English as a Medium of Instruction in Postcolonial Contexts - Lizzi O. Milligan
2018-10-16

Almost all low- and middle-income postcolonial countries now use English or another dominant language as the medium of instruction for some, if not all, of the basic education cycle. Much of the literature about language-in-education in such countries has focused on the instrumentalist value of English, on one side, and the rights of learners to high quality mother tongue-based education, on the other. The polarised nature of the

debate has tended to leave issues related to the processes of learning in English as a Medium Instruction (EMI) classrooms under-researched. This book aims to provide a greater understanding of the existing challenges for learners and educators and potential strategies that can support more effective teaching and learning in EMI classrooms. Contributions illustrate the impact that learning in English has on learners in a range of regional, national and local contexts and put forward theoretical and empirical analyses to support more relevant and inclusive educational policies. This volume was originally published as a special issue of Comparative Education.

The Rich Boy - Kylie Scott 2020-03-09
I'm the type of girl who's given up on fairy tales. So when Beck - the hot new busboy at work - starts flirting with me, I know better than to get my hopes up. Happily ever afters aren't for the average. I learned that the hard way. But how can I be expected to resist a man who

can quote Austen, loves making me laugh, and seems to be everything hot and good in this world? Only there's so much more to him than that. Billionaire playboy? Check. Troubled soul? Check. The owner of my heart, the man I've moved halfway across the country to be with, who's laying the world at my feet in order to convince me to never leave? Check. Check. Check. But nobody does complicated like the one percent. This is not your everyday rags-to-riches, knight-in-shining armor whisking the poor girl off her feet kind of story. No, this is much messier. "Rich Boy takes you on a literal ride! Funny. Angsty. There's mean rich people and people you root for. It's a definite recommend from me! -Tijan, New York Times bestselling author "Rich Boy was witty, exciting and had the most intense slow burn romance I've read in a long time. The complexity of the characters was refreshing and made me wish for more!"-Audrey Carlan, #1 New York Times bestselling author

Kumba Africa - Sampson Ejike Odum
2020-11-03

'KUMBA AFRICA', is a compilation of African Short Stories written as fiction by Sampson Ejike Odum, nostalgically taking our memory back several thousands of years ago in Africa, reminding us about our past heritage. It digs deep into the traditional life style of the Africans of old, their beliefs, their leadership, their courage, their culture, their wars, their defeat and their victories long before the emergence of the white man on the soil of Africa. As a talented writer of rich resource and superior creativity, armed with in-depth knowledge of different cultures and traditions in Africa, the Author throws light on the rich cultural heritage of the people of Africa when civilization was yet unknown to the people. The book reminds the readers that the Africans of old kept their pride and still enjoyed their own lives. They celebrated victories when wars were won, enjoyed their New Yam festivals and villages engaged themselves in seasonal wrestling contest etc; Early morning during harmattan season, they gathered firewood and made fire inside their small huts to hit up their bodies from the chilling cold of the harmattan. That was the Africa of old we will always remember. In Africa today, the story have changed. The people now enjoy civilized cultures made possible by the influence of the white man through his scientific and technological process. Yet there are some uncivilized places in Africa whose people haven't tested or felt the impact of civilization. These people still maintain their ancient traditions and culture. In everything, we believe that days when people paraded barefooted in Africa to the swamp to tap palm wine and fetch firewood from there farms are almost fading away. The huts are now gradually been replaced with houses built of blocks and beautiful roofs. Thanks to modern civilization. Donkeys and camels are no longer used for carrying heavy loads for

merchants. They are now been replaced by heavy trucks and lorries. African traditional methods of healing are now been substituted by hospitals. In all these, I will always love and remember Africa, the home of my birth and must respect her cultures and traditions as an AFRICAN AUTHOR.

The Forgotten Rohingya: Their Struggle for Human Rights in Burma - Habib Habib Siddiqui 2019

Imagine that you are living in a country that does not recognize you as a citizen in spite of the fact that your people have maintained a continuous existence there for several centuries. If that was not enough of a traumatic experience, consider that because of your racial, ethnic and religious identity other ethnic groups that are fighting the brutal military regime in your country for their self-determination and human rights consider you as "settlers" from a neighboring country. It must be your worst nightmare when you realize that half of your people (almost 2 million) have been forced to take asylum or refuge outside, and you may be the next in line to seek a way out of this living hell of xenophobia, discrimination, intolerance, racism and bigotry. The victims are the Rohingya people of Burma (Myanmar). Because of their religion, race, ethnicity, color and language they are the most discriminated and persecuted people in our planet. Some argue that they are also one of the most forgotten. The Myanmar military regime has denied their citizenship rights, claiming that they are illegal settlers from nearby Bangladesh who have moved into Arakan during the British occupation of Burma in the 19th century. Is there any truth to such allegations? Does the military junta apply the same litmus test against all ethnic and

religious groups in matters of citizenship? What is the basis for a nation's claim to self-determination? Must a people wander in the wilderness for two millennia and suffer repeated persecution, humiliation and genocide to qualify? How about the rights of a minority community to survive with their culture and traditions intact? Do they need to be 'children' of a 'higher' God to qualify? What makes the children of a 'lesser' God to be forgotten and denied the same treatment and privilege that was granted hitherto to other nations? For much of its history, Burma has been ruled by military. As has once again been demonstrated recently they are brutal, savage and tyrannical. They have ignored people's verdict in the election and imprisoned leaders and workers of the democracy movement. They cannot be guarantors or protectors of human rights of anyone, let alone religious and ethnic minorities. Do you know that the Rohingyas - face cruel restriction on marriage and those married without government authorization are paraded naked on the streets? - Are restricted from traveling outside their villages? - Have no legal right to own land or property? - Are restricted from getting education, finding work, getting medical and health care? - Are subjected to land confiscation, forced eviction and destruction of homes, offices, schools, mosques, shops, etc., and face religious persecution on a daily basis? - Are victims of staged riots, forced starvation, arbitrary taxation, extortion, arrest, torture and extra-judicial killings? - Are forced to do slave labor for establishment of government infrastructure, new Buddhist settlements, pagodas and monasteries on evicted lands with the government intent of changing the landscape and demography of Arakan? - Are forced to convert to Buddhism &/or worship Buddha? Do you know that when it comes to the Rohingya people, the Burmese government doesn't uphold any of the Articles of the Universal Declaration of Human Rights? Nothing can excuse us from the criminal silence that we practice in not

voicing our concern about the plight of the Rohingya people. "The Forgotten Rohingya" makes a strong case for mobilizing concerned citizens of our globe to ease their sufferings. The author analyzes origin of the Rohingya people and offers ideas to solve their problem. The author also discusses problems of xenophobia and racism, which are so rampant in this country of many races, ethnicities and religions. He also analyzes the role of Daw Suu Kyi and failure of Burma's orange revolution.

Construction Health and Safety in Coastal and Maritime Engineering - Ian Cruickshank 2005

Over £500 million is spent on coastal and maritime construction in the UK every year. This work is particularly hazardous due to the hostile environment and uncertainty caused by the combination of storms, waves, currents and tides. At present, there is little health and safety related guidance available to assist coastal/maritime clients, designers, contractors and other stakeholders to ensure this work is undertaken in a safe manner. The CDM Regulations, amongst others regulations, require these parties to consider and assess construction risks.

Piers, Jetties and Related Structures Exposed to Waves - Kirsty McConnell
2004

"This book not only brings together existing guidance on hydraulic design, including design wave conditions, prediction of scour and vessel mooring loads, but also presents new methods (developed from extensive laboratory testing) for the prediction of wave loading, including forces on the underside of jetty decks. These guidelines will help maritime designers to optimise jetty designs, and are an essential reference resource."--BOOK JACKET.

Data Analysis Methods in Physical Oceanography - Richard E. Thomson
2001-04-03

Data Analysis Methods in Physical Oceanography is a practical reference guide to established and modern data analysis techniques in earth and ocean sciences. This second and revised edition is even more comprehensive with numerous updates, and an additional appendix on 'Convolution and Fourier transforms'. Intended for both students and established scientists, the five major chapters of the book cover data acquisition and recording, data processing and presentation, statistical methods and error handling, analysis of spatial data fields, and time series analysis methods. Chapter 5 on time series analysis is a book in itself, spanning a wide diversity of topics from stochastic processes and stationarity, coherence functions, Fourier analysis, tidal harmonic analysis, spectral and cross-spectral analysis, wavelet and other related methods for processing nonstationary data series, digital filters, and fractals. The seven appendices include unit conversions, approximation methods and nondimensional numbers used in geophysical fluid dynamics, presentations on convolution, statistical terminology, and distribution functions, and a number of important statistical tables.

Twenty pages are devoted to references. Featuring: • An in-depth presentation of modern techniques for the analysis of temporal and spatial data sets collected in oceanography, geophysics, and other disciplines in earth and ocean sciences. • A detailed overview of oceanographic instrumentation and sensors - old and new - used to collect oceanographic data. • 7 appendices especially applicable to earth and ocean sciences ranging from conversion of units, through statistical tables, to terminology and non-dimensional parameters. In praise of the first edition: "(...)This is a very practical guide to the various statistical analysis methods used for obtaining information from geophysical data, with particular reference to oceanography(...) The book provides both a text for advanced students of the geophysical sciences and a useful reference volume for researchers." *Aslib Book Guide Vol 63, No. 9, 1998* "(...)This is an excellent book that I recommend highly and will definitely use for my own research and teaching." *EOS Transactions, D.A. Jay, 1999* "(...)In summary, this book is the most comprehensive and practical source of information on data analysis methods available to the physical oceanographer. The reader gets the benefit of extremely broad coverage and an excellent set of examples drawn from geographical observations." *Oceanography, Vol. 12, No. 3, A. Plueddemann, 1999* "(...)Data Analysis Methods in Physical Oceanography is highly recommended for a wide range of readers, from the relative novice to the experienced researcher. It would be appropriate for academic and special libraries." *E-Streams, Vol. 2, No. 8, P. Mofjelf, August 1999*
