The Color of Money - Mehrsa Baradaran 2017-09-14

In 1863 black communities owned less than 1 percent of total U.S. wealth. Today that number has barely budged. Mehrsa Baradaran pursues this wealth gap by focusing on black banks. She challenges the myth that black banking is the solution to the racial wealth gap and argues that black communities can never accumulate wealth in a segregated economy.

**Your Call Is (Not That) Important to Us** - Emily Yellin 2009-03-24

Bring up the subject of customer service phone calls and the blood pressure of everyone within earshot rises exponentially. Otherwise calm, rational, and intelligent people go into extended rants about an industry that seems to grow more inhuman and unhelpful with every phone call we make. And Americans make more than 43 billion customer service calls each year. Whether it's the interminable hold times, the outsourced agents who can't speak English, or the multitude of buttons to press and automated voices to listen to before reaching someone with a measurable pulse -- who hasn't felt exasperated at the abuse, neglect, and wasted time we experience when all we want is help, and maybe a little human kindness? Your Call Is (Not That) Important to Us is journalist Emily Yellin's engaging, funny, and far-reaching exploration of the multibillion-dollar customer service industry and its surprising inner-workings. Yellin reveals the real human beings and often surreal corporate policies lurking behind its aggravating façade. After reading this first-ever investigation of the customer service world, you'll never view your call-center encounters in quite the same way. Since customer service has a role in just

about every industry on earth, Yellin travels the country and the world, meeting a wide range of customer service reps, corporate decision makers, industry watchers, and Internet-based consumer activists. She spends time at outsourced call centers for Office Depot in Argentina and Microsoft in Egypt. She gets to know the Mormon wives who answer JetBlue's customer service calls from their homes in Salt Lake City, and listens in on calls from around the globe at a FedEx customer service center in Memphis. She meets with the creators of the yearly Customer Rage Study, customer experience specialists at Credit Suisse in Zurich, the founder and CEO of FedEx, and the CEO of the rising Internet retailer Zappos.com. Yellin finds out which country complains about service the most (Sweden), interviews an actress who provides the voice for automated answering systems at many big corporations, and talks to the people who run a website (GetHuman.com that posts codes for bypassing automated voices and getting to an actual human being at more than five hundred major companies. Yellin weaves her vast reporting into an entertaining narrative that sheds light on the complex forces that create our infuriating experiences. She chronicles how the Internet and global competition are forcing businesses to take their customers' needs more seriously and offers hope from people inside and outside the globalized corporate world fighting to make customer service better for us all. *Your Call Is (Not That) Important to Us* cuts through corporate jargon and consumer distress to provide an eye-opening and animated account of the way companies treat their customers, how customers treat the people who serve them, and how technology, globalization, class, race, gender, and culture influence these interactions. Frustrated customers, smart executives, and dedicated customer service reps alike will find this lively examination of the crossroads of world commerce -- the point where businesses and their customers meet -- illuminating and essential.

55, Underemployed, and Faking Normal - Elizabeth White 2020-01-28

A practical plan for the millions of people in their fifties and sixties who find themselves out of work, unable to find a job, and financially incapable of retiring, Elizabeth White shows how to get past any blame or shame, overcome denial, and find a path to a new normal. Elizabeth White has an impressive resume, which includes advanced degrees from Harvard and Johns Hopkins and a distinguished employment history. She started a business that failed and then tried to reenter the work force in her mid-fifties, only to learn that there is little demand for workers her age. For a while Elizabeth lived in denial, but then had to adjust to her new reality, shedding the gym membership, getting a roommate, forgoing restaurant meals, and so on. She soon learned she wasn't alone: there are millions of Americans in her predicament and worse, exhausted from trying to survive and overcome every day. In *55, Underemployed, and Faking Normal*, Elizabeth invites you to look beyond your immediate circumstances to what is possible in the new normal of financial insecurity. You're in your fifties and sixties, and may have saved nothing or not nearly enough to

retire. It's too late for blame or shame—and it wouldn't help anyway. What you want to know is what you can do now to have a shot at a decent retirement. "This relevant and well-researched book will appeal not only to those 55 plus, but to the generation coming right behind them who may face similar issues" (Booklist, starred review). *55, Underemployed, and Faking Normal* is a must-have for anyone whose income has suddenly diminished or even disappeared. "Providing practical solutions with a focus on retirement and maximizing savings, White maintains authority with a realistic, empathetic tone throughout. This deeply useful work will resonate with aging readers of all income levels and situations" (Publishers Weekly). If you're ready to get serious about feeling good again, this book is for you.

### **The Templars** - Dan Jones 2017-09-19

"Dan Jones is an entertainer, but also a bona fide historian. Seldom does one find serious scholarship so easy to read." – The Times, Book of the Year A New York Times bestseller, this major new history of the knights Templar is "a fresh, muscular and compelling history of the ultimate military-religious crusading order, combining sensible scholarship with narrative swagger" – Simon Sebag Montefiore, author of *Jerusalem A faltering war in the middle east*. A band of elite warriors determined to fight to the death to protect Christianity's holiest sites. A global financial network unaccountable to any government. A sinister plot founded on a web of lies. Jerusalem 1119. A small group of knights seeking a purpose in the violent aftermath of the First Crusade decides to set up a new order. These are the first Knights Templar, a band of elite warriors prepared to give their lives to protect Christian

pilgrims to the Holy Land. Over the next two hundred years, the Templars would become the most powerful religious order of the medieval world. Their legend has inspired fervent speculation ever since. In this groundbreaking narrative history, Dan Jones tells the true story of the Templars for the first time in a generation, drawing on extensive original sources to build a gripping account of these Christian holy warriors whose heroism and alleged depravity have been shrouded in myth. The Templars were protected by the pope and sworn to strict vows of celibacy. They fought the forces of Islam in hand-to-hand combat on the sun-baked hills where Jesus lived and died, finding their nemesis in Saladin, who vowed to drive all Christians from the lands of Islam. Experts at channeling money across borders, they established the medieval world's largest and most innovative banking network and waged private wars against anyone who threatened their interests. Then, as they faced setbacks at the hands of the ruthless Mamluk sultan Baybars and were forced to retreat to their stronghold in Cyprus, a vindictive and cash-strapped King of France set his sights on their fortune. His administrators quietly mounted a damning case against the Templars, built on deliberate lies and false testimony. On Friday October 13, 1307, hundreds of brothers were arrested, imprisoned and tortured, and the order was disbanded amid lurid accusations of sexual misconduct and heresy. They were tried by the Pope in secret proceedings and their last master was brutally tortured and burned at the stake. But were they heretics or victims of a ruthlessly repressive state? Dan Jones goes back to the sources to bring their dramatic tale, so relevant to our own times, to life in a book that is at once authoritative and compulsively readable.

**Allegheny County's Hundred Years** - George Henry Thurston 1888

**Blockchain for Medical Research** - Sean T. Manion 2020-03-10  
It takes 17 years on average to bring new medical treatments

ideas into evidence-based clinical practice. The growing replicability crisis in science further delays these "new miracles." Blockchain can improve science and accelerate medical research while bringing a new layer of trust to healthcare. This book is about science, its value to medicine, and how we can use blockchain to improve the quality and impact of both. The book looks at science and medicine from an insider's perspective and describes the processes, successes, shortcomings and opportunities in an accessible way for a broad audience. It weaves this a non-technical look at the emerging world of blockchain technology; what it is, where it is useful, and how it can improve science and medicine. It lays out a roadmap for this application to transform how we develop knowledge about health and medicine to improve our lives. In the first part, Blockchain isn't Tech, the authors look at blockchain/distributed ledger technology along with critical trade-offs and current explorations of its utility. They give an overview of use cases for the technology across industries, including finance, manufacturing and healthcare, with interviews and insights from leaders across government, academia, and tech/health industry both big and start-up. In the second part, Science is Easy, the authors look at science as a process and how this drives advancement in medicine. They shed a light on some of science's shortcomings, including the reproducibility crisis and problems with misaligned incentives (i.e. publish or perish). They apply a breakdown of critical components to the functional steps in the scientific process and outline how the open science movement is looking to improve these, while highlighting the limit of these fixes with current technology, incentives and structure of science. In the third part, DAO of Science, the authors look at how blockchain applied to open science can impact medical research. They examine how this distributed approach can provide better quality science, value-based research and faster medical miracles. Finally, they provide a vision of the future of distributed medical research and give a roadmap of steps to get there.

**Subprime Consumer Lending** - Frank J. Fabozzi, CFA  
1999-11-15

The subprime lending market is growing rapidly due to the use of securitization and the attempts of lending institutions to boost their client pool. This book gives readers a working, up-to-date knowledge of subprime consumer lending. It provides a guide to the concept of credit risk as it relates to lending practices, risk-based and risk-adjusted pricing, credit scoring, collection methodology, credit card services, auto loans, several aspects of securitization of subprime assets, and recent developments in the United Kingdom.

Borrowed Time - James Freeman 2018-08-07

The disturbing, untold story of one of the largest financial institutions in the world, Citigroup—one of the "too big to fail" banks—from its founding in 1812 to its role in the 2008 financial crisis, and the many disasters in between. During the 2008 financial crisis, Citi was presented as the victim of events beyond its control—the larger financial panic, unforeseen economic disruptions, and a perfect storm of credit expansion, private greed, and public incompetence. To save the economy and keep the bank afloat, the government provided huge infusions of cash through multiple bailouts that frustrated and angered the American public. But, as financial experts James Freeman and Vern McKinley reveal, the 2008 crisis was just one of many disasters Citi has experienced since its founding more than two hundred years ago. In *Borrowed Time*, they reveal Citi's history of instability and government support. It's not a story that either Citi or Washington wants told. From its founding in 1812 and through much of its history the bank has been tied to the federal government—a relationship that has benefited both. Many of its initial stockholders had owned stock in the Bank of the United States, and its first president, Samuel Osgood, had been a member of the Continental Congress and America's first Postmaster General. From its earliest years, Citi took massive risks

that led to crisis. But thanks to private investors, including John Jacob Astor, they survived throughout the nineteenth century. In the twentieth century, Senator Carter Glass blamed Citi CEO "Sunshine Charlie" Mitchell for the 1929 stock market crash, and the bank was actually in violation of the senator's signature achievement, the Glass-Steagall law, in the late 1990s until then U.S. Treasury Secretary Robert Rubin engineered the law's repeal. Rubin later became the chairman of the executive committee of Citigroup, helping to oversee the bank as it ramped up its increasing mortgage risks before the 2008 crash. The scale of the financial panic of 2008 was not, as the media and experts claim, unprecedented. As Borrowed Time shows, disasters have been relatively frequent during the century of government-protected banking—especially at Citi.

Major Business Organizations of Eastern Europe and the Commonwealth of Independent States 1992-93 - G. C. Bricault
