investigative teams at the University of Iowa, NOC and NIC Linkages to NANDA-I and Clinical Conditions: Supporting Critical Thinking and Quality Care, 3rd Edition is the only book on the market that provides linkages between the three standardized languages recognized by the American Nurses Organization (NOC, NIC, and all of the 2009-2010 NANDA-I approved nursing diagnoses). Its user-friendly, tabular format and real-world case studies make it the perfect tool to help you develop effective care plans for your patients. This edition features a new chapter on clinical decision making, a new chapter on the use of NNN in information systems, more concise intervention listings that identify major and suggested interventions, and approximately 20 new

linkages to common, high-cost medical diagnoses. Linkages between the three standardized languages recognized by the American Nurses Organization: NANDA-I, Nursing Interventions Classification (NIC), and Nursing Outcomes Classification (NOC) help you select the most effective care plans for patients and allow institutions to track and quantify nursing care. Tabular format allows you to quickly retrieve information. Case studies with nursing care plans demonstrate the practical, real-life application of linkages. Definitions of all NANDA-I, NOC, and NIC labels provide comprehensive coverage of the standardized languages. Serves as an excellent companion to Nursing Outcomes Classification (NOC),

definitive guidance on nursing diagnosis, its role in the nursing process, and its application to clinical practice. Nursing diagnoses define the science and art of nursing; this vital book gives nurses-in-training the information they need for creative clinical nursing practice from assessment criteria to specific interventions Highlights of the 15th Edition: A comprehensive A-to-Z guide to current nursing diagnoses includes the most recent diagnoses approved by NANDA International. Nursing Interventions Classifications (NIC) and Nursing Outcomes Classifications (NOC) are listed for every NANDA-I diagnosis; NANDA-I diagnoses have been updated. Author's Notes and Errors in Diagnostic Statements help students understand

the concept behind the diagnosis, differentiate one diagnosis from another, and avoid diagnostic errors. "Carp's Cues" appear throughout and consist of notes from the author to emphasize a certain principle of care, a controversial issue, or an ethical challenge. Key Concepts and Interventions are grouped by specific population--older adult, child, maternal, and transcultural--to help clarify the differences between the client groups. Section 3: Manual of Collaborative Problems shows how to integrate nursing care and diagnosis with the efforts of other healthcare professionals for optimum care of the client. A Nursing Diagnosis Index provides an at-a-glance, alphabetical reference that makes finding diagnoses quick and

easy.

Nursing Diagnoses

2012-14 - NANDA

International 2014-02-05

A nursing diagnosis is defined as a clinical judgment about individual, family or community responses to actual or potential health problems or life processes which provide the basis for selection of nursing interventions to achieve outcomes for which the nurse has accountability (NANDA-I, 2009). Accurate and valid nursing diagnoses guide the selection of interventions that are likely to produce the desired treatment effects and determine nurse-sensitive outcomes. Nursing

diagnoses are seen as key to the future of evidence-based, professionally-led nursing care – and to more effectively meeting the need of patients. In an era of increasing electronic patient health records, standardized nursing terminologies such as NANDA-I, NIC and NOC provide a means of collecting nursing data that are systematically analysed within and across healthcare organizations and provide essential data for cost/benefit analysis and clinical audit. Nursing Diagnoses: Definitions and Classification is the definitive guide to nursing diagnoses, as reviewed and approved by NANDA-I. Each nursing diagnosis undergoes a rigorous assessment process by NANDA-I's Diagnosis Development Committee, with

stringent criteria used to indicate the strength of the underlying level of evidence. Each diagnosis comprises a label or name for the diagnosis, a definition, defining characteristics, risk factors and/or related factors. Many diagnoses are further qualified by terms such as risk for, effective, ineffective, impaired, imbalanced, self-care deficit, readiness for, disturbed, decreased, etc. The 2012-2014 edition is arranged by concept according to Taxonomy II domains, i.e. Health promotion, Nutrition, Elimination and exchange, Activity/Rest, Perception/Cognition, Self-perception, Role relationships, Sexuality, Coping/ Stress tolerance, Life principles, Safety/protection, Comfort, and

Growth/development. The 2012-2014 edition contains revised chapters on NANDA-I taxonomy, and slotting of diagnoses into NANDA & NNN taxonomies, diagnostic reasoning & conceptual clarity, and submission of new/revised diagnoses. New chapters are provided on the use of nursing diagnoses in education, clinical practice, electronic health records, nursing & health care administration, and research . A companion website hosts related

resources.
