The Makings of Indonesian Islam - Michael Laffan 2013-12

Indonesian Islam is often portrayed as being intrinsically moderate by virtue of the role that mystical Sufism played in shaping its traditions. According to Western observers--from Dutch colonial administrators and orientalist scholars to modern anthropologists such as the late Clifford Geertz--Indonesia's peaceful interpretation of Islam has been perpetually under threat from outside by more violent, intolerant Islamic traditions that were originally imposed by conquering Arab armies. The Makings of Indonesian Islam challenges this widely accepted narrative, offering a more balanced assessment of the intellectual and cultural history of the most populous Muslim nation on Earth. Michael Laffan traces how the popular image of Indonesian Islam was shaped by encounters between colonial Dutch scholars and reformist Islamic thinkers. He shows how Dutch religious preoccupations sometimes echoed Muslim concerns about the relationship between faith and the state, and how

Dutch-Islamic discourse throughout the long centuries of European colonialism helped give rise to Indonesia's distinctive national and religious culture. The Makings of Indonesian Islam presents Islamic and colonial history as an integrated whole, revealing the ways our understanding of Indonesian Islam, both past and present, came to be.

Why Science Does Not Disprove God - Amir Aczel
2014-04-15

The renowned science writer, mathematician, and bestselling author of Fermat's Last Theorem masterfully refutes the overreaching claims the "New Atheists," providing millions of educated believers with a clear, engaging explanation of what science really says, how there's still much space for the Divine in the universe, and why faith in both God and empirical science are not mutually exclusive. A highly publicized coterie of scientists and thinkers, including Richard Dawkins, the late Christopher Hitchens, and Lawrence Krauss, have vehemently contended that breakthroughs in modern science have disproven the existence of God, asserting that we must accept that the creation of the universe came out of nothing, that religion is evil, that evolution fully explains the dazzling complexity of life, and more. In this much-needed book, science journalist Amir Aczel profoundly disagrees and conclusively demonstrates that science has not, as yet, provided any definitive proof refuting the existence of God. Why Science Does Not Disprove God is his brilliant and incisive analyses of the theories and findings of such titans as Albert Einstein, Roger Penrose, Alan Guth, and Charles Darwin, all of whose major breakthroughs leave open the possibility— and even the strong likelihood—of a Creator. Bolstering his argument,

Aczel lucidly discourses on arcane aspects of physics to reveal how quantum theory, the anthropic principle, the fine-tuned dance of protons and quarks, the existence of anti-matter and the theory of parallel universes, also fail to disprove God.

Knowledge of the Hereafter - Imam al-Ghazali

Al-Wafi - Musthafa Dieb al-Bugha 2017-03-20

Al-Wafi Syarah Hadis Arba'in Imam an-Nawawi Dr. Musthafa Dieb al-Bugha & Dr. Muhyiddin Mistu Hadis Arba'in an-Nawawi adalah sebuah kitab yang bersama dengan kitab Riyadhus Shalihin dianggap sebagai karya Imam an-Nawawi yang paling terkenal dan diterima umat muslim di seluruh dunia. Arba'in artinya empat puluh, namun sebenarnya terdapat empat puluh dua hadis Nabi s.a.w. yang semuanya bersumber dari Sahih Bukhari dan Sahih Muslim. Kitab ini menjadi favorit di kalangan santri untuk memulai menghafal hadis-hadis Nabi sebelum beralih ke kitab-kitab yang lebih besar. Kepopuleran dan keagungan kumpulan hadis pilihan ini menjadi daya tarik tersendiri bagi para ulama untuk memberikan syarah (komentar pendamping yang menjabarkan isi matan). Syarah Hadis Arba'in an-Nawawi yang ditulis oleh Dr. Musthafa Dieb al-Bugha dan Dr. Muhyiddin Mistu ini berfokus pada takhrij dan kedudukan hadis, yang mencakup berbagai aspek penting dalam Islam, akidah, hukum, syariah, muamalah dan akhlak. Tiap hadisnya mengandung landasan penting, yang para ulama menyebutnya sebagai poros ajaran Islam. Syarah ini menjadi istimewa karena dilengkapi dengan fiqhul hadis, kosakata, latar belakang hadis, ayat dan hadis penguat, intisari hadis dan biografi perawi hadis. Itulah mengapa buku ini diberi judul al-Wafi yang menggambarkan kelengkapan kandungannya. Syarah ini disajikan dengan bahasa yang

sederhana dan lugas, hingga mudah dipahami oleh pembaca awam sekalipun. Pembahasannya yang sistematis, singkat, padat dan lengkap memantaskan buku ini menjadi rujukan komprehensif bagi kaum Muslimin. -QisthiPress-
MUSLIM S CHARACTER - M. Al-Ghazali 2006

Al-Ghazzali on Truthfulness and Sincerity - Ghazzālī 2002

General Description: Al-Ghazzali describes the concept of intention in great detail, its true nature and how the intention of the believer is better than his deed. He explores whisperings of the self, evil inspiration and bad thoughts and then those deeds that change according to intention and how the admirable servant does what he does for the sake of God. In regard to sincerity, he describes its true nature and then goes on to describe truthfulness.

On the Hermeneutics of the Light-Verse of the Qur'ān - Muḥammad ibn Ibrāhīm Ṣadr al-Dīn Shīrāzī 2004

This work marks the meeting point of 4 different traditions of the Qur'anic commentary: philosophical, Sufi, Shi'ite and theological. It also presents the author's metaphysical commentary and records the earlier commentaries on the Light Verse. It is significant from the point of view of both the history of Qur'anic commentary and Islamic Philosophy. The most outstanding characteristic of the book is that he explains the meaning of light by establishing its metaphysics, encompassing ontology, cosmology, epistemology, psychology and spiritual wayfaring.

God and the Folly of Faith - Victor J. Stenger
2012-04-03

A thorough and hard-hitting critique that is a must read for anyone interested in the interaction between religion and science. It has become the prevalent view among sociologists, historians, and some theistic scientists that religion and science have never been in serious conflict. Some even claim that Christianity was responsible for the development of science. In a sweeping historical survey that begins with ancient Greek science and proceeds through the Renaissance and Enlightenment to contemporary advances in physics and cosmology, Stenger makes a convincing case that not only is this conclusion false, but Christianity actually held back the progress of science for one thousand years. It is significant, he notes, that the scientific revolution of the seventeenth century occurred only after the revolts against established ecclesiastic authorities in the Renaissance and Reformation opened up new avenues of thought. The author goes on to detail how religion and science are fundamentally incompatible in several areas: the origin of the universe and its physical parameters, the origin of complexity, holism versus reductionism, the nature of mind and consciousness, and the source of morality. In the end, Stenger is most troubled by the negative influence that organized religion often exerts

on politics and society. He points out antiscientific attitudes embedded in popular religion that are being used to suppress scientific results on issues of global importance, such as overpopulation and environmental degradation. When religion fosters disrespect for science, it threatens the generations of humanity that will follow ours.

Al - Hidayah (The Guidance) - Burhan Ad-Din Al-Farghani Al-Marghinani 2020-10-13

The Hidayah has dominated the field of Islamic jurisprudence since the day it was written over 800 years ago. It has been the primary text used by Muslim jurists to issue authentic and reliable rulings on Islamic law according to the school of Imam Abu Hanifa (d 150H/767CE). The Hidayah commands such an authoritative position amongst the doctors of law that the knowledge of a scholar who has not read it is not considered reliable. It has been a standard text in the curricula of Islamic law schools since the 12th century. It was first translated into English by Charles Hamilton in 1791. Around 70 huge commentaries, some spread over more than a dozen volumes have been written on it. The number of explanatory glosses is in thousands. Comprehensive in content and conveniently organized, with the publication of this all previous works that discussed Islamic jurisprudence according to the Hanafi law become outmoded and soon fell into disuse. If revealed books are not taken into account, never has a book received so much attention as the Hidayah. This landmark publication of the Hidayah not only has been translated in its entirety for the first time but has been done so from Arabic, the language in which it was written. The author, Shaykh Al Islam, Burhan Al-Din Marghanani (d 593 AH/ 1197 CE) was considered to be the

leading jurist of the Muslim world in his times. "The hidayah is justly celebrated as the most practical and useful summary compilation of Hanafi jurisprudence. It has been a standard text in the curricula of Islamic law schools since the 12th century. It was first translated by Charles Hamilton in 1791. A new translation into modern English has been long overdue. This translation by Imran Ahsan Khan Nyazee is both precise and straight forward. With his knowledge of Islamic law and jurisprudence combined with his command of both the Arabic and English languages, he has conveyed the meaning of the original with great clarity. The hidayah is a dense work, intended for use in teaching Hanafi fiqh - it is a work that needs explication if its arguments are to be understood fully. This the translator has provided through this valuable notes" Dr Mohammad Akram Nadwi, research fellow, Oxford centre for Islamic studies, Oxford

Islamic Law and Finance - Frank E. Vogel 1998-01-01
Mirroring the expansion of wealth in the Middle East and Asia and a surge in Islamic self-identity, Islamic banking practices have either become the law of the land or coexist and compete with Western practices in at least six countries. A growing number of institutions and mutual funds (akin to Western 'socially responsible' funds) have established Islamic investment and other practices to cater to this burgeoning market. Because of its prevalence, practitioners in every banking-related area must familiarize themselves with current Islamic finance practices in order to do business with Muslim clients and to engage in cross-border financing. Injunctions from the "Qur'an and the sayings of Prophet Muhammed have generated a web of interrelated norms which prohibit Islamic financiers from engaging in transactions that involve interest "(riba) and speculation "(gharar). "Islamic Law and Finance describes the dynamic set of Islamically-sanctioned ways financiers can transact business.

Kitab Al-I'tisam - إبراهيم بن موسى الشاطبي - Ibrahim Ibn Musa Abu Ishaq Al Shatibi 2020-10-03

Kitab Al I'tisam seems to have been written by Al Shatibi "May Allah (swt) have mercy on him" for his disciples and the scholars and students of knowledge, rather than for the laymen and commoners among the people. He underwent great difficulties to achieve this glorious task. The book is indeed a scientific encyclopedia, which includes a lot of benefits and unique issues, which make its holder and carrier dispense with anything else, in residence as well as on journey. He prefaced the book with a wonderful and concentrated introduction, in which he talked about the alienation of Islam, and the emergence and spread of the religious innovations, which motivated him to write his book, in the hope it would benefit the Muslims in the world and the hereafter. He divided the book into ten sections, each including many chapters as required by content and in-depth explanation of the issues: 1. Definition and meaning of religious innovation 2. Condemnation of religious innovation, and the evil consequences of its men; 3. Condemnation of religious innovations in general, and all changes made in the religion, in which he discussed the malicious allegations of the religious innovators and those of scholars who regard good or bad the religious innovations. 4. The approaches of religious innovators in attestation; 5. The real and additional religious innovations, and the difference between them; 6. The rulings of the religious innovations, which are not of the same rank; 7. The innovation, whether it pertains to the acts of worship in particular, or includes also the

normal habits; 8. The difference between the benefits which were not specifically addressed with Islamic text, and the appreciation; 9. The reason for which the sects of religious innovators broke away from the established community of the Muslims; 10. The straight path from which the religious innovators deviated

Handbook of Lubrication and Tribology - Robert W. Bruce 2012-07-06

Since the publication of the best-selling first edition,

the growing price and environmental cost of energy have increased the significance of tribology. Handbook of Lubrication and Tribology, Volume II: Theory and Design, Second Edition demonstrates how the principles of tribology can address cost savings, energy conservation, and environmental protection. This second edition provides a thorough treatment of established knowledge and practices, along with detailed references for further study. Written by the foremost experts in the field, the book is divided into four sections. The first reviews the basic principles of tribology, wear mechanisms, and modes of lubrication. The second section covers the full range of lubricants/coolants, including mineral oil, synthetic fluids, and water-based fluids. In the third section, the contributors describe many wear- and friction-reducing materials and treatments, which are currently the fastest growing areas of tribology, with announcements of new coatings, better performance, and new vendors being made every month. The final section presents components, equipment, and designs commonly found in tribological systems. It also examines specific industrial areas and their processes. Sponsored by the Society of Tribologists and Lubrication Engineers, this handbook incorporates up-to-date, peer-reviewed information for tackling tribological problems and improving lubricants and tribological systems. The book shows how the proper use of generally accepted tribological practices can save money, conserve energy, and protect the environment.

The Philosophy of Psychology - William O'Donohue 1996-10-28

This major text provides the first comprehensive anthology of the key topics arising in the philosophy of psychology. Bringing together internationally renowned

authors, including Herb Simon, Karl Pribram, Joseph Rychlak, Ullin T Place and Adolf Gr[um]unbaum, this volume offers a stimulating and informative addition to contemporary debate. With the cognitive revolution of the 1960s, there has been a resurgence of interest in the study of the philosophical assumptions and

implications of psychology. Several significant themes, such as the foundations of knowledge, behaviourism, rationality, emotion and cognitive science span both philosophy and psychology, and are covered here along with a wide range of issues in the fields
