Space and Fates of International Law -

Ekaterina Yahyaoui Krivenko 2020-06-30

The book offers the first analysis of the influence exercised by the concept of space on the emergence and continuing operation of international law. By adopting a historical perspective and analysing work of two central early modern thinkers – Leibniz and Hobbes – it offers a significant addition to a limited range of resources on early modern history of international law. The book traces links between concepts of space, universality, human cognition, law, and international law in these two early modern thinkers in a comparative fashion. Through this analysis, the book demonstrates the dependency of the contemporary international law on the Hobbesian concept of space. Although some Leibnizian elements continue to operate, they are distorted. This continuing operation of Leibnizian elements is explained by the inability of international law, which is based on the Hobbesian concept of space, to ensure

universality of its normative foundation.

I Will Survive - Gloria Gaynor 2014-03-11

I Will Survive is the story of Gloria Gaynor, America's "Queen of Disco." It is the story of riches and fame, despair, and finally salvation. Her meteoric rise to stardom in the mid-1970s was nothing short of phenomenal, and hits poured forth that pushed her to the top of the charts, including "Honey Bee," "I Got You Under My Skin," "Never Can Say Goodbye," and the song that has immortalized her, "I Will Survive," which became a #1 international gold seller.

With that song, Gloria heralded the international rise of disco that became synonymous with a way of life in the fast lane - the sweaty bodies at Studio 54, the lines of cocaine, the indescribable feeling that you could always be at the top of your game and never come down. But down she came after her early stardom, and problems followed in the wake, including the death of her mother, whose love had anchored the young singer, as well as constant battles with weight, drugs, and alcohol. While her fans always imagined her to be rich, her personal finances collapsed due to poor management; and while many envied her, she felt completely empty inside. In the early 1980s, sustained by her marriage to music publisher Linwood Simon, Gloria took three years off and reflected upon her life. She visited churches and revisited her mother's old Bible. Discovering the world of gospel, she made a commitment to Christ that sustains her to this day.

The Routledge Companion to Humanitarian Action - Roger Mac Ginty 2015-03-24

The Companion on Humanitarian Action addresses the political, ethical, legal and practical issues which influence reactions to humanitarian crisis. It does so by exploring the daily dilemmas faced by a range of actors, including policy makers, aid workers, the private sector and the beneficiaries of aid and by challenging common perceptions regarding humanitarian crisis and the policies put in place to address these. Through such explorations, it provides practitioners and scholars with the knowledge needed to both understand and

improve upon current forms of humanitarian action. The Companion will be of use to those interested a range of humanitarian programmes ranging from emergency medical assistance, military interventions, managing refugee flows and the implementation of international humanitarian law. As opposed to addressing specific programmes, it will explore five themes seen as relevant to understanding and engaging in all modes of humanitarian action. The first section explores varying interpretations of humanitarianism, including critical historical and political-economic explanations as well as more practice based explorations focused on notions needs assessments and evaluation. Following this, readers will be exposed to the latest debates on a range of humanitarian principles including neutrality and sovereignty, before exploring the key issues faced by the main actors involved in humanitarian crisis (from international NGOs to local community based organizations). The final two sections address

what are seen as key dilemmas in regards to humanitarian action and emerging trends in the humanitarian system, including the increasing role of social media in responding to crises. Whilst not a 'how to guide', the Companion contains many practical insights for policy makers and aid workers, whilst also offering analytical insights for students of humanitarian action. Indeed, throughout the book, readers will come to the realization that understanding and improving humanitarian action simultaneously requires both active critical reflection and an acceptance of the urgency and timeliness of action that is required for humanitarian assistance to have an impact on vital human needs. Exploring a sector that is far from homogenous, both practitioners and scholars alike will find the contributions of this book offers them a deeper understanding of the motivations and mechanics of current interventions, but also insight into current changes and progress occurring in the field of humanitarian practice.

Aerosol Science - Ian Colbeck 2014-01-30
Aerosols influence many areas of our daily life. They are at the core of environmental problems such as global warming, photochemical smog and poor air quality. They can also have diverse effects on human health, where exposure occurs in both outdoor and indoor environments. However, aerosols can have beneficial effects too; the delivery of drugs to the lungs, the delivery of fuels for combustion and the production of nanomaterials all rely on aerosols. Advances in particle measurement technologies have made it possible to take advantage of rapid changes in both particle size and concentration. Likewise, aerosols can now be produced in a controlled fashion. Reviewing many technological applications together with the current scientific status of aerosol modelling and measurements,

this book includes: • Satellite aerosol remote sensing • The effects of aerosols on climate change • Air pollution and health • Pharmaceutical aerosols and pulmonary drug delivery • Bioaerosols and hospital infections • Particle emissions from vehicles • The safety of emerging nanomaterials • Radioactive aerosols: tracers of atmospheric processes With the importance of this topic brought to the public's attention after the eruption of the Icelandic volcano Eyjafjallajökull, this book provides a timely, concise and accessible overview of the many facets of aerosol science.

Overcoming School Refusal - Joanne Garfi 2018-01-31

School refusal affects up to 5% of children and is a complex and stressful issue for the child, their family and school. The more time a child is away from school, the more difficult it is for the child to resume normal school life. If school refusal becomes an ongoing issue it can negatively impact the child's social and educational

development. Psychologist Joanne Garfi spends most of her working life assisting parents, teachers, school counsellors, caseworkers, and community policing officers on how best to deal with school refusal. Now her experiences and expertise are available in this easy-to-read practical book. *Overcoming School Refusal* helps readers understand this complex issue by explaining exactly what school refusal is and provides them with a range of strategies they can use to assist children in returning to school. Areas covered include:

- types of school refusers
- why children refuse to go to school
- symptoms
- short term and long term consequences
- accurate assessment
- treatment options
- what parents can do
- what schools can do
- dealing with anxious high achievers
- how to help children on the autism spectrum with school refusal

Keeper of the River - Nilsson Hennelly
1999-01-01

Jack, Keiko, and Arty are back in the exciting

second installment of the *Rafters* series. At the conclusion of the first book, the gang was unable to find Jack's older brother, Ben, who'd fallen overboard while riding the magic raft down the Dunmoore River. Book two begins with Jack and Keiko returning to the fair grounds to look for the old junk dealer who'd sold them the raft. Although the man is nowhere to be found, the kids find an old map they believe holds the secret to Ben's whereabouts. Despite their last frightening trip down river, Jack, Keiko, and Arty return for more thrills on their magical raft, only to discover that the map they've placed their faith in transports them to a place from which they may never return! Will Jack find Ben? Will the kids discover the identity of the old man who sold them the raft? These questions and others are finally revealed in this gripping new installment of *Rafters*!

Descriptive Translation Studies and Beyond

- Gideon Toury 1995

A replacement of the author's well-known book on Translation Theory, *In Search of a Theory of Translation* (1980), this book makes a case for Descriptive Translation Studies as a scholarly activity as well as a branch of the discipline, having immediate consequences for issues of both a theoretical and applied nature.

Methodological discussions are complemented by an assortment of case studies of various scopes and levels, with emphasis on the need to contextualize whatever one sets out to focus on. Part One deals with the position of descriptive

studies within TS and justifies the author's choice to devote a whole book to the subject. Part Two gives a detailed rationale for descriptive studies in translation and serves as a framework for the case studies comprising Part Three. Concrete descriptive issues are here tackled within ever growing contexts of a higher level: texts and modes of translational behaviour □ in the appropriate cultural setup; textual components □ in texts, and through these texts, in cultural constellations. Part Four asks the question: What is knowledge accumulated through descriptive studies performed within one and the same framework likely to yield in terms of theory and practice? This is an excellent book for higher-level translation courses.

Handbook of Translation Studies - Yves Gambier
2010-10-28

As a meaningful manifestation of how institutionalized the discipline has become, the new Handbook of Translation Studies is most welcome. The HTS aims at disseminating knowledge about translation and interpreting to a relatively broad audience: not only students who often adamantly prefer user-friendliness, researchers and lecturers in Translation Studies, Translation & Interpreting professionals; but also scholars, experts and professionals from other disciplines (among which linguistics, sociology, history, psychology). Moreover, the HTS is the first handbook with this scope in Translation Studies that has both a print edition and an online version. The HTS is variously searchable: by article, by author, by subject. Another benefit

is the interconnection with the selection and organization principles of the online Translation Studies Bibliography (TSB). Many items in the reference lists are hyperlinked to the TSB, where the user can find an abstract of a publication. All articles are written by specialists in the different subfields and are peer-reviewed

Moon-face and Other Stories - Jack London 1919
JACK LONDON (1876-1916), American novelist, born in San Francisco, the son of an itinerant astrologer and a spiritualist mother. He grew up in poverty, scratching a living in various legal and illegal ways -robbing the oyster beds, working in a canning factory and a jute mill, serving aged 17 as a common sailor, and taking part in the Klondike gold rush of 1897. This various experience provided the material for his works, and made him a socialist. "The son of the Wolf" (1900), the first of his collections of tales, is based upon life in the Far North, as is the book that brought him recognition, "The Call of the Wild" (1903), which tells the story of the dog

Buck, who, after his master's death, is lured back to the primitive world to lead a wolf pack. Many other tales of struggle, travel, and adventure followed, including "The Sea-Wolf" (1904), "White Fang" (1906), "South Sea Tales" (1911), and "Jerry of the South Seas" (1917). One of London's most interesting novels is the semi-autobiographical "Martin Eden" (1909). He also wrote socialist treatises, autobiographical essays, and a good deal of journalism.

Handbook of Translation Studies - Yves Gambier
2012

As a meaningful manifestation of how institutionalized the discipline has become, the new Handbook of Translation Studies is most welcome. It joins the other signs of maturation such as Summer Schools, the development of academic curricula, historical surveys, journals, book series, textbooks, terminologies,

bibliographies and encyclopedias. The HTS aims at disseminating knowledge about translation and interpreting and providing easy access to a large range of topics, traditions, and methods to a relatively broad audience: not only students who often adamantly prefer such user-friendliness, researchers and lecturers in Translation Studies, Translation & Interpreting professionals; but also scholars and experts from other disciplines (among which linguistics, sociology, history, psychology). In addition the HTS addresses any of those with a professional or personal interest in the problems of translation, interpreting, localization, editing, etc., such as communication specialists, journalists, literary critics, editors, public servants, business managers, (intercultural) organization specialists, media specialists, marketing professionals. Moreover, The HTS offers added value. First of all, it is the first Handbook with this scope in Translation Studies that has both a print edition and an online version. The advantages of an

online version are obvious: it is more flexible and accessible, and in addition, the entries can be regularly revised and updated. The Handbook is variously searchable: by article, by author, by subject. A second benefit is the interconnection with the selection and organization principles of the online Translation Studies Bibliography (TSB). The taxonomy of the TSB has been partly applied to the selection of entries for the HTS. Moreover, many items in the reference lists are hyperlinked to the TSB, where the user can find an abstract of a publication. All articles (between 500 and 6,000 words) are written by specialists in the different subfields and are peer-reviewed. Last but not least, the usability, accessibility and flexibility of the HTS depend on the commitment of people who agree that Translation Studies does matter. All users are therefore invited to share their feedback. Any questions, remarks and suggestions for improvement can be sent to the editorial team at hts@lessius.eu.

Uncertainty in Engineering - Louis J. M. Aslett 2021

This open access book provides an introduction to uncertainty quantification in engineering. Starting with preliminaries on Bayesian statistics and Monte Carlo methods, followed by material on imprecise probabilities, it then focuses on reliability theory and simulation methods for complex systems. The final two chapters discuss various aspects of aerospace engineering, considering stochastic model updating from an imprecise Bayesian perspective, and uncertainty quantification for aerospace flight modelling. Written by experts in the subject, and based on lectures given at the Second Training School of the European Research and Training Network UTOPIAE (Uncertainty Treatment and Optimization in Aerospace Engineering), which took place at Durham University (United

Kingdom) from 2 to 6 July 2018, the book offers an essential resource for students as well as scientists and practitioners.

Biological Weapons Defense - Luther E. Lindler
2007-10-27

In 2003, the President's budget for bioterrorism defense totalled more than \$5 billion. Today, the nation's top academic scientists are scrambling to begin work to understand *Bacillus anthracis* and develop new vaccines and drugs. However, just five years ago, only the US Department of Defense (DOD) seemed concerned about these "exotic" agents. In 1997, the DOD spent approximately \$137 million on biodefense to protect the deployed force, while academe, industry, local governments, and most of our federal leadership was oblivious to, and in some cases doubtful of, the seriousness of the threat. The National Institutes of Health (NIH) received the largest budget increase in the organization's history. Fortunately, during this time of national urgency, a sound base exists on which to build

our defenses against this new threat. A relatively small cadre of dedicated scientists within the US Army Medical Research and Materiel Command (USAMRMC) laid this foundation over the past 20 years.

Estimating Market Value and Establishing Market Rent at Small Airports - Aviation Management Consulting Group, Inc 2020

"Staff from smaller airports typically lack specialized expertise in the negotiation and development of airport property or the resources to hire consultants. ACRP Research Report 213 provides airport management, policymakers, and staff a resource for developing and leasing airport land and improvements, methodologies for determining market value and appropriate rents, and best practices for negotiating and re-evaluating current lease agreements. There are

many factors that can go into the analysis, and this report reviews best practices in property development."--Foreword.

Starspeak - Dawn Henderson 2012-12-01

Messages of ascension, love, contact and more in the words of our star brothers and sisters. We are moving through a time of massive change, unprecedented in recorded memory, a time in which life as we know it is being turned upside down. But we do not have to travel through this often confusing and disorientating process alone, for from across the galaxies our star brothers and sisters have gathered to help us through this transformation. Many people on Earth are now being contacted by these loving beings, receiving their words of guidance, encouragement and reassurance to share with those who as yet do not hear them. This book contains some of these messages, received by the author from the star beings of light, messages that are filled with the love and wisdom of the universe. Dawn Henderson is an author, channel and spiritual teacher who lives in the ancient mystical

landscape of Wiltshire, England.
