Teaching Social Studies to English Language Learners - Bárbara Cruz 2013

Teaching Social Studies to English Language Learners provides readers with a comprehensive understanding of both the challenges that face English language learners (ELLs) and ways in which educators might address them in the social studies classroom. The authors offer context-specific strategies for the full range of the social studies curriculum, including geography, U.S. history, world history, economics, and government.

These practical instructional strategies will effectively engage learners and can be incorporated as a regular part of instruction in any classroom. An annotated list of web and print resources completes the volume, making this a valuable reference to help social studies teachers meet the challenges of including all learners in effective instruction. Features and updates to this new edition include: • An updated and streamlined Part 1 provides an essential overview of ELL theory in a social studies specific-context. • "Teaching Tips" offer helpful suggestions and ideas for creating and modifying lesson plans to be inclusive of ELLs. • Additional practical examples and new pedagogical elements in Part 3 include more visuals, suggestions for harnessing new technologies, discussion questions, and reflection points. • New material that takes into account the demands of the Common Core State Standards, as well as updates to the web and print resources in Part 4.

Oxford Latin Course - M. G. Balme 1999-06

Designed for North American students, this special version of the Oxford Latin Course combines the best features of both modern and traditional methods of Latin teaching, providing an exciting, stimulating introduction and approach to Latin based on the reading of original texts. In this four-volume North American edition, the order of declensions corresponds to customary U.S. usage, and the spelling has been Americanized. In addition, it offers full-color illustrations and photographs throughout Parts I and II and an expanded Teacher's Book with translations for each part. Parts I-III (now available in hardcover editions) are built around a narrative detailing the life of Horace, now based more closely on historical sources, which helps students to get to know real Romans--with their daily activities, concerns, and habits--and to develop an understanding of Roman civilization during the time of Cicero and Augustus. Part IV (paperback) is a reader consisting of extracts from Caesar, Cicero, Catullus, Virgil, Livy, and Ovid. The second edition of the Oxford Latin Course has been carefully designed to maximize student interest, understanding, and competence. It features a clearer presentation of grammar, revised narrative passages, new background sections, more emphasis on daily life and on the role of women, a greater number and variety of exercises, and review chapters and tests. Each chapter opens with a set of cartoons with Latin captions that illustrate new grammar points. A Latin reading follows, with new vocabulary highlighted in the margins and follow-up exercises that focus on reading comprehension and grammatical analysis. A background essay in English concludes each chapter. Covering a variety of topics--from history to food, from slavery to travel, these engaging essays present a well-rounded picture of Augustan Rome. The Oxford Latin Course, Second Edition offers today's students and teachers an exceptionally engaging and attractive introduction to the language,

literature, and culture of Rome--one that builds skills effectively and is exciting to use.

Semantics - James R. Hurford 2007-04-19

This practical coursebook introduces all the basics of semantics in a simple, step-by-step fashion. Each unit includes short sections of explanation with examples, followed by stimulating practice exercises to complete in the book. Feedback and comment sections follow each exercise to enable students to monitor their progress. No previous background in semantics is assumed, as students begin by discovering the value and fascination of the subject and then move through all key topics in the field, including sense and reference, simple logic, word meaning and interpersonal meaning. New study guides and exercises have been added to the end of each unit to help reinforce and test learning. A completely new unit on non-literal language and metaphor, plus updates throughout the text significantly expand the scope of the original edition to bring it up-to-date with modern teaching of semantics for introductory courses in linguistics as well as intermediate students.

PACE Yourself - Teresa Sproul Dalle 2003

PACE Yourself is for inexperienced or volunteer tutors of ESL. This handbook does not aim to make overnight experts of novices. Rather, the authors provide an easy-to-follow guide for people who want to tutor small groups of nonnative speakers of English but do not know how. Reproducible forms, appendixes of resources, terminology, ESL publishers, and professional organizations of interest to ESL tutors add relevant, useful information. This handbook is designed to meet your needs as a beginning tutor of ESL. It should be a key to many hours of rewarding and successful tutoring.

An Introduction to Language and Linguistics - Ralph Fasold 2006-03-06

This accessible textbook is the only introduction to linguistics in which each chapter is written by an expert who teaches courses on that topic, ensuring balanced and uniformly excellent coverage of the full range of modern linguistics. Assuming no prior knowledge the text offers a clear introduction to the traditional topics of structural linguistics (theories of sound, form, meaning, and language change), and in addition provides full coverage of contextual linguistics, including separate chapters on discourse, dialect variation, language and culture, and the politics of language. There are also up-to-date separate chapters on language and the brain, computational linguistics, writing, child language acquisition, and second-language learning. The breadth of the textbook makes it ideal for introductory courses on language and linguistics offered by departments of English, sociology, anthropology, and communications, as well as by linguistics departments.

Human Dimension and Interior Space - Julius Panero 2014-01-21

The study of human body measurements on a comparative basis is known as anthropometrics. Its applicability to the design process is seen in the physical fit, or interface, between the human body and the various components of interior space. *Human Dimension and Interior Space* is the first major anthropometrically based reference book of design standards for use by all those involved with the physical

planning and detailing of interiors, including interior designers, architects, furniture designers, builders, industrial designers, and students of design. The use of anthropometric data, although no substitute for good design or sound professional judgment should be viewed as one of the many tools required in the design process. This comprehensive overview of anthropometrics consists of three parts. The first part deals with the theory and application of anthropometrics and includes a special section dealing with physically disabled and elderly people. It provides the designer with the fundamentals of anthropometrics and a basic understanding of how interior design standards are established. The second part contains easy-to-read, illustrated anthropometric tables, which provide the most current data available on human body size, organized by age and percentile groupings. Also included is data relative to the range of joint motion and body sizes of children. The third part contains hundreds of dimensioned drawings, illustrating in plan and section the proper anthropometrically based relationship between user and space. The types of spaces range from residential and commercial to recreational and institutional, and all dimensions include metric conversions. In the Epilogue, the authors challenge the interior design profession, the building industry, and the furniture manufacturer to seriously explore the problem of adjustability in design. They expose the fallacy of designing to accommodate the so-called average man, who, in fact, does not exist. Using government data, including studies prepared by Dr. Howard Stoudt, Dr. Albert Damon, and Dr. Ross McFarland, formerly of the Harvard School of Public Health, and Jean Roberts of the U.S. Public Health Service, Panero and Zelnik have devised a system of interior design reference standards, easily understood through a series of charts and situation drawings. With *Human Dimension and Interior Space*, these standards are now accessible to all designers of interior environments.

A Taxonomy for Learning, Teaching, and Assessing - Lorin W. Anderson 2001

This revision of Bloom's taxonomy is designed to help teachers understand and implement standards-based curriculums. Cognitive psychologists, curriculum specialists, teacher educators, and researchers have developed a two-dimensional framework, focusing on knowledge and cognitive processes. In combination, these two define what students are expected to learn in school. It explores curriculums from three unique perspectives-cognitive psychologists (learning emphasis), curriculum specialists and teacher educators (C & I emphasis), and measurement and assessment experts (assessment emphasis). This revisited framework allows you to connect learning in all areas of curriculum. Educators, or others interested in educational psychology or educational methods for grades K-12.
