Plumb's Veterinary Drug Handbook - Donald C. Plumb
2011-09-21

Now in a fully updated seventh edition, Plumb's Veterinary Drug Handbook remains the most complete source of drug information relevant for animals available. Providing referenced dosing recommendations in each monograph, this book offers doses for a wide range of species, including dogs, cats, exotic animals, and farm animals, in a single resource. The book also includes detail on key aspects for appropriate use of each drug, including pharmacology, pharmacokinetics, contraindications, adverse effects, safety during pregnancy or nursing, overdoses, drug interactions, monitoring, chemistry and stability, storage, compatibility, and available products. The seventh edition adds 22 new drug monographs, as well as updated dosages and information for existing drugs. A noteworthy feature is the Prescriber Highlights section found at the beginning of each monograph that allows readers a quick method of finding important information for that drug. This is the convenient 5 x 8-inch pocket size; Plumb's Veterinary Drug Handbook is also available in an 8 ½ x 11-inch desk size for enhanced readability and ease of use and as a mobile version. Plumb's exhaustive one-volume coverage of drugs approved for veterinary species and non-approved (human) drugs that are used in veterinary practices today make this book an essential reference for veterinarians, veterinary technicians, veterinary pharmacologists, pharmacists with veterinary patients, animal research or zoological facilities, and libraries that serve these groups.

The Veterinary Workbook of Small Animal Clinical Cases - Ryane E. Englar 2021-08-31

This workbook is intended to be a bridge between classroom learning and clinical training; to improve patient care and clinician confidence in practice. Common presentations in small animal practice are presented as real-world case studies while the reader is guided through work-up, critical thinking and problem solving to run the consultation efficiently. Key concepts of anatomy, physiology, radiology, clinical

pathology, medicine and surgery are covered and readers are guided through history-taking and diagnostics to perform an effective consultation. Cases discussed include vaccinating the new kitten, castrating the new puppy, the puppy with diarrhoea, the blind cat, the head-shaking dog, the itchy dog. Categories of complaints covered include body weight, urinary problems, the digestive system, respiratory issues, eye problems, skin and soft tissue complaints, cardiovascular, reproductive, aural and neurological complaints. The aim is to present a problem-first approach and to encourage readers to think like clinicians rather than students by instilling a case-based problem solving approach.
