**Medicines For Women** - Mira Harrison-Woolrych 2015-01-28

In this definitive new text, the major medicines, devices and vaccines used by women worldwide are brought together for the first time in a single volume. Written and edited by international experts with an evidence-based approach, the book offers a comprehensive summary of all the key areas of women's medicines. In the first part, issues relating to female drug exposure and considerations for prescribing for subgroups of women - for example during pregnancy and lactation - are presented in the context of contemporary clinical practice. In the second part, specific groups of pharmaceutical products are reviewed, including oral contraceptives, emergency contraception, treatment of chronic pelvic pain, hormone replacement therapy, bisphosphonates, herbal medicines for women, contraceptive devices and human papilloma virus (HPV)

vaccines. Every chapter reviews and summarises the efficacy and safety of each group of products and concludes with a useful set of clinical take home messages. In the third part, broader perspectives are presented - from a primary care overview of prescribing for women, through to regulatory, political and religious aspects, including issues with women's medicines in developing countries. The final two chapters focus on risk communication and conclude that women themselves should be placed at the centre of all discussions about their medicines. The book is aimed at prescribers, other healthcare professionals and students in the field of women's health throughout the world. It is an extremely valuable resource for all in clinical practice, for students of medicine, nursing, pharmacy and related sciences, and also for those in medicines regulation, pharmacovigilance and the pharmaceutical industry.

**Changing Subjects, Moving Objects** - Constanța Vintilă-Ghițulescu 2022

This is a book about people caught between home and abroad, crossing imperial boundaries in southeastern

Europe at the beginning of the modern age. Through a series of life stories, which the author reconstructs with the aid of many new sources, readers discover how certain men and women defined and adapted their loyalties and affiliations, how they fashioned their identities, how they enrolled their linguistic, political, economic, and social resources to build a family and a career. Travelling between Istanbul, Vienna, Trieste, Moscow, Bucharest, or Iasi, individuals of different backgrounds built their networks across borders, linking people and objects and facilitating cultural transfer and material and social change.

**The Sociology of Work** - Stephen Edgell 2019-10-28

'Definitive, critical and engaging, this is a superb introduction to the sociology of work.' Leo McCann, Professor of Management, University of York Now in a fully updated third edition, *The Sociology of Work* draws on the work of classic and contemporary theorists, to provide readers with a thorough exploration of all aspects of work and employment, including paid and unpaid work, standard and non-standard employment, and unemployment. The new edition includes: Two new chapters on "Work, Skill and the Labour Process" and "Managing Culture at Work". Expanded coverage of the rise and decline of trade unions; emotional labour, misbehaviour, and resistance at work. Further discussion of the gig economy and precarious work; automation and the end of work; globalization and human rights. For Sociology and Business students, taking modules in work, employment and society.

*The Legal Concept of Work* - Zoe Adams 2022-10-17

"Why do we think about some practices as work, and not others? Why do we classify certain capacities as economically valuable skills, and others as innate characteristics? What, moreover, is the role of law in shaping our answers to these questions?" These are just some of the queries explored by Zoe Adams's analysis of the legal construction, and regulation, of work. Spanning from the 14th century to the present day, *The Legal Concept of Work* explores how the role of law and

legal concepts comes to consider some forms of human labour as work, and some forms of human labour as non-work. It examines why perceptions of these activities can change over time, and how legal constitution impacts the way in which work comes to be regulated, organised, and valued. As part of the analysis, the book presents a series of case studies, ranging from the publishing industry, academia, medicine, and retail, with a view of illustrating some of the regulatory challenges different types of work face, in the context of capitalism.

**Modern Motherhood and Women's Dual Identities** - Petra Bueskens 2018-05-28

Why do women in contemporary western societies experience contradiction between their autonomous and maternal selves? What are the origins of this contradiction and the associated 'double shift' that result in widespread calls to either 'lean in' or 'opt out'? How are some mothers subverting these contradictions and finding meaningful ways of reconciling their autonomous and maternal selves? In *Modern Motherhood and Women's Dual Identities*, Petra Bueskens argues that western modernisation consigned women to the home and released them from it in historically unprecedented, yet interconnected, ways. Her ground-breaking formulation is that western women are free as 'individuals' and constrained as mothers, with the twist that it is the former that produces the latter. Bueskens' theoretical contribution consists of the identification and analysis of modern women's duality, drawing on political philosophy, feminist theory and sociology tracking the changing nature of discourses of women, freedom and motherhood across three centuries. While the current literature points to the pervasiveness of contradiction and double-shifts for mothers, very little attention has been paid to how (some) women are subverting contradiction and 'rewriting the sexual contract'. Bridging this gap, Bueskens' interviews ten 'revolving mothers' to reveal how periodic absence, exceeding the standard work-day, disrupts the default position assigned to mothers in the

home, and in turn disrupts the gendered dynamics of household work. A provocative and original work, *Modern Motherhood and Women's Dual Identities* will appeal to graduate students and researchers interested in fields such as Women and Gender Studies, Sociology of Motherhood and Social and Political Theory.

**The Cambridge Economic History of Modern Britain: Volume 1, Industrialisation, 1700-1870** - Roderick Floud

2014-10-09

A new edition of the leading textbook on the economic history of Britain since industrialization. Combining the expertise of more than thirty leading historians and economists, Volume 1 tracks Britain's economic history in the period ranging from 1700 to 1870 from industrialisation to global trade and empire. Each chapter provides a clear guide to the major controversies in the field and students are shown how to connect historical evidence with economic theory and apply quantitative methods. New approaches are proposed to classic issues such as the causes and consequences of industrialisation, the role of institutions and the state, and the transition from an organic to an inorganic economy, as well as introducing new issues such as globalisation, convergence and divergence, the role of science, technology and invention, and the growth of consumerism. Throughout the volume, British experience is set within an international context and its performance benchmarked against its global

competitors.

Factory Girls - Paul Chrystal 2022-11-30

Ever since there have been factories women and children have, more often than not, worked in those factories. What is perhaps less well known is that women also worked underground in coal mines and overground scaling the inside of chimneys. Young children were also put to work in factories and coalmines; they were deployed inside chimneys, often half-starved so that they could shin up ever narrower flues. This book charts the unhappy but aspirational story of women and children at work through the Industrial Revolution to the beginning of the 20th century. Without women there would have been no pre-industrial cottage industries, without women the Industrial Revolution would not have been nearly as industrial and nowhere near as revolutionary. Many women, and children, were obliged to take up work in the mills and factories ☐ long hours, dangerous, often toxic conditions, monotony, bullying, abuse and miserly pay were the usual hallmarks of a day☐s work - before they headed homeward to their other job: keeping home and family together. This long overdue and much needed book also covers the social reformers, the role of feminism and activism and the various Factory Acts and trade unionism. We examine how women and children suffered chronic occupational diseases and disabling industrial injuries - life changing and life shortening ☐ and often a one way ticket to the workhouse. The book concludes with a survey of the art, literature and the music which formed the soundtrack for the factory girl and the climbing boys.

A History of Women's Lives in Oxford - Nell Darby  
2021-08-30

Underneath the dreaming spires of Oxford's world-famous university, generations of women have lived their lives, fighting for the right to study there, and for a role within the city's educational, political and social spheres. Although a few of these women's names have been recorded for posterity, they have been largely because of their association with worthy or famous men; in this

book, though, their own lives are detailed, along with those who have been largely omitted from history. Women's lives have always been less recorded than those of men; where a woman helped her husband with his business, this help may not have been formally recorded in the census returns, and the details of jobs recorded there might not reflect the full scale of women's work and responsibilities. So here, learn about the variety of work women undertook; their education, their social lives, and their attempts to carve out a valuable role for themselves. Learn too of the problems they faced in living their lives: poverty, prison, suicide, or even murder. This is no pretty picture of Oxford life designed for tourist brochures; instead, it aims to take a snapshot of the varied experiences of the city's female population over the course of a century.

*Hoosiers and the American Story* - Madison, James H. 2014-10-01

A supplemental textbook for middle and high school students, *Hoosiers and the American Story* provides intimate views of individuals and places in Indiana set within themes from American history. During the frontier days when Americans battled with and exiled native peoples from the East, Indiana was on the leading edge of America's westward expansion. As waves of immigrants swept across the Appalachians and eastern waterways, Indiana became established as both a crossroads and as a vital part of Middle America. Indiana's stories illuminate the history of American agriculture, wars, industrialization, ethnic conflicts, technological improvements, political battles, transportation networks, economic shifts, social welfare initiatives, and more. In so doing, they elucidate large national issues so that students can relate personally to the ideas and events that comprise American history. At the same time, the stories shed light on what it means to be a Hoosier, today and in the past.

**The Emerald Handbook of Feminism, Criminology and Social Change** - Sandra Walklate 2020-07-02

Comprehensive and current, this handbook combines a wide

range of international contributors to chart the uneasy relationship between feminism, criminology and victimology. It explores both the historical and contemporary questions posed by feminist work and is essential reading for anyone interested in feminism, criminology and social change.

World Social Report 2020 - Department of Economic and Social Affairs 2020-02-14

This report examines the links between inequality and other major global trends (or megatrends), with a focus on technological change, climate change, urbanization and international migration. The analysis pays particular attention to poverty and labour market trends, as they mediate the distributional impacts of the major trends selected. It also provides policy recommendations to manage these megatrends in an equitable manner and considers the policy implications, so as to reduce inequalities and support their implementation.

Women's Voices in Tudor Wills, 1485-1603 - Susan E. James 2016-03-09

Contributing an original dimension to the significant body of published scholarship on women in 16th-century England, this study examines the largest corpus of women's private writings available to historians: their wills. In these, female voices speak out, commenting on their daily lives, on identity, gender, status, familial relationships and social engagement. Wills show women to have been active participants in a civil society, well aware of their personal authority and potential influence, whose committed actions during life and charitable strategies after death could and did impact the health of that society. From an intensive analysis of more than 1200 wills, this pioneering work focuses on women from all parts of the country and all strata of society, revealing an entire population of articulate, opportunistic, and capable individuals who found the spaces between the lines of the law and used those spaces to achieve personal goals. Author Susan James demonstrates how wills describe strategies for end-of-

life care, create platforms of remembrance, and offer insights into the myriad occupational endeavors in which women were engaged. James illuminates how these documents were not simply instruments of bequest and inheritance, but were statements of power and control, catalogues of material culture from which we are able to gauge a woman's understanding of her own reality and the context that formed her environment. Wills were tools and the way in which women wielded these tools offers new ways to look at England in the 16th century and reveals the seminal role women played in its development.

**The Complete Idiot's Guide to European History, 2nd Edition** - Nathan Barber 2011-10-04

*Catastrophe, Gender and Urban Experience, 1648-1920* - Deborah Simonton 2016-10-04

As Enlightenment notions of predictability, progress and the sense that humans could control and shape their environments informed European thought, catastrophes shook many towns to the core, challenging the new world view with dramatic impact. This book concentrates on a period marked by passage from a society of scarcity to one of expenditure and accumulation, from ranks and orders to greater social mobility, from traditional village life to new bourgeois and even individualistic urbanism. The volume employs a broad definition of catastrophe, as it examines how urban communities conceived, adapted to, and were transformed by catastrophes, both natural and human-made. Competing views of gender figure in the telling and retelling of these analyses: women as scapegoats, as vulnerable, as victims, even as cannibals or conversely as defenders, organizers of assistance, inspirers of men; and men in varied guises as protectors, governors and police, heroes, leaders, negotiators and honorable men. Gender is also deployed linguistically to feminize activities or even countries. Inevitably, however, these tragedies

are mediated by myth and memory. They are not neutral events whose retelling is a simple narrative. Through a varied array of urban catastrophes, this book is a nuanced account that physically and metaphorically maps men and women into the urban landscape and the worlds of catastrophe.

**Laura Bassi and Science in 18th Century Europe** - Monique Frize 2013-07-08

This book presents the extraordinary story of a Bolognese woman of the settecento. Laura Maria Caterina Bassi (1711-1778) defended 49 Theses at the University of Bologna on April 17, 1732 and was awarded a doctoral degree on May 12 of the same year. Three weeks before her defense, she was made a member of the Academy of Sciences in Bologna. On June 27 she defended 12 additional Theses. Several of the 61 Theses were on physics and other science topics. Laura was drawn by the philosophy of Newton at a time when most scientists in Europe were still focused on Descartes and Galen. This last set of Theses was to encourage the University of Bologna to provide a lectureship to Laura, which they did on October 29, 1732. Although quite famous in her day, Laura Bassi is unfortunately not remembered much today. This book presents Bassi within the context of the century when she lived and worked, an era where no women could attend university anywhere in the world, and even less become a professor or a member of an academy. Laura was appointed to the Chair of experimental physics in 1776 until her death. Her story is an amazing one. Laura was a mother, a wife and a good scientist for over 30 years. She made the transition from the old science to the new very early on in her career. Her work was centered on real problems that the City of Bologna needed to solve. It was an exciting time of discovery and she was at the edge of it all the way.

*Early Modern Europe, 1450-1789* - Merry E. Wiesner-Hanks 2022-08-25

Thoroughly updated edition of a best-selling, acclaimed book, placing early modern European history in a global and environmental context.

*Black Lives in the English Archives, 1500-1677* - Imtiaz Habib 2017-05-15

Containing an urgently needed archival database of historical evidence, this volume includes both a consolidated presentation of the documentary records of black people in Tudor and Stuart England, and an interpretive narrative that confirms and significantly extends the insights of current theoretical excursus on race in early modern England. Here for the first time Imtiaz Habib collects the scattered references to black people—whether from Africa, India or America—in sixteenth- and seventeenth-century England, and arranges them into a systematic, chronological descriptive index. He offers an extended historical and theoretical interpretation of the records in six chapters, which serve as an introductory guide to the index even as they articulate a specific argument about the meaning of the records. Both the archival information and interpretive scholarship provide a strong framework from which future historical debates on race in early modern England can proceed.

Caught in the Current - Sam Reimer 2023-04-15

Evangelical Christianity is known for its defence of traditional Christian teachings and resistance to liberalizing trends. Many Western evangelicals themselves do not yet realize how their faith is being reshaped by the modern zeitgeist. *Caught in the Current* explores how and why Western evangelicals are changing. Church attendance is declining, conservative moral positions are unpopular, and young people are drifting away from the faith. Evangelism is avoided, so few are joining congregations. Yet these surface changes are only symptoms of a more profound shift that church leaders have not fully apprehended. Drawing upon 125 interviews with British and Canadian clergy and active laity, Sam Reimer argues that evangelicals have been deeply influenced by a post-Christian culture that has rejected institutional religious authority and embraced self-spirituality. As individual evangelicals struggle to navigate these waters, and to distance themselves

from politicized evangelicalism in the United States, they are caught between conformity and resistance, between faithfulness to church moral teachings and accommodation of secular values. Many are responding by turning inward to define their Christian beliefs for themselves. The ironic result is that the decline of institutional religious authority is not happening just in Western culture, but within evangelical churches as well. *Caught in the Current* is an insightful and nuanced assessment of how British and Canadian evangelicals are navigating a post-Christian culture, often in ways that are distinct from how their counterparts in the United States approach it.

**Women in Policing around the World** - Venessa Garcia 2021-03-25

*Women in Policing around the World* is a historical, legal, political, and social examination of women in policing. The book opens with a comparison of cultural definitions of gender and how this affects women's work in general and policing specifically. The book then takes the reader through women in policing in the Eastern and Western Hemispheres, featuring several countries within the major regions of the world. Major commonalities and differences are identified in the areas of recruitment, training, deployment, promotion, and violence against women. Among the key features of this book is a balanced coverage of historical and timely events that led to the current status of women police in their respective countries. The book identifies the commonalities that women police experience throughout the world, relying on the most current research. The book also dedicates coverage of policing violence against women in society as well as within the police organization itself. The author includes tables to allow for national comparisons throughout the book, as well as current and historical photos. This book is intended for researchers and students of police culture and women in policing. It does not rely heavily on one country or region, thus allowing for an enlightening international comparison.

*The Routledge History of Women in Europe Since 1700* - Deborah Simonton 2006-04-27

The Routledge History of Women in Europe since 1700 is a landmark publication that provides the most coherent overview of woman's role and place in western Europe, spanning the era from the beginning of the eighteenth century until the twentieth century. In this collection of essays, leading women's historians counter the notion of 'national' histories and provide the insight and perspective of a European approach. Important intellectual, political and economic developments have not respected national boundaries, nor has the story of women's past, or the interplay of gender and culture. The interaction between women, ideology and female agency, the way women engaged with patriarchal and gendered structures and systems, and the way women carved out their identities and spaces within these, informs the writing in this book. For any student of women's studies or European history, *The Routledge History of Women in Europe since 1700* will prove an informative addition to their studies.

*Cherokee Women* - Theda Perdue 1998-01-01

Theda Perdue examines the roles and responsibilities of Cherokee women during the eighteenth and nineteenth centuries, a time of intense cultural change. While building on the research of earlier historians, she develops a uniquely complex view of the effects of contact on Native gender relations, arguing that Cherokee conceptions of gender persisted long after contact. Maintaining traditional gender roles actually allowed Cherokee women and men to adapt to new circumstances and adopt new industries and practices.

*A Thousand Years of Nonlinear History* - Manuel De Landa 2021-09-14

Following in the wake of his groundbreaking work *War in the Age of Intelligent Machines*, Manuel De Landa presents a brilliant, radical synthesis of historical development of the last thousand years. *A Thousand Years of Nonlinear History* sketches the outlines of a renewed materialist philosophy of history in the tradition of

Fernand Braudel, Gilles Deleuze, and Félix Guattari, while engaging – in an entirely unprecedented manner – the critical new understanding of material processes derived from the sciences of dynamics. Working against prevailing attitudes that see history merely as the arena of texts, discourses, ideologies, and metaphors, De Landa traces the concrete movements and interplays of matter and energy through human populations in the last millennium. The result is an entirely novel approach to the study of human societies and their always mobile, semi-stable forms, cities, economies, technologies, and languages. De Landa attacks three domains that have given shape to human societies: economics, biology, and linguistics. In each case, De Landa discloses the self-directed processes of matter and energy interacting with the whim and will of human history itself to form a panoramic vision of the West free of rigid teleology and naive notions of progress and, even more important, free of any deterministic source for its urban, institutional, and technological forms. The source of all concrete forms in the West's history, rather, is shown to derive from internal morphogenetic capabilities that lie within the flow of matter-energy itself. A Swerve Edition.

***Women in European Culture and Society*** - Deborah Simonton 2017-09-19

*Women in European Culture and Society: A Sourcebook* includes a range of transnational sources which encompass the history of women in Europe from the beginning of the eighteenth century right up to the present day. Including documents from across Europe, from France and Germany to Estonia, Spain and Russia, organized in a broad chronological spread, the diversity of the sources included in the book is unique – including many never translated into English before. Deborah Simonton offers detailed interpretive introductions that analyse and contextualize the sources. A central feature is its exploration of how women operated within gendered worlds and used their skills and abilities to shape and claim their own

identities and to engage with how they contributed as practitioners to shaping European culture and society. With over 200 sources, the book allows us to 'hear' women's voices as they articulate their understandings of their worlds and helps capture a sense of women's motivations, options and choices as they understood them - allowing readers to focus on either a period or a theme and providing a comparative resource. Ideal for use on its own or as a companion volume to Simonton's other major work, *Women in European Culture and Society: Gender, Skill and Identity since 1700*, this sourcebook is an invaluable collection offering vivid first-hand accounts of women's lives.

**The British Barbershopper** - Liz Garnett 2017-07-05  
Barbershop singing is a distinctive and under-documented facet of Britain's musical landscape. Imported from the USA in the 1960s, it has developed into an active and highly organized musical community characterized by strong social support structures and a proselytizing passion for its particular style. This style is defined, within the community, in largely music-theoretical terms and is both highly prescriptive and continually contested, but there is also a host of performance traditions that articulate barbershop's identity as a distinct and specific genre. Liz Garnett documents and analyses the social and musical practices of this specialized community of music-makers, and extends this analysis to theorize the relationship between music and self-identity. The book engages with a range of sociological and musicological theoretical frameworks in order to explore the role of harmony, ritual, sexual politics, performance styles and 'tag-singing' in barbershop. This analysis shows how musical style and cultural discourses can be seen to interact in the formation of identity. Garnett provides the first in-depth scholarly insight into the British barbershop community, and contributes to ongoing debates in the semiotics and the sociology of music.

The Changing Body - Roderick Floud 2011-03-31  
Humans have become much taller and heavier, and

experience healthier and longer lives than ever before in human history. However it is only recently that historians, economists, human biologists and demographers have linked the changing size, shape and capability of the human body to economic and demographic change. This fascinating and groundbreaking book presents an accessible introduction to the field of anthropometric history, surveying the causes and consequences of changes in health and mortality, diet and the disease environment in Europe and the United States since 1700. It examines how we define and measure health and nutrition as well as key issues such as whether increased longevity contributes to greater productivity or, instead, imposes burdens on society through the higher costs of healthcare and pensions. The result is a major contribution to economic and social history with important implications for today's developing world and the health trends of the future.

**A History of the World in Seven Cheap Things** - Raj Patel 2018-05-22

Nature, money, work, care, food, energy, and lives: these are the seven things that have made our world and will shape its future. In making these things cheap, modern commerce has transformed, governed, and devastated Earth. In *A History of the World in Seven Cheap Things*, Raj Patel and Jason W. Moore present a new approach to analyzing today's planetary emergencies. Bringing the latest ecological research together with histories of colonialism, indigenous struggles, slave revolts, and other rebellions and uprisings, Patel and Moore demonstrate that throughout history, crises have always prompted fresh strategies to make the world cheap and safe for capitalism. At a time of crisis in all seven cheap things, innovative and systemic thinking is urgently required. This book proposes a radical new way of understanding-and reclaiming-the planet in the turbulent twenty-first century.

Agency, Gender and Economic Development in the World Economy 1850-2000 - Jan Luiten van Zanden 2017-07-14

How has 'agency' - or the ability to define and act upon

one's goals - contributed to global long-term economic development during the last 150 years? This book asserts that autonomous decision making, and female agency in particular, increases the potential of a society to generate economic growth and improve its institutions. Inspired by Amartya Sen's capabilities approach and looking at this in comparison to contemporary economic theory, the collection of chapters tackles the issue of agency from the micro level of household and family formation and asks how this applies to gender at regional and state level. It brings to the fore new empirical data from across the globe to test the links between family systems, female agency, human capital formation, political institutions and economic development and puts these into broader historical context. It will appeal to scholars researching social policy, gender studies, economic history, development studies and philosophy, as well anyone with interests in the long-term societal development of the world economy and issues of global inequality.

**Handbook of Autobiography / Autofiction** - Martina Wagner-Egelhaaf 2019-01-29

Autobiographical writings have been a major cultural genre from antiquity to the present time. General questions of the literary as, e.g., the relation between literature and reality, truth and fiction, the dependency of author, narrator, and figure, or issues of individual and cultural styles etc., can be studied preeminently in the autobiographical genre. Yet, the tradition of life-writing has, in the course of literary history, developed manifold types and forms. Especially in the globalized age, where the media and other technological / cultural factors contribute to a rapid transformation of lifestyles, autobiographical writing has maintained, even enhanced, its popularity and importance. By conceiving autobiography in a wide sense that includes memoirs, diaries, self-portraits and autofiction as well as media transformations of the genre, this three-volume handbook offers a comprehensive survey of theoretical approaches, systematic aspects,

and historical developments in an international and interdisciplinary perspective. While autobiography is usually considered to be a European tradition, special emphasis is placed on the modes of self-representation in non-Western cultures and on inter- and transcultural perspectives of the genre. The individual contributions are closely interconnected by a system of cross-references. The handbook addresses scholars of cultural and literary studies, students as well as non-academic readers.

Imperialism in the Twenty-First Century - John Smith 2016-01-22

Provides an examination of the relationship between the core capitalist countries and the rest of the world in the age of neoliberal globalization. Deploying a Marxist methodology, Smith begins by tracing the production of certain iconic commodities--the T-shirt, the cup of coffee, and the iPhone--and demonstrates how these generate enormous outflows of money from the countries of the Global South to transnational corporations headquartered in the core capitalist nations of the Global North. From there, Smith draws on his empirical findings to theorize the current shape of imperialism. He argues that the core capitalist countries need no longer rely on military force and colonialism (although these still occur) but increasingly are able to extract profits from workers in the Global South through market mechanisms and, by aggressively favoring places with lower wages, the phenomenon of labor arbitrage. --From publisher description.

How Was Life? Global Well-being since 1820 - OECD 2014-10-02

This book presents the first systematic evidence on long-term trends in global well-being since 1820 for 25 major countries and 8 regions in the world covering more than 80% of the world's population.

*Changing Lives* - Bonnie G. Smith 1989

**Women in American History: A Social, Political, and Cultural Encyclopedia and Document Collection** [4

**volumes]** - Peg A. Lamphier 2017-01-23

This four-volume set documents the complexity and richness of women's contributions to American history and culture, empowering all students by demonstrating a more populist approach to the past. • Provides significantly more detail than typical reference works on women's history and culture, enabling readers to better appreciate the contributions of women of all socio-cultural statuses • Covers the astounding range of American women's experience, including women of various economic and racial statuses, religious affiliations, political and ideological identifications, and sexualities • Includes a significant selection of primary documents, thereby combining the educational power of secondary and primary literature to create a richer learning experience for users

**Grand Transitions** - Vaclav Smil 2021-02-12

What makes the modern world work? The answer to this deceptively simple question lies in four "grand transitions" of civilization--in populations, agriculture, energy, and economics--which have transformed the way we live. Societies that have undergone all four transitions emerge into an era of radically different population dynamics, food surpluses (and waste), abundant energy use, and expanding economic opportunities. Simultaneously, in other parts of the world, hundreds of millions remain largely untouched by these developments. Through erudite storytelling, Vaclav Smil investigates the fascinating and complex interactions of these transitions. He argues that the moral imperative to share modernity's benefits has become more acute with increasing economic inequality, but addressing this imbalance would make it exceedingly difficult to implement the changes necessary for the long-term preservation of the environment. Thus, managing the fifth transition--environmental changes

from natural-resource depletion, biodiversity loss, and global warming--will determine the success or eventual failure of the grand transitions that have made the world we live in today.

*A Vindication of the Rights of Woman* - Mary Wollstonecraft 1891

The Long Road to the Industrial Revolution - J. L. Van Zanden 2009-06-17

'The Long Road to the Industrial Revolution' offers a new explanation of the origins of the industrial revolution in Western Europe by placing development in Europe within a global perspective. It focuses on its specific institutional and demographic development since the late Middle Ages, and on the important role played by human capital formation

European Feminisms, 1700-1950 - Karen M. Offen 2000

This ambitious book explores challenges to male hegemony throughout continental Europe over the past 250 years. For general readers and those interested primarily in the historical record, it provides a comprehensive, comparative account of feminist developments in European societies, as well as a rereading of European history from a feminist perspective. By placing gender, or relations between women and men, at the center of European politics, it aims to reconfigure our understanding of the European past and to make visible a long but neglected tradition of feminist thought and politics. On another level the book seeks to disentangle some misperceptions and to demystify some confusing contemporary debates about the Enlightenment, reason, nature, and public vs. private, equality vs. difference. In the process, the author aims to show that gender is not merely 'a useful category of analysis', but that sexual difference lies at the heart of human thought and politics.
