Seventy Years of Farm Tractors 1930-2000 - Brian Bell 2020-02-20

By the end of the twentieth century there were some half-million tractors on British farms - more machines than people to drive them. Brian Bell's

encyclopaedic book traces the evolution of the farm tractor from the days of starting handle and pan seat to current 4-wheel drive machines with air-conditioned cabs and computer management systems. He deals in particular with developments of the classic period from the 1950s to the 1990s. The book is arranged alphabetically by manufacturer from Allis-Chalmers to Zetor, one hundred marques in total. These are all machines to be found on British farms irrespective of their country of manufacture.

Brian runs concisely through the histories of the companies and their major models, illustrated with a wealth of photographs and extracts from sales literature. He adds some special features on items such as hydraulic systems and cold-starting aids. He includes a glossary and full index. This book replaces the author's earlier, successful, *Fifty Years of Farm Tractors*. Many of the photographs are new and the text has been brought up to date to include developments of the early twenty-first century.

Two Suitcases - Mike Bellis 2018-06-28

It is 1980 and Rhodesias flag, proudly flown for fifteen years, no longer exists. In the wake of a cruel Bush War, Rhodesia has succumbed to Mugabes Black Nationalism. Whites are enjoying a fulfilling existence

without any idea that Zimbabwe will soon descend into an abyss of corruption, incompetence, and mismanagement. The Morgans and Krugers are like all the other white Rhodesians carving out a new life in Zimbabwe. James and Suzette Morgan and their two children have moved onto Andriess farm, Slagters Nek, and are renovating it after its dereliction during the Bush War. Andries and Colleen have moved to Durban, South Africa, and are living off their payments from James. Gareth and Barbara have retired and are looking forward to relying on his comfortable, government pension for income. Eric and his new wife, Maisie, have put down roots in South Africa. But everything is about to change when Mugabe notices his popularity diminishing and sets off a chain of events with dire consequences that affects all of them. *Two Suitcases: Descent in Darkness* shares the compelling saga of two families as they attempt to move forward after the events of the Bush War lead to the founding of Zimbabwe.

The Big Book of Massey Tractors - Robert N. Pripps 2006

This is the first full-scale history of one of the largest farm tractor manufacturers of all time, peppered with pictures of Massey-Harris, Ferguson, and Massey Ferguson's historic models, collectibles, sales memorabilia, and advertisements from old farm magazines. *The Big Book of Massey Tractors* tells the story of the mergers and machines that formed Massey Ferguson over several decades, and—because these machines dominated Canadian farms for almost a century—in many ways

it also tells the story of Canadian agriculture. Robert Pripps, a longtime tractor aficionado, describes Massey Ferguson's battle with Ford over dominance of the farm tractor industry—a battle the company eventually won, remarkably enough, in view of its initial abject market failure with tractors. From the company's beginnings in 1891, to its 1953 merger with the Ferguson tractor company, to its current ownership by Allis-Gleaner Company (AGCO), Masseys have played a large role in our agricultural history. The Big Book of Massey Tractors celebrates that role and showcases the machines that have helped turn the earth for over a hundred years.
