Art, Theory and Practice in the Anthropocene - Julie Reiss 2019-03-31
Art, Theory and Practice

in the Anthropocene contributes to the growing literature on artistic responses to global climate change and its consequences. Designed to include multiple perspectives, it contains essays by thirteen art historians,

art critics, curators, artists and educators, and offers different frameworks for talking about visual representation and the current environmental crisis. The anthology models a range of methodological approaches drawn from different disciplines, and contributes to an understanding of how artists and those writing about art construct narratives around the environment. The book is illustrated with examples of art by nearly thirty different contemporary artists.

Indigenous leaders and other visionaries suggest solutions to today's global crisis • Original Instructions are ancient ways of living from the heart of humanity within the heart of nature •

Explores the convergence of indigenous and contemporary science and the re-indigenization of the world's peoples • Includes authoritative indigenous voices, including John Mohawk and Winona LaDuke For millennia the world's indigenous peoples have acted as guardians of the web of life for the next seven generations. They've successfully managed complex reciprocal relationships between biological and cultural diversity. Awareness of indigenous knowledge is reemerging at the eleventh hour to help avert global ecological and social collapse. Indigenous cultural wisdom shows us how to live in peace-- with the earth and one another. Original Instructions evokes the rich indigenous storytelling tradition in this collection of presentations gathered

from the annual Bioneers conference. It depicts how the world's native leaders and scholars are safeguarding the original instructions, reminding us about gratitude, kinship, and a reverence for community and creation. Included are more than 20 contemporary indigenous leaders--such as Chief Oren Lyons, John Mohawk, Winona LaDuke, and John Trudell. These beautiful, wise voices remind us where hope lies.

Indigenous Traditions and Ecology - John Grim 2001

The authors, a diverse group of indigenous and non-native scholars and

environmental activists, address urgent questions facing indigenous communities as they struggle with threats to their own sovereignty, increased market and media globalization, and the conservation of endangered bioregions.

Braiding Sweetgrass - Robin Wall Kimmerer 2014-09-01

"As a leading researcher in the field of biology, Robin Wall Kimmerer understands the delicate state of our world. But as an active member of the Potawatomi nation, she senses and relates to the world through a way of knowing far older than any science. In Braiding Sweetgrass, she intertwines these two modes of awareness--the analytic and the emotional, the scientific and the cultural--to ultimately reveal a path toward healing the rift that grows between people and

nature. The woven essays that construct this book bring people back into conversation with all that is green and growing; a universe that never stopped speaking to us, even when we forgot how to listen"--

A People's Ecology - Gregory Cajete 1999

This book presents a tapestry of perspectives on food and the interplay of health, cultural ecology, and environment, which are the fabric and foundation of all sustainable living. It offers personal stories, documented information, traditional understandings, and speculations on future directions. Each contribution calls on us to reclaim our human heritage of "caring for our home fires" -- a metaphor that can inspire the revitalisation of our connections to the earth, all living things, and each other.

The writers examine the underlying ecology of sustainable living rooted in the historical traditions, environmental practices, and a sense of place of peoples of the Southwest; and they describe the impact that disruption of this way of life continues to have on health, well-being, communal identity. Drawing on an indigenous paradigm of "healthy environment, healthy culture, healthy people," this book explores possibilities of applying the principles of sustainable living in both traditional and non-traditional communities.

Issues and trends in education for sustainable development

Native Liberty - Gerald Vizenor 2009

Gerald Vizenor was a journalist for the Minneapolis Tribune when he discovered that his direct ancestors were the editor and publisher of *The Progress*, the first Native newspaper on the White Earth Reservation in Minnesota. Vizenor, inspired by the kinship of nineteenth century Native journalists, has pursued a similar sense of resistance in his reportage, editorial essays, and literary

art. Vizenor reveals in *Native Liberty* the political, poetic, visionary, and ironic insights of personal identity and narratives of cultural sovereignty. He examines singular acts of resistance, natural reason, literary practices, and other strategies of survivance that evade and subvert the terminal notions of tragedy and victimry. *Native Liberty* nurtures survivance and creates a sense of cultural and historical presence. Vizenor, a renowned Anishinaabe literary scholar and artist, writes in a direct narrative style that integrates personal experiences with original presentations, comparative interpretations, and critiques of legal issues and historical situations.

A Climate of Justice: An Ethical Foundation for

Environmentalism -

Marvin T. Brown

2021-12-22

This open access book helps readers combine history, politics, and ethics to address the most pressing problem facing the world today: environmental survival. In *A Climate of Justice*, Marvin Brown connects the environmental crisis to basic questions of economic, social, and racial justice. Brown shows how our current social climate maintains systemic injustices, and he uncovers resources for change through a civic ethics of repair and reciprocity. A must-read for researchers and educators in the area of environmental ethics and those teaching courses in the fields of public policy and environmental sustainability. With the support of more than 30 libraries, the LYRISIS United Nations Sustainable Development

Goals Fund has enabled this publication related to SDG13 (Climate Action) to be available fully open access.

Blackfoot Physics -

David Peat 2006-01-01

"The modern version of *The Tao of Physics*. . . We gain tantalizing glimpses of an elusive alternative to the thing we know as science. . . . Above all, Peat's book is an eloquent plea for a fair go for the modes of enquiry of other cultures." --New Scientist
One summer in the 1980s, theoretical physicist F. David Peat went to a Blackfoot Sun Dance ceremony. Having spent all of his life steeped in and influenced by linear Western science, he was entranced by the Native American worldview and, through dialogue circles between scientists and native elders, he began to explore it in greater depth. *Blackfoot Physics*

is the account of his discoveries. In an edifying synthesis of anthropology, history, metaphysics, cosmology, and quantum theory, Peat compares the medicines, the myths, the languages—the entire perceptions of reality of the Western and indigenous peoples. What becomes apparent is the amazing resemblance between indigenous teachings and some of the insights that are emerging from modern science, a congruence that is as enlightening about the physical universe as it is about the circular evolution of humanity's understanding. Through Peat's insightful observations, he extends our understanding of ourselves, our understanding of the universe, and how the two intersect in a meaningful vision of human life in relation

to a greater reality.
Right Relationship - Peter Brown 2009-02-09
Our current economic system is unsustainable. Its fundamental elements, unlimited growth, and endless wealth accumulation fly in the face of the fact that the Earth's resources are clearly finite. In this work, the authors offer a comprehensive new economic model.

Traditional Ecological Knowledge - Melissa K. Nelson 2018-10-11
Provides an overview of Native American philosophies, practices, and case studies and demonstrates how Traditional Ecological Knowledge provides insights into the sustainability movement.
The Bill McKibben Reader - Bill McKibben 2008-03-04
Powerful, impassioned essays on living and being in the world, from

the bestselling author of *The End of Nature* and *Deep Economy* For a generation, Bill McKibben has been among America's most impassioned and beloved writers on our relationship to our world and our environment. His groundbreaking book on climate change, *The End of Nature*, is considered "as important as Rachel Carson's classic *Silent Spring*"* and *Deep Economy*, his "deeply thoughtful and mind-expanding"*** exploration of globalization, helped awaken and fuel a movement to restore local economies. Now, for the first time, the best of McKibben's essays—fiery, magical, and infused with his uniquely soulful investigations of modern life—are collected in a single volume, *The Bill McKibben Reader*. Whether meditating on today's

golden age in radio, the natural place of biting black flies in our lives, or the patriotism of a grandmother fighting to get corporate money out of politics, McKibben inspires us to become better caretakers of the Earth—and of one another. **The Plain Dealer* (Cleveland) **Michael Pollan [What Kind of Ancestor Do You Want to Be?](#) - John Hausdoerffer 2021-05-28 This book "challenges our relationship to the environment and to each other, not only now but across generations. It is an important question for our time, when communities have become fragmented by a global consumer society, when our selves have become isolated in a competitive and technology-driven economy, and when our spiritual, social, and ecological impacts on

human and other-than-human beings extend farther than ever imagined due to globalization and climate change. Through interviews and poetic snapshots into the experience of Indigenous people and others, this book demands that the reader think about how contemporary concerns oblige us to see ourselves as someone's future ancestor and, in turn, creates for the reader a different way of looking at his or her traditions and self"--

Ecological Literacy - Michael K. Stone 2005

A network of educational reformers reports on projects that are equipping today's children with the tools of ecological consciousness and systems thinking that will help humankind live more sustainably on the Earth tomorrow.

A Yupiaq Worldview -

Angayuqaq Oscar Kawagley
2006-02-17

Oscar Kawagley is a man of two worlds, walking the sometimes bewildering line between traditional Yupiaq culture and the Westernized Yupiaq life of today. In this study, Kawagley follows both memories of his Yupiaq grandmother, who raised him with the stories of the Bear Woman and respectful knowledge of the reciprocity of nature, and his own education in science as it is taught in Western schools. Kawagley is a man who hears the elders' voices in Alaska and knows how to look for the weather and to use the land and its creatures with the most delicate care. In a call to unite the two parts of his own and modern Yupiaq history, Kawagley proposes a way of teaching that incorporates all ways of

knowing available in Yupiaq and Western science. He has traveled a long journey, but it ends where it began, in a fishing camp in southwestern Alaska, a home for his heart and spirit. The second edition examines changes that have impacted the Yupiaq and other Alaska Native communities over the last ten years, including implementation of cultural standards in indigenous education and the emergence of a holistic approach in the sciences.

The Original Instructions -

Manitonquat 2009-06-29
"Human beings have forgotten their instructions" That is how many of the Native elders responded to Manitonquat when he traveled the continent over forty years ago seeking answers to the questions "What is wrong with people? Why is

there war, violence, oppression, greed, injustice, poverty, indifference and destruction of the environment?" Sitting with and listening to many elders of First Nations from all parts of North America, he began to form a clearer idea of what they often called "the Original Instructions". All of Creation is formed by them – what some refer to as Natural Law, Dharma, or Tao. Those instructions for successful and happy relationships with families and communities and with all life, the Earth and the Cosmos, were passed down through the generations by elders of the indigenous peoples, who lived successfully and happily by them until they were invaded by newer cultures of domination, oppression and greed. These elders are

becoming more rare as fewer and fewer young people have access to their wisdom and more and more follow the destructive ways of the dominant culture in materialism and self-centeredness.

Manitonquat, a Wampanoag elder now in his 80th year, is a direct link to the old ways of the people. In a culture of domination there is more violence, more fear, more isolation, and less love and happiness than in the old ways of all people at one time, ways of cooperation and equality, of respect and relatedness and thanksgiving.

Manitonquat was told by the elders that since he had been taught the skills of communication in the university he was meant to bring their teachings to the world (as they said they were not Indian but Human Being teachings), to any

who sought and wished for that knowledge. Doing that in books and talks all over the world, he has acquired added insight into the problems of society today and a unique perspective in bringing circles to many prisons weekly for the past 25 years.

Native Roots - Jack Weatherford 2010-06-23
"Well written, imagery-ridden...A tale of what was, what became, and what is today regarding the Indian relation to the European civilization that 'grafted' itself onto this ancient system.'" (Minneapolis Star Tribune)
Conventional American history holds that the white settlers of the New World re-created the societies they had known in England, France, and Spain. But as anthropologist Jack Weatherford, author of

INDIAN GIVERS, brilliantly shows, the Europeans actually grafted their civilization onto the deep and nourishing roots of Native American customs and beliefs. Our place names, our farming and hunting techniques, our crafts, the very blood that flows in our veins--all derive from American Indians ways that we consistently fail to see.

Land Education - Kate McCoy 2017-10-02

This important book on Land Education offers critical analysis of the paths forward for education on Indigenous land. This analysis discusses the necessity of centring historical and current contexts of colonization in education on and in relation to land. In addition, contributors explore the intersections of environmentalism and

Indigenous rights, in part inspired by the realisation that the specifics of geography and community matter for how environmental education can be engaged. This edited volume suggests how place-based pedagogies can respond to issues of colonialism and Indigenous sovereignty. Through dynamic new empirical and conceptual studies, international contributors examine settler colonialism, Indigenous cosmologies, Indigenous land rights, and language as key aspects of Land Education. The book invites readers to rethink 'pedagogies of place' from various Indigenous, postcolonial, and decolonizing perspectives. This book was originally published as a special issue of *Environmental Education Research*.

Contemporary Studies in Environmental and Indigenous Pedagogies -

Andrejs Kulnieks

2013-06-13

Contemporary Studies in Environmental and Indigenous Pedagogies: A Curricula of Stories and Place. Our book is a compilation of the work of experienced educational researchers and practitioners, all of whom currently work in educational settings across North America. Contributors bring to this discussion, an enriched view of diverse ecological perspectives regarding when and how contemporary environmental and Indigenous curriculum figures into the experiences of curricular theories and practices. This work brings together theorists that inform a cultural ecological analysis of the environmental crisis by

exploring the ways in which language informs ways of knowing and being as they outline how metaphor plays a major role in human relationships with natural and reconstructed environments. This book will be of interest to educational researchers and practitioners who will find the text important for envisioning education as an endeavour that situates learning in relation to and informed by an Indigenous Environmental Studies and Eco-justice Education frameworks. This integrated collection of theory and practice of environmental and Indigenous education is an essential tool for researchers, graduate and undergraduate students in faculties of education, environmental studies, social studies,

multicultural education, curriculum theory and methods, global and comparative education, and women's studies. Moreover, this work documents methods of developing ways of implementing Indigenous and Environmental Studies in classrooms and local communities through a framework that espouses an eco-ethical consciousness. The proposed book is unique in that it offers a wide variety of perspectives, inviting the reader to engage in a broader conversation about the multiple dimensions of the relationship between ecology, language, culture, and education in relation to the cultural roots of the environmental crisis that brings into focus the local and global commons, language and identity, and environmental justice through pedagogical

approaches by faculty across North America who are actively teaching and researching in this burgeoning field.

Engineering for Sustainable Development

- International Centre for Engineering Education 2021-03-02

The report highlights the crucial role of engineering in achieving each of the 17 SDGs. It shows how equal opportunities for all is key to ensuring an inclusive and gender balanced profession that can better respond to the shortage of engineers for implementing the SDGs. It provides a snapshot of the engineering innovations that are shaping our world, especially emerging technologies such as big data and AI, which are crucial for addressing the pressing challenges facing humankind and the planet. It analyses the

transformation of engineering education and capacity-building at the dawn of the Fourth Industrial Revolution that will enable engineers to tackle the challenges ahead. It highlights the global effort needed to address the specific regional disparities, while summarizing the trends of engineering across the different regions of the world.

Decolonize Your Diet - Luz Calvo 2016-01-04 International Latino Book Award winner, Best Cookbook More than just a cookbook, *Decolonize Your Diet* redefines what is meant by "traditional" Mexican food by reaching back through hundreds of years of history to reclaim heritage crops as a source of protection from modern diseases of development. Authors Luz Calvo and Catriona Rueda Esquibel

are life partners; when Luz was diagnosed with breast cancer in 2006, they both radically changed their diets and began seeking out recipes featuring healthy, vegetarian Mexican foods. They promote a diet that is rich in plants indigenous to the Americas (corn, beans, squash, greens, herbs, and seeds), and are passionate about the idea that Latinos in America, specifically Mexicans, need to ditch the fast food and return to their own culture's food roots for both physical health and spiritual fulfillment. This vegetarian cookbook features over 100 colorful, recipes based on Mesoamerican cuisine and also includes contributions from indigenous cultures throughout the Americas, such as Kabocha Squash in Green Pipian,

Aguachile de Quinoa, Mesquite Corn Tortillas, Tepary Bean Salad, and Amaranth Chocolate Cake. Steeped in history but very much rooted in the contemporary world, *Decolonize Your Diet* will introduce readers to the energizing, healing properties of a plant-based Mexican American diet. Full-color throughout. Luz Calvo and Catriona Rueda Esquibel are professors at California State East Bay and San Francisco State University, respectively. They grow fruits, vegetables, and herbs on their small urban farm. This is their first book.

Ecological and Social Healing - Jeanine M.

Canty 2016-10-04

This book is an edited collection of essays by fourteen multicultural women (including a few Anglo women) who are doing work that crosses the boundaries of

ecological and social healing. The women are prominent academics, writers and leaders spanning Native American, Indigenous, Asian, African, Latina, Jewish and Multiracial backgrounds. The contributors express a myriad of ways that the relationship between the ecological and social have brought new understanding to their experiences and work in the world. Moreover by working with these edges of awareness, they are identifying new forms of teaching, leading, healing and positive change. *Ecological and Social Healing* is rooted in these ideas and speaks to an "edge awareness or consciousness." In essence this speaks to the power of integrating multiple and often conflicting views and the transformations that result. As women working

across the boundaries of the ecological and social, we have powerful experiences that are creating new forms of healing. This book is rooted in academic theory as well as personal and professional experience, and highlights emerging models and insights. It will appeal to those working, teaching and learning in the fields of social justice, environmental issues, women's studies, spirituality, transformative/environmental/sustainability leadership, and interdisciplinary/intersectorality studies.

And Grandma Said--

Iroquois Teachings - Tom Porter 2008

The Iroquois culture and traditional Longhouse spirituality has a

universal appeal, a ring of truth to it that resonates not only with other indigenous people, but also with non-Native people searching for their own spiritual roots. Raised in the home of a grandmother who spoke only Mohawk, Sakokweni6nkwas (Tom Porter) was asked from a young age, to translate for his elders. After such intensive exposure to his grandparents' generation, he is able to recall in vivid detail, the stories and ceremonies of a culture hovering on the brink of extinction. After devoting most of his adult life to revitalizing the culture and language of his people, Tom finally records here, the teachings of a generation of elders who have been gone for more than twenty years. Beginning with an introduction about why

he is only now beginning to write all this down, he works his way chronologically through the major events embedded in Iroquois oral history and ceremony, from the story of creation, to the beginnings of the clan system, to the four most sacred rituals, to the beginnings of democracy, brought to his people by the prophet and statesman his people refer to as the Peacemaker. Interspersed with these teachings, Tom tells us in sometimes hilarious, sometimes tragic detail, the effect of colonization on his commitment to those teachings. Like a braid, the book weaves back and forth between these major teachings, and briefer teachings on topics such as pregnancy, child-rearing and Indian tobacco, weaving the political

with the spiritual. Through his recollections of "Grandma," and what she said, we also get an inside view of the life of a Mohawk man, and his struggles. Sometimes articulate and at other times inventive with his second language of English, Tom takes us on the journey with him, asking us to trade eyes, by "erasing the blackboard" to see if we "can understand what a Mohawk sees, feels, is happy about and is sad about." Chapter sections and headings include: The Opening Address, Colonialism, Creation Story, Language in 3D, The Clan System, Trading Eyes, Funerals and Contradictions, A Language Dilemma, The Fog, Where We've Settled, The Four Sacred Rituals, Atenaha: the Seed Game, The Four Sacred Beings, Three Souls or Spirits and

Ohkí:we, Weddings, Pregnancies, A Spiritual Ladder, Child Rearing Methods, The Great Law of Peace, Some Notes on Tobacco and Other Medicine, The Leadership, Casinos, Prayer?, The Future and The Closing Address. There is also an appendix of interviews with Tom's children, entitled: What Grandma's Great-Grandchildren Learned. Written as it is, by someone raised predominantly by a grandmother, it contains teachings which might otherwise be lost. The Iroquois culture and traditional Longhouse spirituality (of which Mohawk is one of five - and more recently six - nations) has a universal appeal, a ring of truth to it that resonates not only with other indigenous people, but also with non-Native people searching for their own spiritual

roots. Due to the suppression of indigenous spirituality and culture, not only in Iroquois country, but across North America, many are searching to recover the remnants of what has been lost. This book makes a significant contribution to doing that, having been written by one of the original leaders of the revitalization movement. During the 1960s and 1970s this Mohawk Bear Clan Elder traveled extensively across North America with a group called the White Roots of Peace, a group which has been credited as the original stimulus for the growing trend to return to traditional ways on this continent. *Visionary Plant Consciousness* - J. P. Harpignies 2007-03-21 23 leading experts reveal the ways that psychoactive plants allow nature's "voice"

to speak to humans and what this communication means for our future • Presents the specific “human-plant interconnection” revealed by visionary plants • Explores the relevance of plant-induced visions and shamanic teachings to humanity’s environmental crisis • With contributions from Terence McKenna, Andrew Weil, Wade Davis, Michael Pollan, Alex Grey, Jeremy Narby, Katsi Cook, John Mohawk, Kat Harrison, and others Visionary plants have long served indigenous peoples and their shamans as enhancers of perception, thinking, and healing. These plants can also be important guides to the reality of the natural world and how we can live harmoniously in it. In *Visionary Plant Consciousness*, editor J. P. Harpignies has

gathered presentations from the Bioneers annual conference of environmental and social visionaries that explore how plant consciousness affects the human condition. Twenty-three leading ethnobotanists, anthropologists, medical researchers, and cultural and religious figures such as Terence McKenna, Andrew Weil, Wade Davis, Michael Pollan, Alex Grey, Jeremy Narby, Katsi Cook, John Mohawk, and Kat Harrison, among others, present their understandings of the nature of psychoactive plants and their significant connection to humans. What they reveal is that these plants may help us access the profound intelligence in nature-- the “mind of nature”-- that we must learn to understand in order to survive our ecologically destructive way of life.

Indigenous Data

Sovereignty - Tahu

Kukutai 2016-11-14

As the global 'data revolution' accelerates, how can the data rights and interests of indigenous peoples be secured? Premised on the United Nations Declaration on the Rights of Indigenous Peoples, this book argues that indigenous peoples have inherent and inalienable rights relating to the collection, ownership and application of data about them, and about their lifeways and territories. As the first book to focus on indigenous data sovereignty, it asks: what does data sovereignty mean for indigenous peoples, and how is it being used in their pursuit of self-determination? The varied group of mostly indigenous contributors theorise and

conceptualise this fast-emerging field and present case studies that illustrate the challenges and opportunities involved. These range from indigenous communities grappling with issues of identity, governance and development, to national governments and NGOs seeking to formulate a response to indigenous demands for data ownership. While the book is focused on the CANZUS states of Canada, Australia, Aotearoa/New Zealand and the United States, much of the content and discussion will be of interest and practical value to a broader global audience. 'A debate-shaping book ... it speaks to a fast-emerging field; it has a lot of important things to say; and the timing is right.' – Stephen Cornell, Professor of Sociology and Faculty Chair of the Native

Nations Institute,
University of Arizona

Xiuhtezcatl Martinez is a 16-year-old climate activist, hip-hop artist, and powerful new voice on the front lines of a global youth-led movement. He and his group the Earth Guardians believe that today's youth will play an important role in shaping our future. They know that the choices made right now will have a lasting impact on the world of tomorrow, and people--young and old--

are asking themselves what they can do to ensure a positive, just, and sustainable future. *We Rise* tells these stories and addresses the solutions. Beginning with the empowering story of the Earth Guardians and how Xiuhtezcatl has become a voice for his generation, *We Rise* explores many aspects of effective activism and provides step-by-step information on how to start and join solution-oriented movements. With conversations between Xiuhtezcatl and well-known activists, revolutionaries, and celebrities, practical advice for living a more sustainable lifestyle, and ideas and tools for building resilient communities, *We Rise* is an action guide on how to face the biggest problems of today, including climate change, fossil fuel

extraction, and industrial agriculture. If you are interested in creating real and tangible change, We Rise will give you the inspiration and information you need to do your part in making the world a better place and leave you asking, what kind of legacy do I want to leave?

Dreaming the Future -

Kenny Ausubel 2012-08-28
Few would deny that we are entering a period of great change. Our environment is collapsing. Social disruption abounds. All around, it seems, we are experiencing breakdown. But out of this chaos comes the opportunity for breakthrough-the opportunity to reimagine our future. In Dreaming the Future, Kenny Ausubel leads us into that possible new world and introduces us to the thinkers and doers who are-sometimes quietly,

sometimes not-leading what he calls "a revolution from the heart of nature and the human heart." In a collection of short, witty, poignant, even humorous essays, Ausubel tracks the big ideas, emerging trends, and game-changing developments of our time. He guides us through our watershed moment, showing how it's possible to emerge from a world where corporations are citizens, the gap between rich and poor is cavernous, and biodiversity and the climate are under assault and create a world where we take our cues from nature and focus on justice, equity, diversity, democracy, and peace. Even those steeped in the realities of a world gone wrong and efforts to right it will find refreshing, even

surprising, perspectives in Dreaming the Future. It will come as no surprise to readers that Ausubel is cofounder of Bioneers-which foreword author David W. Orr describes as "one part global salon...one part catalytic organization." *Moonrise* - Ines Johnson 2016-08-02

This Alpha's gonna take a bite out of his brother's fake fiancée. Sheltered Lucia is determined to find a new life and love. No wonder she falls for the first guy to flash her a wolfish smile her first day in the big city. After rescuing the charming shifter from certain death, she's sure he feels the same way about her, and will tell her so – just as soon as he wakes up from his coma. To stay by her instalove's side in the hospital, Lucia pretends she's his bonded mate. This twist of the truth

takes a turn when she meets her fake fiancé's sexy older brother and wonders if she was a bit too hasty in declaring love-at-first-sight the first time. For months, Jackson has sensed that his fated mate was near. When he enters his brother's hospital room, he instantly pounces on the beautiful, curvaceous woman there. He's ready to mark her as his own until he discovers his brother may have gotten there first. The more Jackson gets to know Lucia, the more his doubts about the engagement grow. She has nothing in common with his wayward, lone wolf brother. But she sure does check every one of Jackson's boxes. Native Studies Keywords

- Stephanie Nohelani Teves 2015-05-21
Native Studies Keywords explores selected concepts in Native studies and the words commonly used to describe them, words whose meanings have been insufficiently examined. This edited volume focuses on the following eight concepts: sovereignty, land, indigeneity, nation, blood, tradition, colonialism, and indigenous knowledge. Each section includes three or four essays and provides definitions, meanings, and significance to the concept, lending a historical, social, and political context. Take sovereignty, for example. The word has served as the battle cry for social justice in Indian Country. But what is the meaning of sovereignty? Native peoples with diverse

political beliefs all might say they support sovereignty—without understanding fully the meaning and implications packed in the word. The field of Native studies is filled with many such words whose meanings are presumed, rather than articulated or debated. Consequently, the foundational terms within Native studies always have multiple and conflicting meanings. These terms carry the colonial baggage that has accrued from centuries of contested words. Native Studies Keywords is a genealogical project that looks at the history of words that claim to have no history. It is the first book to examine the foundational concepts of Native American studies, offering multiple perspectives and opening a critical new conversation.

Becoming Rooted - Randy Woodley 2022-01-04

What does it mean to become rooted in the land? How can we become better relatives to our greatest teacher, the Earth? *Becoming Rooted* invites us to live out a deeply spiritual relationship with the whole community of creation and with Creator. Through meditations and ideas for reflection and action, Randy Woodley, an activist, author, scholar, and Cherokee descendant, recognized by the Keetoowah Band, guides us on a one-hundred-day journey to reconnect with the Earth. Woodley invites us to come away from the American dream-- otherwise known as an Indigenous nightmare-- and get in touch with the water, land, plants, and creatures around us, with the people who lived on that land for

thousands of years prior to Europeans' arrival, and with ourselves. In walking toward the harmony way, we honor balance, wholeness, and connection. Creation is always teaching us. Our task is to look, and to listen, and to live well. She is teaching us now.

Indigenous Community -

Gregory Cajete

2015-08-01

Gregory Cajete has provided another must-read book for educators seeking a comprehensive theory and action to Indigenous education. In clear, coherent, and accessible style, he answers the most important education quest today: what kind of pedagogy can maintain and revitalize the Indigenous peoples in the 21st century? Twofold: Comprehend Indigenous peoples' historical trauma and reclaim Indigenous ways

of thinking, teaching, and learning from a context of community, land, and spirit. Done!

When Healing Becomes a

Crime - Kenny Ausubel

2000-05-01

A powerful and substantiated expose of the medical politics that prevents promising alternative cancer therapies from being implemented in the United States. • Focuses on Harry Hoxsey, the subject of the author's award-winning documentary, who claimed to cure cancer using herbal remedies. • Presents scientific evidence supporting Hoxsey's cancer-fighting claims. • Published to

coincide with the anticipated 2000 public release of the government-sponsored report finding "noteworthy cases of survival" among Hoxsey patients. Harry Hoxsey claimed to cure cancer using herbal remedies, and thousands of patients swore that he healed them. His Texas clinic became the world's largest privately owned cancer center with branches in seventeen states, and the value of its therapeutic treatments was upheld by two federal courts. Even his arch-nemesis, the AMA, admitted his treatment was effective against some forms of cancer. But the medical establishment refused an investigation, branding Hoxsey the worst cancer quack of the century and forcing his clinic to Tijuana, Mexico, where it continues to claim

very high success rates. Modern laboratory tests have confirmed the anticancer properties of Hoxsey's herbs, and a federal government-sponsored report is now calling for a major reconsideration of the Hoxsey therapy. When *Healing Becomes a Crime* exposes the overall failure of the War on Cancer, while revealing how yesterday's "unorthodox" treatments are emerging as tomorrow's medicine. It probes other promising unconventional cancer treatments that have also been condemned without investigation, delving deeply into the corrosive medical politics and powerful economic forces behind this suppression. As alternative medicine finally regains its rightful place in mainstream practice, this compelling book will not only forever

change the way you see

medicine, but could also
save your life.
