Art and Anarchy - Edgar Wind 1985

Will works of the imagination ever regain the power they once had to challenge and mould society and the individual? This was the question posed by Edgar Wind's influential Reith Lectures delivered in 1960 and later expanded into his book *Art and Anarchy*. The book examines the various forces that have fashioned the modern view of the art, from mechanization and fear of intellect to connoisseurship and--perhaps the fundamental weakness of our age--the dispassionate acceptance of art. In the course of his discussion, Wind surveyed a wide range of topics in the history of painting, literature, music, and the plastic arts from the Renaissance to modern times.

African Masters - Eberhard Fischer 2014

West Africa has a rich and long artistic tradition. In particular, Ivory Coast is home to a vast number of sculptors, some of which have created work that bears comparison with masters of European art, such as Michelangelo or Picasso. Yet the view still prevails that no aesthetic principles can be found in traditional African art, nor that independent artistic personalities have ever emerged from this tradition. Only "tribal workshops" with anonymous artist are identified. *African Masters* proves this simplistic and patronizing verdict wrong. Essays by renowned scholars investigate the role of the artists in traditional, and modern, society, their ideal of beauty and its transformation into works of art. The book also offers the first comprehensive overview of the most significant sculptors from Ivory Coast and its neighboring countries. It discusses the oeuvre of ancient masters from the people of Guro, Senufo, Dan, Baule, Lobi, and from the lagoons and puts them in context with local contemporary art. *African Masters* features around 200 masterpieces from private and public collections, including that of Museum Rietberg Zürich, all in full color and many of full-page plates. Exhibitions planned: Amsterdam, Nieuwe Kerk: 25 October 2014 to 15 February 2015 Paris, Musée du Quay Branly: 7 April to 26 July 2015

Approaches to Measuring Linguistic Differences - Lars Borin 2013-10-14

The present volume collects contributions addressing different aspects of the measurement of linguistic differences, a topic which probably is as old as language itself but at the same time has acquired renewed interest over the last decade or so, reflecting a rapid development of data-intensive computing in all fields of research, including linguistics.

Greenback Era - Irwin Unger 2015-12-08

The Greenback Era is not a financial history; rather, it is an attempt to locate the source of political power in the crucial Reconstruction years through a socio-economic study of American financial conflict during the years 1865 to 1879. Originally published in 1964. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Reflections on the Just - Paul Ricoeur 2007-06-15

At the time of his death in 2005, French philosopher Paul Ricoeur was regarded as one of the great thinkers of his generation. In more than half a century of writing about the essential questions of human life, Ricoeur's thought encompassed a vast range of wisdom and experience, and he made landmark contributions that would go on to influence later scholars in such areas as phenomenology, hermeneutics, structuralism, and theology. Toward the end of his life, Ricoeur began to focus directly on ethical questions that he feared had been overshadowed by his other work; the result was a two-volume collection of essays on justice and the law. The University of Chicago Press published the English translation of the first volume, *The Just*, to great acclaim in 2000. Now this translation of the second volume, *Reflections on the Just*, completes the set and

makes available to readers the whole of Ricoeur's meditations on the concept. Consisting of fifteen thematically organized essays, *Reflections on the Just* continues and expands on the work Ricoeur began in with his "little ethics" in *Oneself as Another* and *The Just*. In the preface, he considers what revisions he would make were he to start over and how that is reflected in these essays. The opening part brings phenomenology to bear on ethics; the second group of essays comprises shorter, occasional pieces considering the concept of justice in the works of other philosophers, including Max Weber and Charles Taylor. The final part turns to the specific domains of medicine and the law, examining how concepts of right and justice operate in those realms. Cogent, deeply considered, and fully engaged with the realities of the contemporary world, *Reflections on the Just* is an essential work for understanding the development of Ricoeur's thought in his final years.

Self-Portrait in a Convex Mirror - John Ashbery
1990-01-01

John Ashbery's most renowned collection of poetry -- Winner of The Pulitzer Prize, the National Book Award, and the National Book Critics Circle Award First released in 1975, *Self-Portrait in a Convex Mirror* is today regarded as one of the most important collections of poetry published in the last fifty years. Not only in the title poem, which the critic John Russell called "one of the finest long poems of our period," but throughout the entire volume, Ashbery reaffirms the poetic power that made him an outstanding figure in contemporary literature. These are poems "of breathtaking freshness and adventure in which dazzling orchestrations of language open up whole areas of consciousness no other American poet as ever begun to explore" (The New York Times).

Photoacoustic Tomography (PAT) - Xueding Wang 2021-02-17

Photoacoustic (or optoacoustic) imaging, including photoacoustic tomography (PAT) and photoacoustic microscopy (PAM), is an emerging imaging modality with great clinical potential. PAI's deep tissue penetration and fine spatial resolution also hold great promise for visualizing physiology and pathology at the molecular level. PAI combines optical contrast with ultrasonic

resolution, and is capable of imaging at depths of up to 7 cm with a real-time scalable spatial resolution of 10 to 500 μm . PAI has demonstrated applications in brain imaging and cancer imaging, such as breast cancer, prostate cancer, ovarian cancer etc. This Special Issue focuses on the novel technological developments and pre-clinical and clinical biomedical applications of PAI. Topics include but are not limited to: brain imaging; cancer imaging; image reconstruction; quantitative imaging; light source and delivery for PAI; photoacoustic detectors; nanoparticles designed for PAI; photoacoustic molecular imaging; photoacoustic spectroscopy.

Kaapse Patriotte - C. Beyers 1967

Achtung-Panzer! - Heinz Guderian 1995

This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward

the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Mixing Ovaries and Rosaries - Marloes Marringje Schoonheim 2005

Every child is a gift of Our Good Lord , a Catholic mother of thirteen remembers being told in the nineteen fifties. She responded: Well, I would like Him to give His gifts to the neighbors! . During the twentieth century in Europe as well as in the USA, Catholics were

relatively slow in adopting family planning. How did the specific Catholic reproductive behavior come about? This book aims at disclosing the mechanism behind the influence of religion on Catholic fertility behavior between 1870 and 1970. Schoonheim studies the relationship between faith and fertility on different levels of Dutch society. She explains the way religion, from the late nineteenth century onwards, came to constitute a nationwide social structure.
