Vusi - Vusi Thembekwayo
2018

"I have learned the truth about the world: that it isn't as round as a tennis ball, and it isn't shaped like itself. It is shaped the way we shape it, according to the way we see it, the way we mould it to our ambitions and our destiny. I know the colour of who I am. I am a black man, running for my life, for my freedom, for opportunity born from struggle, possibility born from sacrifice. And I am running too, for my father, who never became

what he hoped to be, and who never got to see what his children would one day become.

'Maverick. Leadership genius. Self-made millionaire. Dragon. The rock star of public speaking. Vusi Thembekwayo has been called many things. Join him in his inspiring journey from the township to the top echelons of South African business, to becoming one of youngest directors of a listed company and CEO of a boutique investment firm. As a 'Dragons' Den' judge and a sought-after public speaker across the globe, Vusi doesn't just talk business - he lives it. Now you can learn the secret of his success and how to shape your own destiny."--

The Naked Emperor -

The Fall of the
University of Cape Town
- David Benatar
2021-11-09

Destructive forces have
been eroding the
University of Cape Town,
Africa's leading
university. This book
tells the sad, true tale
of what has been
transpiring. It is a
saga of lunacy,
criminality, pandering,
and identity politics.
The mad and the bad -

the deranged, deluded,
the depraved - have been
granted endless latitude
in bullying and abusing
others. The decline
began in 2015 with the
Rhodes Must Fall protest
that resulted in the
offending statue's
removal within a month,
and which spawned
similar protests abroad.
Emboldened by their
local success, the
protestors issued new
and ever-increasing
demands later that year
and then again in 2016
and 2017. Their methods
also became criminal -
including intimidation,
assault, and arson. The
university leadership
capitulated to this
behaviour, and this
fostered a broader and
now pervasive toxic
environment within the
institution. These
developments offer
important lessons for
universities around the
world that are yielding
to the forces of a faux

"progressivism".

Academic Literacy

Development - Laura-

Mihaela Muresan

2021-03-11

This edited book brings together an international cast of contributors to examine how academic literacy is learned and mastered in different tertiary education settings around the world. Bringing to the fore the value of qualitative enquiry through ethnographic methods, the authors illustrate in-depth descriptions of genre knowledge and academic literacy development in first and second language writing. All of the data presented in the chapters are original, as well as innovative in the field in terms of content and scope, and thought-provoking regarding theoretical, methodological and educational approaches.

The contributions are also representative of both novice and advanced academic writing experiences, providing further insights into different stages of academic literacy development throughout the career-span of a researcher. Set against the backdrop of internationalisation trends in Higher Education and the pressure on multilingual academics to publish their research outcomes in English, this volume will be of use to academics and practitioners interested in the fields of Languages for Academic Purposes, Applied Linguistics, Literacy Skills, Genre Analysis and Acquisition and Language Education.

Leonardo Pisano

(Fibonacci) - L. E. Sigler 2014-06-28

The Book of Squares by Fibonacci is a gem in the mathematical literature and one of the most important mathematical treatises written in the Middle Ages. It is a collection of theorems on indeterminate analysis and equations of second degree which yield, among other results, a solution to a problem proposed by Master John of Palermo to Leonardo at the Court of Frederick II. The book was dedicated and

presented to the Emperor at Pisa in 1225. Dating back to the 13th century the book exhibits the early and continued fascination of men with our number system and the relationship among numbers with special properties such as prime numbers, squares, and odd numbers. The faithful translation into modern English and the commentary by the translator make this book accessible to professional mathematicians and amateurs who have always been intrigued by the lure of our number system.

a rich source of information on a range of language-related subjects. A prominent issue remains the changing of street and place names, including the Pretoria/Tshwane and Louis Trichardt/Makhado sagas. Language in education remains a thorny issue; as medium of instruction at school and tertiary level, and the proposal that passing an African language should be a requirement in order to obtain a tertiary degree in South Africa. In terms of language legislation, the draft version of the National Language Act was proposed. The language of record in courts also received attention in the media.

My Name Is Vaselinetjie

- Anoeschka Von Meck
2010-03-16

She is Helena Bosman, from a tiny little town lost in the vast expanses of the Northern Cape, but Grandpa and Grandma call her Vaselinetjie. She is their little angel from the veldt, the beginning and the end of their world. But when Vaselinetjie is ten years old, two officials from Welfare step in and she is sent away to a boarding school in Gauteng – the orphanage where Madiba™s reject children have to live. It™s a strange, hard, dangerous world of scum children, bad-tempered matrons and a harsh, unfair principal; a world of smoking cigarette butts, having one™s hair shaved off and making plans to run away. It™s a world where no one bothers about anyone else, where you too learn not to give a damn. But as the

there is one name that

**Cosmonauts do it in
Heaven** - Keith
Gottschalk 2020-11-30
Keith Gottschalk is one
of very few English
language poets after
Walt Whitman to compose
poems celebrating
engineers, inventions,
and scientists. With wit
and paradox, these poems
explore our solar
system, and celebrate
astronomers and
spaceflight. This
collection opens with an
imaginary trip through
time from Copernicus to

Einstein - those who
literally made space as
we conceptualise it
today. It closes with an
imaginary trip through
our solar system. In
between, we find moving
elegies to astronauts
who lost their lives,
and celebrations of a
glittering international
constellation of
engineers, inventors,
mathematicians, and
researchers. Irony,
allusions, double-
entendres, and
wonderment are always
looking over the
reader's shoulder. Many
of these poems, composed
over thirty-four years,
have already been
individually published
to acclaim in literary
and other magazines.
