Becoming a teacher - Josef de Beer 2020-12-31
This book disseminates original research on learning in and from practice in pre-service teacher education. Authors such as Lederman and Lederman describe the student teaching practicum (or work-integrated learning [WIL]), which is an essential component of pre-service teacher education, as the 'elephant in the room'. These

authors note that 'the capstone experience in any teacher education programme is the student teaching practicum... [a]fter all, this is where the rubber hits the road'. However, many teacher educators will agree that this WIL component is sometimes very insufficient in assisting the student teacher to develop their own footing and voice as a teacher. This is the 'gap' that this research book addresses. Most of the chapters in the book report empirical data, with the exception of two chapters that can be categorized as systematic reviews. WIL is addressed from various angles in the chapters. Chapter 6 focuses on research related to what makes Finnish teacher education so effective, and in Chapter 4 researchers of the University of Johannesburg disseminate their findings on establishing a teaching school (based on Finnish insights) in Johannesburg. Chapter 3 highlights the challenges faced in open- and distance learning teacher education contexts. Several of the chapters disseminate research findings on alternative interventions to classic WIL, namely, where "safe spaces" or laboratories are created for student teachers to learn and grow professionally. These could either be simulations, such as software programmes and avatars in the intervention described in Chapter 2; student excursions, as the findings in chapters 5, 7 and 10 portray; or alternative approaches to WIL (e.g. Chapters 11 and 12). The book is devoted to scholarship in the field of pre-service teacher education. The target audience is scholars working in the fields of pre-service teacher education, work-integrated learning, and self-directed learning. The book makes a unique contribution in terms of firstly its extensive use of Cultural-Historical Activity Theory as a research lens, and secondly in drawing on various theoretical

frameworks. Both quantitative and qualitative research informed the findings of the book.

Black Tax - Niq Mhlongo 2019-09-12

'The real significance of this book lies in the fact that it tells us more about the everyday life of black South Africans. It delves into the essence of black family life and the secret anguish of family members who often battle to cope.' – Niq Mhlongo A secret torment for some, a proud responsibility for others, 'black tax' is a daily reality for thousands of black South Africans. In this thought-provoking and moving anthology, a provocative range of voices share their deeply personal stories. With the majority of black South Africans still living in poverty today, many black middle-class households are connected to working-class or jobless homes. Some believe supporting family members is an undeniable part of African culture and question whether it should even be labelled as a kind of tax. Others point to the financial pressure it places on black students and professionals, who, as a consequence, struggle to build their own wealth. Many feel they are taking over what is essentially a government responsibility. The contributions also investigate the historical roots of black tax, the concept of the black family and the black middle class. In giving voice to so many different perspectives, **Black Tax** hopes to start a dialogue on this widespread social phenomenon.
