The Cult of Smart - Fredrik

deBoer 2020-08-04

Named one of Vulture's Top 10 Best Books of 2020! Leftist firebrand Fredrik deBoer exposes the lie at the heart of our educational system and demands top-to-bottom reform. Everyone agrees that education is the key to creating a more just and equal world, and that our schools are broken and failing. Proposed reforms variously target incompetent teachers, corrupt union practices, or outdated curricula, but no one acknowledges a scientifically-proven fact that we all understand intuitively: Academic potential varies between individuals, and cannot be dramatically improved. In *The Cult of Smart*, educator and outspoken leftist Fredrik deBoer exposes this omission as the central flaw of our entire society, which has created and perpetuated an unjust class structure based on intellectual ability. Since cognitive talent varies from person to person, our education system can never create equal opportunity for

all. Instead, it teaches our children that hierarchy and competition are natural, and that human value should be based on intelligence. These ideas are counter to everything that the left believes, but until they acknowledge the existence of individual cognitive differences, progressives remain complicit in keeping the status quo in place. This passionate, voice-driven manifesto demands that we embrace a new goal for education: equality of outcomes. We must create a world that has a place for everyone, not just the academically talented. But we'll never achieve this dream until the Cult of Smart is destroyed.

Flooded - Allison Edwards
2021-04-08

A Brain-Based Guide to Help Children Regulate Emotions. When your brain perceives danger, your body and mind will go instantly into one of three modes-flight, fight, or freeze. Your heart races, your body tenses up, your hands shake, and your emotions take over rational thought. You've entered The Flood Zone. When children experience The Flood Zone, their behavior changes. They yell, bite, or run away. They withdraw and lose concentration. They blame and lie. In this state, children are unable to be rational, regulated, or otherwise compliant. Even the most motivated child (or adult) with the greatest coping strategies

won't be able to identify or manage their emotions in The Flood Zone. In *Flooded*, counselor and bestselling author, Allison Edwards explains how parents, teachers, and counselors can identify when children have entered The Flood Zone. She also offers suggestions for teaching children (and adults!) how to regain control of their emotions. In this book, you'll get: - An overview of how the brain interacts with emotions - Understanding of the role of trauma in emotional health - Explanation of why children can't respond rationally in stressful circumstances - Techniques for teaching children how to regulate emotions - Suggestions for setting up your classroom or office to improve emotional awareness - Strategies for improving interactions with children at school and home As educators, parents, and professionals, we need to teach children and teens how to identify their emotions, learn what triggers those feelings, and provide strategies to

The Leader in Me - Stephen R. Covey 2012-12-11

Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and

be a positive influence on the world around them? The Leader in Me is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical

skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.

It sheds light on ways of giving full-time employees the chance to take up learning opportunities which are of the same level and rigour as those on offer to the full time student. It approaches the subject from the perspective of the learner, drawing on case studies to provide detailed insight. It suggests that universities already have in place much of the machinery needed to support learners who are in work: they just don't make enough use of it. Look closely and you will find a substantial legacy of this kind of activity by universities. This is a book about seizing opportunities. Packed with similar examples from every industry, this complete innovation guide explains both foundational concepts and a detailed action plan developed by Wunker and his team. In *Jobs to Be Done*, the groundbreaking Jobs Roadmap takes you step-by-step through the innovation process and reveals how to: Gather valuable customer insights Turn those insights into new product ideas Test and iterate until you find original profitable solutions And much more! *Jobs to Be*
