Last Love in Constantinople - Milorad Pavić 1988

In 1988 Milorad Pavić burst upon the literary scene with his critically acclaimed, international best seller, *Dictionary of the Khazars*. In it he asked his readers to experience his book in a new and exciting way, as he challenged their traditional concepts of the reading process. In his next two novels, *Landscape Painted With Tea* and *The Inner Side of the Wind*, he continued to challenge as he joined a modern *Odyssey* with a crossword puzzle, and then he told the same tale of two lovers from two perspectives -- male and female -- and asked us to read it from either front or back. His new novel, *Last Love in Constantinople*, does not disappoint, as Pavić once again demonstrates himself to be a master of narrative legerdemain.

Ecology of Language - Angela Creese 2010-08-27
This volume on Ecology of Language presents chapters on ecologies of language , literacy and learning. The subject of language ecology is diversity within socio-political settings where the processes of language use create, reflect and

challenge hierarchies and hegemonies. The volume covers the following topics: Historical and theoretical perspectives, language ecologies of selected countries and regions, focus on Asia, Australia, Africa, language ecologies of dispersed and diasporic communities, esp. Handbook of Loss Prevention - Allianz

Versicherungs-Aktiengesellschaft 1978-05

The German original of this Handbook of Loss Prevention was compiled during the course of many years' work by the engineers of the Department for Engineering Insurances, the scientists of the Allianz Centre for Technology and representatives of industry. It is based on the loss experience and practical loss research studies of the Allianz over a period of more than

five decades. The Handbook of Loss Prevention is a supplement to the technical literature from the field of engineering in the form of a collective work comprising examples of damage to machinery and technical plant and pertinent pointers on loss prevention. It has ranks among the recognised handbooks for engineers in the fields of planning, design, manufacture and operation. The great interest and wide acclaim according the German edition of this handbook by industry in 1972 confirm the traditional aims of the Allianz in placing loss prevention in technical plants in the foreground of their service to clients. The English edition of the handbook under review here enables this valuable engineering know-how to be made available at international level, with the object of preventing losses by the exchange of ideas and experience. The literature references have been taken over from the German edition in unchanged form, in order to bring to the attention of English-speaking experts a bibliography, which is little known outside Germany.

Berio's Sequenzas - JanetK. Halfyard 2017-07-05

Between 1958 and 2002, Luciano Berio wrote fourteen pieces entitled Sequenza, along with several versions of the same work for different instruments, revisions of the original pieces and also the parallel Chemins series, where one of the Sequenzas is used as the basis for a new composition on a larger scale. The Sequenza series is one of the most remarkable achievements of the late twentieth century - a collection of virtuoso pieces that explores the capabilities of a solo instrument and its player, making extreme technical demands of the performer whilst developing the musical vocabulary of the instrument in compositions so assured and so distinctive that each piece both initiates and potentially exhausts the repertoire of a new genre. The Sequenzas have significantly influenced the development of composition for solo instruments and voice, and there is no comparable series of works in the output of any other composer. Series of pieces tend to be linked by the instruments for which the composer writes, but this is a series in which the pieces are linked instead by the variety of instruments for which Berio composed. The varied approaches taken by the contributors in discussing the pieces

demonstrate the richness of this repertoire and the many levels on which Berio and these landmark compositions can be considered.

Contributions are arranged under three main headings: Performance Issues; Berio's Compositional Process and Aesthetics; and Analytical Approaches.
