The Professional Practice of Architectural Detailing - Osamu A. Wakita 1999

A thorough knowledge of the "hows" and "whys" of building assemblies is a prerequisite to effective architectural design. Architectural detailing - creating drawings that accurately describe particular assemblies within a design - is essential to controlling the total building process. This book provides students with a solid grounding in building assemblies, followed by step-by-step guidance on how to develop effective professional architectural details which are essential to becoming a skilled architectural detailer. More than 1,000 expertly-crafted design details (including over 400 new CAD-drawn 3-D images, details, and photographs) help illustrate the concepts presented while establishing a high level of detailing excellence to which students will aspire.

*Behavioral Architecture* - Clovis Heimsath 1977

"Based on a new concept in architecture, this volume shows how to use the findings of behavioral psychology to create more meaningful architectural designs. It is one of the first synthesis by a practicing architect of what has been learned about the interaction of architecture and human behavior. In the process the author looks at old problems in

new ways, adding a new dimension to present architectural practices ... Although its approach to architecture is unique, the book is primarily a practical work. Its main points are solidly supported by a detailed behavioral design process model--a step-by-step procedure for using behavior in contemporary design"--Jacket.

Showmanship in the Dining Room - Bruce H. Axler 1974

Abstract: A discussion of showmanship in food service explains how to increase profits using a number of different techniques: displaying foods; having informed service personnel; presenting beverages and foods dramatically; and cooking and preparing foods at the table. Patrons like flamboyance and are willing to pay for the thrill and excitement it provides. Flambeing (setting alcohol on fire) can be done with any dish or drink, but requires a proper setting, employee training and appropriate menu items. Step-by-step instructions are provided for fruit flambe and cafe diable. Guidelines are provided for tableside preparation of items such as salads and escalope of veal Algerienne. Many other useful hints are included. (kbc).
