Assessing Culturally Informed Parenting in Social Work - Davis Kiima 2021-03-08

This book explores how social workers incorporate issues of culture when evaluating the parenting competence of Black, Asian, and Minority Ethnic (BAME) parents and highlights the gap in how social workers assess safe parenting in BAME families. Drawing on a study that combined a phenomenological research philosophy with frame analysis, the book explores how culturally informed parenting is construed by social workers and BAME parents. It argues that effective assessment of the parenting competence of BAME parents is predicated on understanding how culture frames perspectives of what constitutes competent parenting. Throughout the eight chapters, the book moves the debate within the literature away from the universality of parenting concepts to a focus on a deeper understanding of culture. It highlights the influence that culture has on the way that BAME parents socialise their children, as well as how parents and social workers conceptualise safe parenting. The result is useful insights into the cultural context of parenting. The book will be of interest to all scholars and students of social work, childhood studies, sociology, and social policy, as well as social work professionals

more broadly.

Letting Go (Fifth Edition) - Karen Levin Coburn 2009-03-17

The sixth edition of this classic parents' guide and college orientation staple has been thoroughly revised and updated to reflect the realities of college today. For more than a decade, *Letting Go* has provided hundreds of thousands of parents with valuable insights, information, comfort, and guidance throughout the emotional and social changes of their children's college years—from the senior year in high school

through college graduation. Based on research and real life experience, and recommended by colleges and universities around the country, *Letting Go*, Sixth Edition, has been updated and revised, offering even more insightful, practical, and up-to-date information. In this era of constant communication, this edition tackles the challenge facing parents: finding the balance between staying connected and letting go. When should parents encourage independence? When should they intervene? What issues of identity and intimacy await students? What are normal feelings of disorientation and loneliness for students—and for parents? What is different about today's college environment? What new concerns about safety, health and wellness, and stress will affect incoming classes? A timeless resource, *Letting Go*, Sixth Edition, is an indispensable book that parents can depend on and turn to for all of their questions and concerns regarding sending their children to college.

The Encyclopedia of Parenting Theory and Research - Charles A. Smith 1999

While becoming a parent is relatively easy, parenting is a skill that is learned and improved over a lifetime. This reference book provides a comprehensive summary of what we know about parents and parent-child relationships. Through more than 240 alphabetically arranged entries, the volume synthesizes the present state of research on parenting. Each entry is written by an expert contributor and represents an authoritative view on a particular topic. Entries are related to child activity, child outcomes, child states, parent behaviors, parental situations, external and community concerns, systemic issues, the transition to parenthood, available resources, and various persons who have shaped our knowledge of parenting. The entries draw on information from a wide range of disciplines, including psychology, education, and sociology. Each entry includes a brief bibliography, and the volume closes with a selected list of works for further reading. The word parent is most often used to refer to a biological relationship with a child. But

the word parent, like mother and father, can also invoke acts of caring, nurturing, and protecting. When we say, That child needs a father, we imply that the child needs a relationship with a man capable of fathering. This emphasizes a social and emotional relationship, not merely a biological one. Parenting means assuming responsibility for the long-term care of a child. Becoming a parent is relatively easy. But parenting is a skill that is learned and improved over a lifetime. Moreover, parenting is a skill that becomes more complex in response to the demands of a changing society. Some elements of successful parenting are relatively abstract and seem to remain fairly constant across different generations. But with the rise of new social problems and the proliferation of various threats to the integrity of the nuclear family, the parenting strategies of a generation ago are not necessarily effective today. Parenting has also received growing amounts of attention from researchers, and what was once considered chiefly an art is now also recognized for being a science. Our knowledge of parenting has increased significantly in the last few decades, and new developments continue to be made daily. This reference book provides a comprehensive summary of what we know about parents and the parent-child relationship. Through more than 240 alphabetically arranged entries, the volume synthesizes the present state of research on parenting. Each entry is written by an expert contributor and provides an authoritative overview of a particular topic. Entries are related to child activity, child outcomes, child states, parent behaviors, parental situations, external and community factors, systemic concerns, the transition to parenthood, available resources, and a number of persons who have added to our knowledge of the field. The entries draw on a wide range of disciplines, including psychology, education, and sociology. Each entry closes with a brief bibliography, and the volume concludes with a selected list of works for further reading.

Society in Focus - William E. Thompson

2016-04-20

Examining the role of mass media and information technology in contemporary society, *Society In Focus*, Eighth Edition, emphasizes the increasing diversity and globalization of societies everywhere. It is designed to help students think clearly and critically about sociological issues, concepts, and methods. Questioning is at the heart of this approach, and as students read this book they are encouraged to become part of the sociological enterprise—rather than remain passive observers. Every element of the text is designed to challenge students to evaluate social issues and, guided by the sociological imagination, to clearly formulate their own positions. By asking questions that demand sociological and creative thought, students are reminded that their conclusions and decisions, as well as their non-decisions and inaction, may have important social consequences. New to this edition:

- New coauthor Mica Thompson, an experienced teacher of introduction to sociology, brings a fresh new perspective as well as a wide array of different life experiences to this edition of *Society in Focus*.
- An expanded critical analysis in Chapter 1 introduces all forms of media and technology, and every chapter examines an aspect of their powerful social influence.
- Chapters 9, 16, and 17 have been updated to include the most recent worldwide financial and economic developments, to help explain globalization and cultural diversity.
- Expanded application of feminist theory in every chapter to help students recognize the importance of gender diversity and the contributions of that theoretical perspective in sociology.
- Updated and brand new boxes throughout encourage students to take a closer look at society and selected social issues.

Parenting Matters - National Academies of Sciences, Engineering, and Medicine
2016-11-21

Decades of research have demonstrated that the parent-child dyad and the environment of the family—“which includes all primary caregivers”—are at the

foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Child Psychology - Lawrence Balter 1999

This handbook provides an up-to-date, representative overview of important topics in contemporary developmental psychology. *Counseling Adults in Transition, Fifth Edition* - Mary L Anderson, PhD, LPC, NCC
2021-09-15

The fifth edition of this authoritative text continues to provide expert guidance for counseling professionals working with adults who are coping with individual, relationship, and work transitions. Abundantly updated with new literature and resources, the book examines the most pressing life transition issues facing today's adults. It incorporates new and emerging theories and culturally sensitive strategies for counseling diverse clients, along with new case studies providing examples and practical applications. The fifth edition sheds light on the particular challenges of populations who may feel disempowered and marginalized, allowing for a deeper understanding of transition theory. Key themes include enhancing resilience and coping, illuminated by updated literature and discussion of applications of Schlossberg's theory and 4 S model--a model that offers effective techniques to understand and successfully navigate life transitions. Also addressed are the roles of hope, optimism, and mattering. The text deepens the discussion of race, ethnicity, sexual orientation, and social justice, along with intersectionality

regarding multiple identities as diverse individuals and their families navigate life transitions. It also highlights the role of escalating changes in the current global, political and socio-cultural landscape. Purchase includes digital access for use on most mobile devices or computers. New to the Fifth Edition: Focuses on the increasing importance of helping adults navigate transitions Integrates Schlossberg's unique transition model with both classic and emerging theories to guide adults in transition Discusses sociocultural and contextual factors in shaping the coping process Presents culturally sensitive strategies and interventions Emphasizes social justice concerns and advocacy on behalf of underrepresented populations Delivers rich and diverse case studies focused on transition issues Includes updated learning activities and exercises to enhance understanding

Psychodynamic Group Psychotherapy, Fifth Edition - J. Scott Rutan 2014-07-01

Practical topics discussed include patient selection and preparation, leadership issues, communication of affect in groups, dealing with "difficult" patients, time-limited groups, and facilitating successful terminations. A chapter-length case example with commentary from each author brings an entire group session to life and explores ways to handle common dilemmas. New to This Edition *Incorporates current theory (psychodynamic and interpersonal), which is grounded in clinical and neurobiological research *Every chapter revised and updated. *Chapter-length case example is entirely new. *Chapter on Frequently Asked Questions includes many new issues"-- Provided by publisher.

Crossing Cultures in the Language Classroom, Second Edition - Andrea DeCapua 2016-01-28

A MICHIGAN TEACHER TRAINING title Teachers are often in the forefront of today's cross-cultural contact, whether in the language classroom or in the K-12 or university/college classroom, but they are not always prepared to handle the various issues that can arise in terms of cross-cultural communication. The intent of this book is to make education in cross-cultural awareness accessible to a broad range of teachers working in a variety of educational settings. *Crossing Cultures in the Language Classroom* attempts to balance theory and practice for pre-service and in-service teachers in general education programs or in ESL/EFL, bilingual, and foreign language teacher training programs, as well as cross-cultural awareness workshops. This book is unique in that it combines theory with a wide range of experiential activities and projects designed to actively engage users in the process of understanding different aspects of cross-cultural awareness. The goals of the book are to help readers: expand cultural awareness of one's own culture and that of others achieve a deeper understanding of what culture is and the relationship between culture and language acquire the ability to observe behaviors in order to draw conclusions based on observation rather than preconceptions understand and implement observations of cultural similarities and differences develop an attitude of tolerance toward cultural differences and move away from the "single story." The new edition has been thoroughly updated and includes a Suggested Projects section in each chapter. This section provides opportunities for users of the text to explore in greater depth an area and topic of interest. It also includes even more Critical Incidents--brief descriptions of events that depict some element or elements of cultural differences, miscommunication, or culture clash. Critical Incidents develop users' ability to analyze and understand how multiple perspectives of the same situation are rooted in differing culturally influenced beliefs, behaviors, norms of interaction, and worldviews.

Our Social World - Jeanne H. Ballantine

2011-10-26

In this brief text, two leaders of the Teaching Sociology movement encourage students' development of their sociological imaginations through role-taking. Assuming the role of a child living in poverty in India or of a member of an African tribe, students learn to re-envision their global society. An innovative, integrated framework provides core sociological concepts, while features such as Contributing to Our Social World enable students to "do" public sociology. Our Social World: Condensed Version presents the perspective of students living in the larger global world.

Help for the Hurting Family - Larry E. Banta M.D. 2022-09-14

Families are the foundation of our culture and an integral part of our churches, but they face attacks from the world, the flesh, and Satan. Larry E. Banta, M.D., an experienced psychiatrist subspecialized in child and adolescent psychiatry, explores how to build a strong family in a chaotic world. He answers questions such as: Why is building a strong family an essential component of the Christian experience? How can we structure and maintain a family that will withstand the pressures of life and come out strong? Why should ministry to the family be one of the main activities of the local church? Often, parents are unable to fulfill the purpose of a family, or do not know how to build a strong family. This leaves children unable to secure a firm identity and self-concept. They often don't see the purpose of leaving home and being on their own, taking on the adult responsibilities of family and a job. Learn to build the family on the strong foundation of the Word of God and take on family challenges that the church sometimes misses with the wisdom in Help for the Hurting Family.

The Sociology of Sports - Tim Delaney 2021-08-19

This third edition takes a fresh approach to the study of sport, presenting key concepts such as socialization, race, ethnicity, gender, economics, religion, politics, deviance, violence, school sports and

sportsmanship. While providing a critical examination of athletics, this text also highlights many of sports' positive features. This new edition includes significantly updated statistics, data and information along with updated popular culture references and real-world examples. Newly explored is the impact of several major world events that have left lasting effects on the sports realm, including a global pandemic (SARS-CoV-2, or COVID-19) and social movements like Black Lives Matter and Me Too. Another new topic is the "pay for play" movement, wherein college athletes demanded greater compensation and, at the very least, the right to profit from their own names, images and likenesses.

Our Social World - Dr Jeanne H Ballantine
2011-04-25

The Third Edition of Our Social World: Introduction to Sociology is truly a coherent textbook that inspires students to develop their sociological imaginations, to see the world and personal events from a new perspective, and to confront sociological issues on a day-to-day basis. Key Features: * Offers a strong global focus: A global perspective is integrated into each chapter to encourage students to think of global society as a logical extension of their own micro world. * Illustrates the practical side of sociology: Boxes highlight careers and volunteer opportunities for those with a background in sociology as well as policy issues that sociologists influence. * Encourages critical thinking: Provides various research strategies and illustrates concrete examples of the method being used to help students develop a more sophisticated epistemology. * Presents "The Social World Model" in each chapter: This visually-compelling organizing framework opens each chapter and helps students understand the interrelatedness of core concepts. New to the Third Edition: * Thirty new boxed features, including the innovative 'Engaging Sociology' and 'Applied Sociologists at Work' features * Three substantially reorganised chapters (2. Examining the Social World, 3. Society and Culture, and 13. Politics and Economics) * 315 entirely new references and 120 new photos.

Licensing Parents - Jack C. Westman
1994-08-21

In 1991, the National Commission on Children called attention to the fact that a small but significant number of parents are failing to fulfill their basic childrearing responsibilities. Dr. Jack C. Westman, an esteemed child advocate, systematically connects the damage caused to children by the failings of those parents to our society's educational, health, safety, and economic problems. A small fraction of the population has reduced public safety to unacceptable levels of danger and sapped the productivity of the nation. These dangerous and dependent individuals are increasing in numbers that drain public funds and erode the productivity of our workforce. Licensing Parents: Can We Prevent Child Abuse and Neglect? is a provocative work that points the way to reversing these alarming trends. Dr. Westman stimulates thought about the enormous waste of human and economic resources that results from incompetent parents who spawn our society's criminal and welfare dependency problems. He also shows how competent parenting can override the adverse effects of brain damage, malnutrition, and poverty. By focusing attention on the controversial but eminently logical act of licensing parents, Dr. Westman challenges the United States to translate pro-children rhetoric into action that would indeed make a difference in the lives of our children. Licensing parents would symbolically set a societal standard that parents may raise their children as they desire as long as they do not damage their children's abilities to become contributing members of society. It would convey the message to all elements of society that childrearing is an important and valued responsibility and would heighten awareness of the importance of competent parenting to all of us. Most importantly, it would recognize children as human beings with basic civil rights. The author describes a multi-level approach to families that demonstrates society's respect for parenting and also provides help for foundering parents. He calls for national policies that

support rather than undermine parenting as they do now. He points to ways in which communities and neighborhoods can become places in which families and children can thrive. Licensing Parents urges concerned citizens, parents, professionals, and politicians to confront incompetent parenting before it is too late.

Handbook of Parenting - Marc H. Bornstein
2019-02-01

This highly anticipated third edition of the Handbook of Parenting brings together an array of field-leading experts who have worked in different ways toward understanding the many diverse aspects of parenting. Contributors to the Handbook look to the most recent research and thinking to shed light on topics every parent, professional, and policymaker wonders about. Parenting is a perennially "hot" topic. After all, everyone who has ever lived has been parented, and the vast majority of people become parents themselves. No wonder bookstores house shelves of "how-to" parenting books, and magazine racks in pharmacies and airports overflow with periodicals that feature parenting advice. However, almost none of these is evidence-based. The Handbook of Parenting is. Period. Each chapter has been written to be read and absorbed in a single sitting, and includes historical considerations of the topic, a discussion of central issues and theory, a review of classical and modern research, and forecasts of future directions of theory and research. Together, the five volumes in the Handbook cover Children and Parenting, the Biology and Ecology of Parenting, Being and Becoming a Parent, Social Conditions and Applied Parenting, and the Practice of Parenting. Volume 3, Being and Becoming a Parent, considers a large cast of characters responsible for parenting, each with her or his own customs and agenda, and examines what the psychological characteristics and social interests of those individuals reveal about what parenting is. Chapters in Part I, on The Parent, show just how rich and multifaceted is the constellation of children's caregivers. Considered first are

family systems and then successively mothers and fathers, coparenting and gatekeeping between parents, adolescent parenting, grandparenting, and single parenthood, divorced and remarried parenting, lesbian and gay parents and, finally, sibling caregivers and nonparental caregiving. Parenting also draws on transient and enduring physical, personality, and intellectual characteristics of the individual. The chapters in Part II, on Becoming and Being a Parent, consider the intergenerational transmission of parenting, parenting and contemporary reproductive technologies, the transition to parenthood, and stages of parental development, and then chapters turn to parents' well-being, emotions, self-efficacy, cognitions, and attributions as well as socialization, personality in parenting, and psychoanalytic theory. These features of parents serve many functions: they generate and shape parental practices, mediate the effectiveness of parenting, and help to organize parenting.

Community Health and Wellness - Anne McMurray 2015-02-10

Community Health & Wellness: Primary health care in practice, 5th Edition represents contemporary thinking and research in community health and wellness from Australia, New Zealand and the global community. It challenges students and health professionals to become more aware of the primary health care (PHC) environments in which they work in order to gain an understanding of what is socially determining the health of the individuals, families and communities within their care. Provides a focus on primary health care practice in Australia and New Zealand Research and evidence-based practice throughout each chapter Group exercises that can be used in practice or tutorial groups Reflective questions to challenge the understanding of key principles and practice Additional resources for lecturers via Evolve. Two new chapters: Chapter 3 Assessing the Community Chapter 6 Working in groups The SDH Assessment Circle - a new model for community assessment Stronger emphasis on working with migrant and refugee families A new continuous case study - The Mason and Smith families *Special Education in Contemporary Society* - Richard M. Gargiulo 2014-07-09 Grounded in research and expanding on current trends and contemporary issues, the new edition of Gargiulo's text provides an easy-to-read introduction to special education.

The Developing Person Through Childhood, Fifth Edition - Kathleen Stassen Berger 2002-10-15

New edition of Berger's acclaimed, bestselling text for chronologically organized courses focus strictly on the childhood years.

Power and Parenting - K. Bonner 1998-09-14 The power to act is two-sided in that it refers to the parent's ability to initiate (having children or responding to their actions) and to the ability to suffer consequences (irreversibility and unpredictability). The book argues that the

best way of responding to these essential limits is for the parent to develop the interrelation between wisdom, ethicality and self-mastery, that is, practical wisdom.

NurtureShock - Po Bronson 2009-09-03

In a world of modern, involved, caring parents, why are so many kids aggressive and cruel? Where is intelligence hidden in the brain, and why does that matter? Why do cross-racial friendships decrease in schools that are more integrated? If 98% of kids think lying is morally wrong, then why do 98% of kids lie? What's the single most important thing that helps infants learn language? NurtureShock is a groundbreaking collaboration between award-winning science journalists Po Bronson and Ashley Merryman. They argue that when it comes to children, we've mistaken good intentions for good ideas. With impeccable storytelling and razor-sharp analysis, they demonstrate that many of modern society's strategies for nurturing children are in fact backfiring--because key twists in the science have been overlooked. Nothing like a parenting manual, the authors' work is an insightful exploration of themes and issues that transcend children's (and adults') lives.

Exploring Best Child Development Practices in Contemporary Society - Silton, Nava R. 2020-03-13

Parents and teachers require a greater understanding of child development and of evidence-based research practices for how to best raise successful, emotionally intelligent, kind, and empathetic children in contemporary society. Hands-on practical advice is needed to foster such attributes during child development in order to raise happy, healthy, and successful children regardless of their backgrounds, abilities, or preferences. Exploring Best Child Development Practices in Contemporary Society is a critical scholarly publication that strengthens and optimizes parenting capacity by sharing research-based methods for a better understanding of the constructs of kindness, empathy, emotional intelligence, grit, and bullying preventive and intervention efforts and offers tools that

cultivate these important qualities in today's children. Moreover, the text delves into best rearing practices for raising children with disabilities and children on the LGBTQ spectrum. Featuring a range of topics including child development, media diet, and physical development, this book is ideal for teachers, psychologists, therapists, researchers, academicians, practitioners, and students.

New references added to the useful Additional Resources section. School and Society, Fifth Edition uses realistic case studies, dialogues, and open-ended questions designed to stimulate thinking about problems related to school and society, including curriculum reform, social justice, and competing forms of research. Written in a style that speaks directly to today's educator, this book tackles such crucial questions as: Do schools socialize students to become productive workers? • Does schooling reproduce social class and pass on ethnic and gender biases? • Can a teacher avoid passing on dominant social and cultural values? • What besides subjects do students really learn in schools? School and Society is one of the five books in the highly regarded Teachers College Press Thinking About Education Series, now in its Fifth Edition. All of the books in this series are designed to help pre- and in-service teachers bridge the gap between theory and practice. Praise for Previous Editions! The Mythology of Crime and Criminal Justice - Victor E. Kappeler 2017-07-18

The social construction of crime is often out of proportion to the threat posed. The media and advocacy groups shine a spotlight on some crimes and ignore others. Street crime is highlighted as putting everyone at risk of victimization, while the greater social harms from corporate malfeasance receive far less attention. Social arrangements dictate what is defined as crime and the punishments for those who engage in the proscribed behavior. Interest groups promote their agendas by appealing to public fears. Justifications often have no basis in fact, but the public accepts the exaggerations and blames the targeted offenders. The net-widening effect of more laws and more punishment catches those least able to defend themselves. This innovative alternative to traditional textbooks provides insightful observations of myths and trends in criminal justice. Fourteen chapters challenge misconceptions about specific crimes or aspects of the criminal justice system. Kappeler and Potter dissect popular images of crimes and criminals in a cogent, compelling, and engaging manner. They trace the social construction of each issue and identify the misleading statistics and fears that form the basis of myths—and the collateral damage of basing policies on

mythical beliefs. The authors encourage skepticism about commonly accepted beliefs, offer readers a fresh perspective, and urge them to analyze important issues from novel vantage points.

Immigrant Families in Contemporary Society - Jennifer E. Lansford 2007

How do some families successfully negotiate the linguistic, cultural, and psychological challenges of immigration, while others struggle to acculturate? This timely volume explores the complexities of immigrant family life in North America and analyzes the individual and contextual factors that influence health and well-being.

Synthesizing cutting-edge research from a range of disciplines, the book addresses such key topics as child development, school achievement, and the cultural and religious contexts of parenting. It examines the interface between families and broader systems, including schools, social services, and intervention programs, and discusses how practices and policies might be improved to produce optimal outcomes for this large and diverse population.

Handbook of Parent-Implemented Interventions for Very Young Children with Autism - Michael Siller 2018-08-09

This handbook offers practical strategies and evidence-based parent-implemented interventions for very young children with autism spectrum disorder (ASD). It explores this important subject within the context of rapidly increasing numbers of toddlers who are diagnosed with ASD during the second year of life. The handbook discusses how parents of young children with ASD can effectively be supported, taught, and coached to implement evidence-based parenting strategies and intervention techniques, and describes a broad range of developmentally appropriate programs at the family, community, and service delivery levels. In addition, the handbook examines

individual differences in parenting cognitions, emotions, and practices and proposes strategies for supporting the varying capacities of diverse families to meet the needs of young children with ASD. Chapters provide diverse coverage, spanning cultural/socio-economic differences as well as differences in family structure; parenting cognitions, emotions, and practices; parental learning styles; and access to social support. Featured topics include: Supporting families of high-risk infants who have an older sibling with ASD. The use of video feedback strategies in parent-mediated early ASD intervention. The Incredible Years (IY) Parent Program for preschool children with ASD and language delays. Self-help for parents of children with ASD. The Family Implemented TEACCH for Toddlers (FITT) support model. Parent-implemented interventions for underserved families in Taiwan. Family and provider-based interventions in South Asia. The Handbook of Parent-Implemented Interventions for Very Young Children with Autism is a must-have resource for researchers, clinicians/professionals, and graduate students in clinical child, school, and developmental psychology, family studies, behavioral therapy, and social work as well as rehabilitation medicine/therapy, child and adolescent psychiatry, pediatrics, and special education/educational psychology.

Through the Eyes of Parents, Children, and a Coach - Steven Aicinena 2002

Writing for coaches and parents involved in youth sport, Aicinena (kinesiology, U. of Texas at Permian Basin) examines, through a sociological lens, the roots of conflicts that commonly occur in an athletic arena. He argues that different individuals view athletics through different sports participation models. His goal is to describe the models and explain how they are conditioned by socialization. Recognition of the models should serve to minimize conflict. Aicinena has been a researcher, parent, and coach for 14 years. Annotation copyrighted by Book News, Inc., Portland, OR.
