Cultures of Collecting - Roger Cardinal
2004-09-02

This book traces the psychology, history and theory of the compulsion to collect, focusing not just on the normative collections of the Western canon, but also on collections that reflect a fascination with the "Other" and the marginal – the ephemeral, exotic, or just plain curious. There are essays on the Neoclassical architect Sir John Soane, Sigmund Freud and Kurt Schwitters, one of the masters of collage. Others examine imperialist encounters with remote cultures – the conquistadors in America in the sixteenth century, and the British in the

Pacific in the eighteenth – and the more recent collectors of popular culture, be they of Swatch watches, Elvis Presley memorabilia or of packaging and advertising. With essays by Jean Baudrillard, Thomas DaCosta Kaufmann, Nicholas Thomas, Mieke Bal, John Forrester, John Windsor, Naomi Schor, Susan Stewart, Anthony Alan Shelton, John Elsner, Roger Cardinal and an interview with Robert Opie.

Everybody believes they offer the best solution, but their positions are diametrically opposed... and Caroline has responsibility for determining the outcome.

With events accelerating and Caroline uncovering more of the truth, her conclusions begin to look startlingly unconventional - even to her. Rebecca Gilman's *Luna Gale* received its UK premiere at the Hampstead Theatre, London, in June 2015.

Hotel Juarez - Daniel Chacón 2012

In this collection of short and flash fiction, Daniel Chacón examines peoples' interactions with each other, the impact of identity and the importance of literature, art and music. In one story, a girl remembers her father, who taught her to love books and libraries. "A book can whisper at you, call at you from the shelves. Sometimes a book can find you. Seek you out and ask you to come and play," he told her. Years later, she finds herself pulling an assortment from the shelves, randomly reading passages from different books and entering into the landscapes as if each book were a

wormhole. Somehow one excerpt seems to be a continuation of another, connecting in the way that birds do when they fly from a tree to the roof of a house, making "an idea, a connection, a tree-house., Misconceptions about people, the responsibility of the artist and conflicts about identity pepper these stories that take place in the U.S. and abroad. In "Mais, Je Suis Chicano," a Mexican American living in Paris identifies himself as Chicano, rather than American. "It's not my fault I was born on the U.S. side of the border," he tells a French Moroccan woman when she discovers that he really is American, a word she says "as if it could be replaced with murderer or child molester." Many of the stories are very short and contain images that flash in the reader's mind, loop back and connect to earlier ones. Other stories are longer, like rooms, into which Chacón invites the reader to enter, look around and hang out. And some are

more traditional. But whether short or long, conventional or experimental, the people in these pieces confront issues of imagination and self. In "Sábado Gigante," a young boy who is "as big as a gorilla" must face his best friend's disappointment that in spite of his size he's a terrible athlete, and even more confounding, he prefers playing dolls to baseball. Whether in Paris or Ciudad Juárez, Chacón reveals his characters at their most vulnerable in these powerful and rewarding stories, anti-stories and loops.

Walkable City - Jeff Speck 2012-11-13

Jeff Speck has dedicated his career to determining what makes cities thrive. And he has boiled it down to one key factor: walkability. The very idea of a modern metropolis evokes visions of bustling sidewalks, vital mass transit, and a vibrant,

pedestrian-friendly urban core. But in the typical American city, the car is still king, and downtown is a place that's easy to drive to but often not worth arriving at. Making walkability happen is relatively easy and cheap; seeing exactly what needs to be done is the trick. In this essential new book, Speck reveals the invisible workings of the city, how simple decisions have cascading effects, and how we can all make the right choices for our communities. Bursting with sharp observations and real-world examples, giving key insight into what urban planners actually do and how places can and do change, Walkable City lays out a practical, necessary, and eminently achievable vision of how to make our normal American cities great again.

The Aesthetic of Play - Brian Upton

2021-02-02

A game designer considers the experience of play, why games have rules, and the

relationship of play and narrative. The impulse toward play is very ancient, not only pre-cultural but pre-human; zoologists have identified play behaviors in turtles and in chimpanzees. Games have existed since antiquity; 5,000-year-old board games have been recovered from Egyptian tombs. And yet we still lack a critical language for thinking about play. Game designers are better at answering small questions ("Why is this battle boring?") than big ones ("What does this game mean?"). In this book, the game designer Brian Upton analyzes the experience of play--how playful activities unfold from moment to moment and how the rules we adopt constrain that unfolding. Drawing on games that range from Monopoly to Dungeons & Dragons to Guitar Hero, Upton develops a framework for understanding play, introducing a set of critical tools that can help us analyze games and game designs and identify ways in

which they succeed or fail.

Hypnotize This! - Zali Segal 2004

Achtung-Panzer! - Heinz Guderian 1995

This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land

warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Adult Education, Museums and Art Galleries - Darlene E. Clover 2016-11-04

This is a book about adult education in the sphere of public museums and art galleries. It aims to enrich and expand dialogue and understanding amongst adult and community educators, curators, artists, directors, and cultural activists who work within and beyond the walls of these

institutions. The various chapters take up the complex and interconnected pedagogics of subjectivity, identity, meaning making and interpretation, knowledge, authority, prescription, innovation, and creativity. The contributors are a combination of scholars, professors, graduate students, heritage and cultural adult educators, artists, curators and researchers from Canada, United States, Iceland, England, Scotland, Denmark, Portugal, Italy and Malta. Collectively, they challenge us to think about the dialectics of passivity and engagement, didactics and learning, gender neutrality and radicality, and neutrality and risk-taking amongst a collage of artworks and artefacts, poetry and installations, collections and exhibits, illusion and reality, curatorial practice and learning, argument and narrative, and struggle and possibility that define and shape modern day art and culture institutions. The chapters, set

amongst the discursive politics of neoliberalism and patriarchy, racism and religious intolerance, institutional neutrality and tradition, capitalism and neo-colonialism, ecological devastation and social injustice, take up the spirit and ideals of the radical and feminist traditions of adult education and their emphases on cultural participation and knowledge democracy, agency and empowerment, justice and equity, intellectual growth and transformation, critical social and self reflection, activism and risk-taking, and a fundamental belief in the power of art, dialogue, reflection, ideological and social critique and imaginative learning.

Extraterrestrial Visitations from Prehistoric Times to the Present - Jacques Bergier 1973

Fashion and Art - Adam Geczy 2013-08-15
For at least two centuries, fashion and art have maintained a competitive love-hate

relationship. Both fashion and art construct imaginary worlds, and use a language of style to invigorate beliefs, perceptions and ideas. Until now the crossovers of fashion and art have received only scattered treatment and suffered from a dearth of theorization. As an attempt to theorize the area, this collection of new and updated essays is the most well-rounded and authoritative to date. Some of the world's foremost scholars in the field are assembled here to explore the art-fashion nexus in numerous ways: from aesthetics and performance to masquerade and media. Original and inspiring, this book will not only secure 'art-fashion' as a discrete area of study, but also suggest new critical pathways for exploring their continuing cross-pollination. Fashion and Art is essential reading for students and scholars of fashion, art history and theory, cultural studies and related fields.

[So Good They Can't Ignore You](#) - Cal Newport 2012-09-18

In an unorthodox approach, Georgetown University professor Cal Newport debunks the long-held belief that "follow your passion" is good advice, and sets out on a

quest to discover the reality of how people end up loving their careers. Not only are pre-existing passions rare and have little to do with how most people end up loving their work, but a focus on passion over skill can be dangerous, leading to anxiety and chronic job hopping. Spending time with organic farmers, venture capitalists, screenwriters, freelance computer programmers, and others who admitted to deriving great satisfaction from their work, Newport uncovers the strategies they used and the pitfalls they avoided in developing their compelling careers. Cal reveals that matching your job to a pre-existing passion does not matter. Passion comes after you put in the hard work to become excellent at something valuable, not before. In other words, what you do for a living is much less important than how you do it. With a title taken from the comedian Steve Martin, who once said his advice for aspiring

entertainers was to "be so good they can't ignore you," Cal Newport's clearly written manifesto is mandatory reading for anyone fretting about what to do with their life, or frustrated by their current job situation and eager to find a fresh new way to take control of their livelihood. He provides an evidence-based blueprint for creating work you love, and will change the way you think about careers, happiness, and the crafting of a remarkable life.

[The Routledge International Handbook of Race, Culture and Mental Health](#) - Roy Moodley 2020-10-28

This handbook presents a thorough examination of the intricate interplay of race, ethnicity, and culture in mental health – historical origins, subsequent transformations, and the discourses generated from past and present mental health and wellness practices. The text demonstrates how socio-cultural identities including race, gender, class, sexual orientation, disability, religion, and age intersect with clinical work in a range of settings. Case vignettes and recommendations for best practice help ground each in a clinical focus, guiding practitioners and educators to actively increase their understanding of non-Western and indigenous healing techniques, as well

as their awareness of contemporary mental health theories as a product of Western culture with a particular historical and cultural perspective. The international contributors also discuss ways in which global mental health practices transcend racial, cultural, ethnic, linguistic, and political boundaries. The Routledge International Handbook of Race, Culture and Mental Health is an essential resource for students, researchers, and professionals alike as it addresses the complexity of mental health issues from a critical, global

perspective.
