Pat A. Tamakloe Ph.D. 2021-04-27

260 Provocative Organizational Leadership Questions Answered! In this book,

Dr. PAT presents a weekly experiential guide for executive leaders to raise their leadership-awareness by employing the power of consistency over time to help them achieve success. "He who knows others is wise; he who knows himself is enlightened," said Lao Tzu, a Chinese philosopher. It is this profound quote that 52 Essential Qualities and Attributes of an Organizational Leader: How to transform your leadership habits in 52 weeks sheds light on to enhance self-awareness of practical intrinsic leadership characteristics vital to a leader's performance and operational success. This book identifies leadership qualities and attributes (Q&As) and aligns them into 5 categories: 1. Command – Power Access 2. Follower Engagement – "Street" Credibility 3. Personal Growth – Experiential Confidence 4. Professional Dominance – Mission Effectiveness 5. Operational Leadership – Vision Attainment Pat lays out a practical method for a leader to intentionally think through and answer weekly provocative questions asked in a Why, Who, When, Where, and, What format. The leader then hones fundamental leadership Q&As within their circle of influence to determine "How" to effectively achieve desired success. By applying the compounding value of consistency over time through self-assessment, the leader develops strengthened leadership habits and "muscle" memory that lead to successful attainment of visionary

excellence in operational leadership.

**An Unbroken Educational Apartheid Legacy** - David E. Morgan Ph.D.  
2015-03-17

This is a thought-provoking book on the black-white academic achievement gap in Chicago's predominantly black communities of color and what highly effective school boards can do to change it. In this book, the reader will be powerfully enlightened by a civil and human rights debate that calls for effective leadership in our schools, beginning with effective school boards. The primary agenda of effective school boards is raising student achievement performance levels and engaging the school district community to attain that goal. These instructive analyses of effective school board leadership builds on the research and wisdom of great leaders. Simultaneously, it develops a breath of fresh air for school reformers who seek to implement a new model and escape the insanity and pathology inherent in school board dysfunctions and violations of our civil and human rights which prevents progress in Chicago's south suburban communities of color. In both highs and lows of awesome moments, as educational reform leaders and school board members, we are in a strategic leadership position to help school boards carry out their essential responsibilities for creating equity and excellence in public education. In doing so, highly effective school leaders can team with our school board

leaders to lead our school district communities in preparing all students to succeed in a rapidly changing global society. School board members doing the same things over and over again and then expecting different results in academic outcomes is the definition for insanity. Education is freedom. In an era of mass educational apartheid with its consequent mass incarceration of blacks that has surpassed the enforced chattel bondage of slavery's peak numbers in 1860, this book addresses a subject that is critically essential, timely, and in need of immediate attention for the security, success, and ultimate survival of black America. As the problems of the academic under-achievement gap is addressed in this book, it is also essential that school boards, educators, and community and national leaders accept reality, to view the problem in its true perspective, to contemplate it as it is, in providing essential solutions toward removing limiting and limited school boards' dysfunctions, obstructions, and other barriers to academic achievement in effective school board leadership. Supporting educational excellence will thereby produce more African American scholars in mathematics, science, and in many other disciplines. This book will provide information and focus on some key action areas that successful school boards in America and around the world have focused their attention on: Vision, Standards, Assessment, Resource Alignment, Climate, Collaboration, and Continuous Academic Improvement.

Those that “get it,” will recognize and take advantage of the resources they have.

*Know Can Do!* - Ken Blanchard 2007-10-02

Attempting to better themselves—learn new skills, break bad habits, realize their potential—people read books, attend seminars, take training courses. And companies pitch in too, spending billions of dollars every year on professional development programs aimed at helping their employees become more effective. But in spite of what people sincerely believe are their best efforts, all too often their behavior doesn't change. The fact that it seems to be so hard to make new learning stick is an endless source of frustration for both individuals and organizations. For years Ken Blanchard has been troubled by the gap between what people know—all the good advice they've digested intellectually—and what they actually do. In this new book he and his coauthors, Paul J. Meyer and Dick Ruhe, use the fable format Blanchard made famous to lay out a straightforward method for learning more, learning better, and making sure you actually use what you learn. This engaging story

identifies three key reasons people don't make the leap from knowing to doing and then moves on to the solution. It teaches you how to avoid information overload by learning "less more, not more less." You'll find out how to adjust your brain's filtering system to learn many, many times more than ever before, ignite your creativity and resourcefulness with Green Light Thinking, master what you've learned using spaced repetition, and more. At last, an answer to the question, "Why don't I do what I know I should do?" Read this book and you will!

**Completing the Circle** - Michael Laitman, Ph.D 2015-06-23

"We have a collective responsibility—to bring about a more stable and more prosperous world" (Christine Lagarde, Managing Director of the International Monetary Fund). It wouldn't make headline news if a scientist declared that in today's world, we are all connected and dependent on each other. But it would become a main feature if a scientist said there is a proven way we can not only benefit from our connectedness, but actually enjoy it. Completing the Circle: an empirically proven method for finding peace and harmony in life, presents precisely that. Over a period of four years, the Connection-Circle and Round-Table discussion formats have proven themselves as successful methods for resolving seemingly unsolvable conflicts, reassembling shattered

relationships, and bringing together alienated families. These discussions have been taking place in the US, Europe, and Israel, all with resounding success. Now, for the first time, Dr. Laitman has written down the knowledge base of his successful method, and added easy-to-implement sample circles. As we try out these innovative circles, we will discover new depths in our connections with each other, and fresh ideas for managing our lives more peacefully and harmoniously both for ourselves and our loved ones.

*Army of the Potomac* - Russel H. Beatie 2007-05-14

The third volume of this masterful Civil War history series covers the pivotal early months of General George McClellan's Peninsula Campaign. As he did in his first two volumes of this magisterial series, Russel Beatie tells the story largely through the eyes and from the perspective of high-ranking officers, staff officers, and politicians. This study is based upon extensive firsthand research (including many previously unused and unpublished sources) that rewrites the history of Little Mac's inaugural effort to push his way up the peninsula and capture Richmond in one bold campaign. In meticulous fashion, Beatie examines many heretofore unknown, ignored, or misunderstood facts and events and uses them to evaluate the campaign in the most balanced historical context to date. Every aspect of these critically important weeks is examined, from how McClellan's Urbanna plan unraveled and led to the birth of the expedition that debarked at Fort Monroe in March 1862, to the aftermath of Williamsburg. To capture the full flavor of their experiences, Beatie employs the "fog of war" technique, which puts the reader in the position of the men who led the Union army. The Confederate adversaries are always present but often only in shadowy forms that achieve firm reality only when we meet them face-to-face on the battlefield. Well written, judiciously reasoned, and extensively footnoted, McClellan's First Campaign will be heralded as the seminal work on this topic. Civil War readers may not always agree with Beatie's conclusions, but they will concur that his account

offers an original examination of the Army of the Potomac's role on the Virginia peninsula. "If you want to understand the war in the east, this series is essential." —Civil War Books and Authors
