Linking Theory and Practice to Eliminate the Worst Forms of Child Labor - 2006

Negotiation and Persuasion - Marco Behrmann 2016-12-19

How to be more persuasive and successful in negotiations: the science of winning people over with a fair and cooperative attitude Scientific research shows that the most successful negotiators analyze the situation thoroughly, self-monitor wisely, are keenly aware of interpersonal processes during the negotiation – and, crucially, enter negotiations with a fair and cooperative attitude. This book is a clear and compact guide on how to succeed by means of such goal-oriented negotiation and cooperative persuasion. Readers learn models to understand and describe what takes place during negotiations, while numerous figures, charts, and checklists clearly summarize effective strategies for analyzing context, processes, competencies, and the impact of our own behavior. Real-life case examples vividly illustrate the specific measures individuals and teams can take to systematically improve their powers of persuasion and bargaining strength. The book also describes a modern approach to raising negotiation competencies as part of personnel

development, making it suitable for use in training courses as well as for anyone who wants to be a more persuasive and successful negotiator.

Learning How to Learn - Barbara Oakley, PhD 2018-08-07

A surprisingly simple way for students to master any subject--based on one of the world's most popular online courses and the bestselling book *A Mind for Numbers* *A Mind for Numbers* and its wildly popular online companion course "Learning How to Learn" have empowered more than two million learners of all ages from around the world to master subjects that they once struggled with. Fans often wish they'd discovered these learning strategies earlier and ask how they can help their kids master these skills as well. Now in this new book for kids and teens, the authors reveal how to make the most of time spent studying. We all have the tools to learn what might not seem to come naturally to us at first--the secret is to understand how the brain works so we can unlock its power. This book explains: • Why sometimes letting your mind wander is an important part of the learning process • How to avoid "rut think" in order to think outside the box • Why having a poor memory can be a good thing • The value of metaphors in developing understanding • A simple, yet

powerful, way to stop procrastinating Filled with illustrations, application questions, and exercises, this book makes learning easy and fun.

Designing and Implementing Health Care Provider Payment Systems - Jack Langenbrunner 2009-01-01

Strategic purchasing of health services involves a continuous search for the best ways to maximize health system performance by deciding which interventions should be purchased, from whom these should be purchased, and how to pay for them. In such an arrangement, the passive cashier is replaced by an intelligent purchaser that can focus scarce resources on existing and emerging priorities rather than continuing entrenched historical spending patterns. Having experimented with different ways of paying providers of health care services, countries increasingly want to know not only what to do when paying providers, but also how to do it, particularly how to design, manage, and implement the transition from current to reformed systems. 'Designing and Implementing Health Care Provider Payment Systems: How-To Manuals' addresses this need. The book has chapters on three of the most effective provider payment systems: primary care per capita (capitation) payment, case-based hospital payment, and hospital global budgets. It also includes a primer on a second policy lever used by purchasers, namely, contracting. This primer can be especially useful with one provider payment method: hospital global budgets. The volume's final chapter provides an outline for designing, launching, and running a health management information system, as well as the necessary infrastructure for strategic purchasing.

Psychology for Psychologists - Stelios Georgiades 2015-08-11

This book uses psychological theories and learning processes, such as Problem Based Learning (PBL), to provide a new approach for teaching psychology at an undergraduate level and prevent

Forensic Accounting and Fraud Examination - Mary-Jo Kranacher 2019-05-14

Forensic Accounting and Fraud Examination introduces students and professionals to the world of fraud detection and deterrence, providing a solid foundation in core concepts and methods for both public and private sector environments. Aligned with the National Institute of Justice (NIJ) model curriculum, this text provides comprehensive and up-to-date coverage of asset misappropriation, corruption, fraud, and other topics a practicing forensic accountant encounters on a daily basis. A focus on real-world practicality employs current examples and engaging case studies to reinforce comprehension, while in-depth discussions clarify technical concepts in an easily relatable style. End of chapter material and integrated IDEA and Tableau software cases introduces students to the powerful, user-friendly tools accounting professionals use to maximize auditing and analytic capabilities, detect fraud, and comply with documentation requirements, and coverage of current methods and best practices provides immediate relevancy to real-world scenarios. Amidst increased demand for forensic accounting skills, even for entry-level accountants, this text equips students with the knowledge and skills they need to successfully engage in the field.

Industrial Clusters and Micro and Small Enterprises in Africa - World Bank 2010-12-30

The World Bank, Japan International Cooperation Agency (JICA) Research Institute, and the Foundation for Advanced Studies on International Development (FASID), in collaboration with researchers affiliated with the African Economic Research Consortium (AERC), recently conducted a study on Africa's domestic enterprises to improve the understanding of the constraints micro and small enterprises in Africa face in improving productivity and expanding their markets. In Africa, there are stark performance gaps between domestically owned enterprises and foreign-owned enterprises in terms of sales performance, productivity, and ability to reach distant markets. Among others, size appears to be a dominant factor in explaining the gap. Against this background, the study analyzes how naturally formed industrial clusters concentrations of enterprises engaged in same or closely related industrial activities in specific locations could potentially mitigate constraints Africa's micro and small enterprises face and enhance their business performance. The study is one of the first comprehensive quantitative inquiries on industrial clusters in Africa. The analysis specifically focuses on the role of spontaneously grown clusters of light manufacturing industries based on a set of original case studies of industrial clusters conducted for this research project. One of the key findings from the case studies was that cluster-based micro and small enterprises are performing better than similar micro and small enterprises outside

of the clusters in terms of sales performance and ability to reach distant markets. Market access is a leading reason for cluster-based enterprises to choose their current locations. However, cluster-based enterprises face another set of unique growth constraints. By the very nature of spontaneous agglomeration, new enterprises continue to flow to the clusters seeking the profit opportunities and better access to markets at such locations. The result can be intense competition in addition to increased congestion. Space constraints often impede growth within clusters. The lack of alternative locations available for industrial activities in the same cities, generic infrastructure bottlenecks, and unclear zoning policies and their unpredictable changes limit firms location choices and constrain their mobility. While competition should improve efficiency, lack of capacity among those competing cluster-based enterprises to invest and innovate does not generate growth out of the competition. The vast majority of naturally formed clusters of light manufacturing industries in Africa are still at a survival level, where agglomeration externalities are only limited to expand quantity but not quality as we observe in more advanced innovation-oriented clusters in elsewhere in the world. Existing studies on such natural industrial clusters in Africa have found that the lack of managerial skills among entrepreneurs running micro and small enterprises is a major constraint for innovation and growth in the clusters. As a part of this study, pilot managerial skills training programs were conducted in two industrial clusters on an experimental basis, where a group of randomly selected entrepreneurs within the clusters were given three-week long crash course of based management such as bookkeeping, marketing, business planning, and production management. The impact evaluation of the experiments showed significant positive impacts of the training programs on value added and gross profits of enterprises. Raising the current survival-type industrial clusters, which have been

formed as a coping mechanism to weak investment climate, into more dynamic innovating clusters will be an important avenue for fostering growth of micro and small enterprises in Africa. While national efforts to improve investment climate and investments in human capital are undoubtedly important, there could be more targeted policies to be formulated, in complementing general policies, to support growth of micro and small domestic enterprises using existing industrial clusters as a natural springboard for their growth. In that context, the study discusses the merit of cluster-based managerial human capital development to build steps toward more innovation-oriented clusters, the importance of sound spatial planning policy, particularly at the local level in the context of urban planning, the need to expand market access and economic linkages for industrial clusters including regional integration and linkages with large enterprises.

How People Learn - National Research Council 2000-08-11

First released in the Spring of 1999, How People Learn has been expanded to show how the theories and insights from the original book can translate into actions and practice, now making a real connection between classroom activities and learning

behavior. This edition includes far-reaching suggestions for research that could increase the impact that classroom teaching has on actual learning. Like the original edition, this book offers exciting new research about the mind and the brain that provides answers to a number of compelling questions. When do infants begin to learn? How do experts learn and how is this different from non-experts? What can teachers and schools do-with curricula, classroom settings, and teaching methods--to help children learn most effectively? New evidence from many branches of science has significantly added to our understanding of what it means to know, from the neural processes that occur during learning to the influence of culture on what people see and absorb. How People Learn examines these findings and their implications for what we teach, how we teach it, and how we assess what our children learn. The book uses exemplary teaching to illustrate how approaches based on what we now know result in in-depth learning. This new knowledge calls into question concepts and practices firmly entrenched in our current education system. Topics include: How learning actually changes the physical structure of the brain. How existing knowledge affects what people notice and how they learn. What the thought processes of experts tell us about how to teach. The amazing learning potential of infants. The relationship of classroom learning and everyday settings of community and workplace. Learning needs and opportunities for teachers. A realistic look at the role of technology in education.

The International Baccalaureate Diploma Programme - Tim Pound 2006-05-02

The International Baccalaureate (IB) is a respected qualification gaining increasing currency around the world, and which has been adopted by a wide variety of schools, both public and private. In the UK, growing dissatisfaction with the A-level system has led to an intense debate about alternative qualifications, and in many schools IB courses have been introduced alongside conventional A-level courses. This practical introduction to the IB takes a balanced look at the pros and cons and features a wealth of advice from those actually involved in teaching and implementing it in schools. Providing comparative material on how IB courses differ from A-levels and a subject-by-subject account of best practice in teaching the IB, this book offers a rich source of practical advice for teachers, school leaders or managers involved in teaching or implementing the IB programmes.

Project Management the Agile Way, Second Edition - John C. Goodpasture
2015-11-01

“...a well written and content rich book. From a teacher's perspective, using this book in an advanced project management seminar challenges students to understand the application of these concepts.”
—Alexander Walton, PMP, IT consultant to the University of California at Berkeley
Widely acclaimed as one of the top agile books in its first edition, Project Management the Agile Way has now been updated and redesigned by popular demand. This second edition is in a modular format to facilitate training and advanced course instruction, and provides new coverage of agile, such as hybrid agile methods, the latest public sector practices, and a chapter dedicated to transitioning to agile. It discusses the “grand bargain” between project management and business; the shift in dominance from plans to product and from input to output; and introduces new concepts such as return on benefit. Experienced practitioners and students that want to learn how to make agile work effectively in the enterprise should read this book. Individuals preparing for the PMI Agile Certified Practitioner (PMI-ACP)® examination, and training providers developing courses, will find this second edition quite helpful.

English Language Arts, Grade 11

Module 1 - PCG Education 2015-12-17

Paths to College and Career Jossey-Bass and PCG Education are proud to bring the Paths to College and Career English Language Arts (ELA) curriculum and professional development resources for grades 6–12 to educators across the country. Originally developed for EngageNY and written with a focus on the shifts in instructional practice and student experiences the standards require, Paths to College and Career includes daily lesson plans, guiding questions, recommended texts, scaffolding strategies and other classroom resources. Paths to College and Career is a concrete and practical ELA instructional program that engages

students with compelling and complex texts. At each grade level, Paths to College and Career delivers a yearlong curriculum that develops all students' ability to read closely and engage in text-based discussions, build evidence-based claims and arguments, conduct research and write from sources, and expand their academic vocabulary. Paths to College and Career's instructional resources address the needs of all learners, including students with disabilities, English language learners, and gifted and talented students. This enhanced curriculum provides teachers with freshly designed Teacher Guides that make the curriculum more accessible and flexible, a Teacher Resource Book for each module that includes all of the materials educators need to manage instruction, and Student Journals that give students learning tools for each module and a single place to organize and document their learning. As the creators of the Paths ELA curriculum for grades 6–12, PCG Education provides a professional learning program that ensures the success of the curriculum. The program includes: Nationally recognized professional development from an organization that has been immersed in the new standards since their inception. Blended learning experiences for teachers and leaders that enrich and extend the learning. A train-the-trainer program that builds capacity and provides resources and individual support for embedded leaders and coaches. Paths offers schools and districts a unique approach to ensuring college and career readiness for all students, providing state-of-the-art curriculum and state-of-the-art implementation.

Women, Entrepreneurship and Development in the Middle East -

Beverly Dawn Metcalfe 2021-12-20

The Middle East was the region least impacted in the 2008 crisis, has investment systems markedly different to the West, is largely governed by Islamic Shari'a, and has varying forms of governance and

institutional organization, which are not understood by many, nor how these systems shape entrepreneurial and industrial development. While the Middle East as a region has seen a small growth in entrepreneurship for women, and business scholarship on the Middle East has grown, there is no text in English that has brought critical insights from the Middle East together in a single volume. In examining women's entrepreneurship in the Middle East, this book aims to challenge Global North assumptions about the disempowering impacts of Islamic Shari'a and governance. Referring to the constraints of Islam on women's subjectivity and agency greatly misunderstands religious identity, of both men and women, and the way in which public administration and private sector institutions are organized in very different ways to Western regions. This timely text expands and adds new insights to the theorizations of women's entrepreneurship in the Middle East, through unravelling spatialized themes, and incorporates contemporary themes including: an Islamic science reading of women, work and venturing; changing families and entrepreneurship development; women managing social crises; Islamization, governance and women; Islamic feminist activism and entrepreneurship; representations of women's entrepreneurship on social media; and women's collectives leading entrepreneurship via Facebook entrepreneurship. It will be of interest to researchers, academics, and students in the fields of entrepreneurship, gender, work and organizations.

Preparing Students for Community-Engaged Scholarship in Higher

Education - Zimmerman, Aaron Samuel
2020-02-01

Community-engaged scholarship is an equitable and democratic approach to scholarship that seeks to identify and solve community-based problems. Community-engaged scholars aim to serve the public good by developing and sustaining community-campus partnerships built on trust, reciprocity, and mutual benefit. As universities orient themselves towards serving the public good, they face a number of challenges: faculty and students may not possess the competencies or commitment to build fruitful community partnerships, graduate and undergraduate students may lack the necessary training and mentorship required to develop their identity as community-engaged scholars, and institutional leaders may not know how to motivate faculty and students for this ambitious and challenging endeavor. Unless these challenges are addressed, universities will fail to prepare the next generation of community-engaged scholars. *Preparing Students for Community-Engaged Scholarship in Higher Education* is an essential research book that explores how faculty and academic leaders can create learning opportunities and intellectual cultures that support the development of community-engaged scholars. Additionally, it will examine how university coursework can help undergraduate and graduate students to develop the knowledge, skills, and commitments necessary for productive and responsible community-engaged scholarship. Featuring a range of topics such as mentorship, higher education, and service learning, this book is ideal for higher education faculty, university leaders, deans, chairs, educators, administrators, policymakers, curriculum designers, academicians, researchers, and students.
