17 revised industrial papers presented together with abstracts of 3 invited talks were carefully reviewed and selected from a total

of 217 submitted papers to the academic track and 30 to the industrial track. The research papers address all current issues in the field of the semantic Web, ranging from theoretical aspects to various applications. The industrial track contains papers on applications in particular industrial sectors, new technology for building applications, and methodological and feasibility aspects of building industrial applications that incorporate semantic Web technology. Short descriptions of the top five winning applications submitted to the Semantic Web Challenge competition conclude the volume.

Facets of Virtual Environments - Fritz Lehmann-Grube 2010-02-14

In recent years, the popularity of virtual

worlds has increased significantly and they have consequently come under closer academic scrutiny. Papers about virtual worlds are typically published at conferences or in journals that specialize in something - tirely different, related to some secondary aspect of the research. Thus a paper d- cussing legal aspects of virtual worlds may be published in a law journal, while a psychologist's analysis of situation awareness may appear at a psychology conference. The downside of this is that if you publish a virtual worlds paper at an unrelated conference in this manner you are likely to be one of only a handful of attendees working in the area. You will not, therefore, achieve the most important goal of - tending conferences: meeting and conversing with like-minded colleagues from the academic community of your field of study. Virtual worlds touch on many well-established themes in other areas of

science. Researchers from all these fields will therefore be looking at this new, interesting, and growing field. However, to do effective research related to these complex constructs, researchers need to take into account many of the other facets from other fields that impact virtual worlds. Only by being familiar with and paying attention to all these different aspects can virtual worlds be properly understood.
