The Indy 500 - Ben Lawrence 2004

The 1950s and early 1960s are considered by many to be the Golden Era of Racing at the Indianapolis 500, and photographer Ben Lawrence was on hand taking photos of the Greatest Spectacle for the Indianapolis Times. During that era, Ben captured many images of the race and race events that surrounded the Indy 500. He was there when Bill Vukovich met his fate in 1955. He photographed the first Indianapolis 500 Parade, which has become an annual event. He captured A.J. Foyt winning his first race at the Brickyard. He was on hand to photograph the breaking of the 150-mph barrier. Then he saw the transition from the front-engined Offenhauser to the rear-engined Lotus-Fords, which ended the Golden Era.

Chemical Separations - Clifton E. Meloan 1999-10-06

Performing effective chemical separations—a step-by-step guide to the most commonly used techniques. How do experienced analysts go about making a chemical separation work? Through precise, detailed coverage of the principles, equipment, and techniques involved, this combination laboratory manual and reference source gives readers a working knowledge of an impressive array of separation methods. In forty-two chapters, it explores all major categories of separation, including those involving phase changes, extraction, chromatography, ion-exchange resins, electric fields, flotation, membranes, and miscellaneous techniques. With an emphasis on everyday practice rather than theory, Chemical Separations explains the principles and parameters of these methods with a minimum of mathematics, while providing 59 specific experiments to demonstrate proper procedures. Drawn from well-known commercial and academic laboratories and approved by national standard-setting organizations, these experiments feature step-by-step protocols for each separation scheme, precise instructions on setting up the apparatus, and helpful checklists for essential chemicals and supplies. With Chemical Separations as their guide, laboratory analysts and newcomers to chemical analysis will learn how to obtain quality analysis using commercial products, natural samples, and proven real-world laboratory techniques.

Antifascisms - David Ward 1996

This book is an in-depth analysis of three of the most crucial years in twentieth-century Italian history, the years 1943-46. After more than two decades of a Fascist regime and a disastrous war experience during which Italy changed sides, these years saw the laying of the political and cultural foundations for what has since become known as Italy's First Republic. Drawing on texts from the literature, film, journalism, and political debate of the period, Antifascisms offers a thorough survey of the personalities and positions that informed

the decisions taken in this crucial phase of modern Italian history.

Archways 1 - Chris Molnar 2021-04-13

Archway Editions is the brand new imprint of powerHouse Books, and a literary complement to their trailblazing photography and illustrated publications, all distributed by Simon & Schuster. Our mission statement is "to publish the finest authors, at all stages of their careers, who write material which is at odds with the prevailing status quo, both legendary and emerging." We are genre-blind with a goal to publish unconventional books for the widest possible audience. This includes writers with long careers like Alice Notley, Ishmael Reed and Paul Schrader, but also young writers who need a place to show off their stuff and meet likeminded literati. Archways is the in-house reading series that takes place every few months at POWERHOUSE Arena, our bookstore in downtown Brooklyn across from the Manhattan Bridge archway. It's our home base and a place for authors to present incredible work out of the mainstream. Some we end up publishing (like Gabriel Kruis' instant classic *Acid Virga*, excerpted here), and each one is a vital new voice working at odds with a complacent and hidebound publishing industry. Every Archways features a limited edition zine of works read at the event. This anthology collects work from the first three readings, held in 2019 and 2020. Every event has a visual component, and we've shared some stills and photos from our incredible visual artists too. There's nothing quite like the high wire tension of a live reading - but this'll have to do for now. CONTRIBUTORS include: Rachel Allen, Phil Anderson, Brendan Burdzinski, Naomi Falk, Katie Foster, Andrew Gibeley, Ariel Francisco, Kelly Gallagher, Cyree Jarelle Johnson, Gabriel Kruis, Shayla Lawz, Etan Nechin, Kwame Opoku-Duku, Chunbum Park, Joseph Rathgeber, Nicolas Rys, Bud Smith, Andrea Stella, and Shy Watson.

Biblical Exegesis and the Formation of Christian Culture - Frances M. Young 1997-04-28

This book challenges standard accounts of early Christian exegesis of the Bible. Professor Young sets the interpretation of the Bible in the context of the Graeco-Roman world - the dissemination of books and learning, the way texts were received and read, the function of literature in shaping not only a culture but

a moral universe. For the earliest Christians, the adoption of the Jewish scriptures constituted a supersessionary claim in relation to Hellenism as well as Judaism. Yet the debt owed to the practice of exegesis in the grammatical and rhetorical schools is of overriding significance. Methods were philological and deductive, and the usual analysis according to 'literal', 'typological' and 'allegorical' is inadequate to describe questions of reference and issues of religious language. The biblical texts shaped a 'totalizing discourse' which by the fifth century was giving identity, morality and meaning to a new Christian culture.

Unix in a Nutshell - Arnold Robbins 2005-10-26

As an open operating system, Unix can be improved on by anyone and everyone: individuals, companies, universities, and more. As a result, the very nature of Unix has been altered over the years by numerous extensions formulated in an assortment of versions. Today, Unix encompasses everything from Sun's Solaris to Apple's Mac OS X and more varieties of Linux than you can easily name. The latest edition of this bestselling reference brings Unix into the 21st century. It's been reworked to keep current with the broader state of Unix in today's world and highlight the strengths of this operating system in all its various flavors. Detailing all Unix commands and options, the informative guide provides generous descriptions and examples that put those commands in context. Here are some of the new features you'll find in Unix in a Nutshell, Fourth Edition: Solaris 10, the latest version of the SVR4-based operating system, GNU/Linux, and Mac OS X Bash shell (along with the 1988 and 1993 versions of ksh) tsch shell (instead of the original Berkeley csh) Package management programs, used for program installation on popular GNU/Linux systems, Solaris and Mac OS X GNU Emacs Version 21 Introduction to source code management systems Concurrent versions system Subversion version control system GDB debugger As Unix has progressed, certain commands that were once critical have fallen into disuse. To that end, the book has also dropped material that is no longer relevant, keeping it taut and current. If you're a Unix user or programmer, you'll recognize the value of this complete, up-to-date Unix reference. With chapter overviews, specific examples, and detailed command.

Buyology - Martin Lindstrom 2010-02-02

NEW YORK TIMES BESTSELLER • "A fascinating look at how consumers perceive logos, ads, commercials, brands, and products."—Time How much do we know about why we buy? What truly influences our decisions in today's message-cluttered world? In Buyology, Martin Lindstrom presents the astonishing findings from his groundbreaking three-year, seven-million-dollar neuromarketing study—a cutting-edge experiment that peered inside the brains of 2,000 volunteers from all around the world as they encountered various ads, logos, commercials, brands, and products. His startling results shatter much of what we have long believed about what captures our interest—and drives us to buy. Among the questions he explores: • Does sex actually sell? • Does subliminal advertising still surround us? • Can "cool" brands trigger our mating instincts? • Can our other senses—smell, touch, and sound—be aroused when we see a product? Buyology is a fascinating and shocking journey into the mind of today's consumer that will captivate anyone who's been

seduced—or turned off—by marketers' relentless attempts to win our loyalty, our money, and our minds.

Brutified - Robert Benefiel 2020-11-27

Brutified is a collection of poetry written by the author Robert Benefiel. The poems contained within it are from a larger cache of poems written in 2019. The pieces themselves range from narrative to abstract, bibliographical to fictionalized, allowing for a fuller range of expression and voice. What each piece carries is the idea of surviving the brutality of the world, others, and even one's self, in hopes of gaining insight and retaining one's compassion. Whether the piece is addressing the idea of finding one's own art at a junk store, or stumbling across a love note written before, but after, a lover has left them, or even watching a young midget be chased through the mall, the author never ceases to try and present the emotion and meaning at the core of each piece in a blatant yet subtle way.

Underwater Research - E.A. Drew 2013-07-19

Underwater Research is primarily a review of problems in underwater viewing and hearing and acoustics. The chapters in this book are papers collated from the symposia of the Underwater Association. This book explores the need for the further study of the physiological and psychological reactions of divers. The book also concludes that diving is still the best way in studying the benthic ecology and sunken wrecks and

cities. The text is divided into 25 detailed chapters. Most of the topics in the text address the common problems encountered by divers such as in hearing and viewing. Specifically, problems in diver communication, depth estimation, color distinction are some of the topics covered. Other chapters deal with the psychological reactions such as anxiety, narcosis, and visual attention. Also, some chapters tackle solutions and experiments for the improvement of diving techniques and equipment. This reference is helpful to divers, students, and scientists involved in marine and environmental science.

Safety and Health in Opencast Mines - International Labour Office 1991

Balinese Character - Gregory Bateson 1962

Kinship in Bali - Hildred Geertz 1978-08-15

This work constitutes the first book-length examination of Balinese kinship in English and an important theoretical analysis of the central ethnographic concept of "kinship system." Hildred and Clifford Geertz's findings challenge the prevailing anthropological notion of a kinship system as an autonomous set of institutionalized social relationships. Their research in Bali suggests that kinship cannot be studied in isolation but must be perceived as a symbolic subsystem governed by ideas and beliefs unique to each culture.
